

BIO 224 Human Anatomy and Physiology II

PATHOLOGY OF INJURIES AND ILLNESSES

Cognitive Domain

- 5 Describes the distribution of fluid between intracellular and extracellular compartments and the process of normal circulation.
- 6 Analyzes the normal physiological responses of the human body to trauma and inactivity of specific body tissues (ligaments/capsules, muscles, tendons, and bones).
- 10 Describes cellular homeostasis and the integration and coordination of cell function in response to disease.

ASSESSMENT AND EVALUATION

Cognitive Domain

- 1 Demonstrates knowledge of the normal anatomical structures of the human body systems and their physiological functions, including the musculoskeletal (including articulations), nervous (central and peripheral), cardiovascular, respiratory, digestive, urogenital, endocrine, dermatological, reproductive, and special sensory systems.
- 22 Describes the location and function of the urinary, digestive, reproductive, and lymphatic systems.
