description: Mobile App Developer

We are looking for a talented mobile App developer to help us with one of our projects. We need to develop both Android and IOS versions.

We would need someone to build the front end of the App that communicates with an existing backend via HTTPS protocol. App POSTs and receives response. App users would have the ability to interact with each other via Bump and AirDrop as well. The App has about 20-25 pages. Detailed specs for functionality and look of the App will be provided.

startd: Immediately

endd: about four weeks

postd: 3/18/2015

salary: $30-50/hour depending on skill level

hours: flexible, about 20h/week

apply: Send resume and skills to:

qualifications: We are looking for talented developer with experience in developing and deploying mobile apps on either or both Android and IOS platforms. Knowledge of both platforms is preferred but not mandatory. You must be familiar with Bump and/or AirDrop functionality.

The ideal candidate will be punctual, professional, able to give accurate progress reports, and follow detailed specifications while allowing their talent flourish and make decisions when necessary. You will not be micromanaged but you will receive all the support necessary to execute the required tasks.
