MANAGEMENT INFORMATION SYSTEMS
MS MIS BRIDGE OPTION

The Bridge Option enables students to start on a **Master of Science in Management Information Systems** (MS MIS) while they are still an undergraduate student. This program is open to all UNLV undergraduate students, and not just those in the Lee Business School or the BSBA Information Systems program.

Qualified students who are interested in enrolling in the MS MIS program can take the following graduate courses upon approval by the MIS Graduate Coordinator:

- MIS 744 Information Systems Strategy
- MIS 764 E-Commerce
- MIS 766 Data Management
- MIS 768 Java Programming

These courses may be used to fulfill the requirements of the IS minor. BSBA Information Systems majors may fulfill their requirements for their degree in the following way:

- MIS 744 replaces IS 491
- MIS 764 fulfills IS elective
- MIS 766 replaces IS 475
- MIS 768 replaces IS 380

For students that get subsequently admitted into the MS MIS program, any of the above MIS graduate courses that they have completed, with a grade of "B" or better, as part of the Bridge Option at UNLV will be waived in the MS MIS program. Courses completed with a B- or lower cannot be so used. As a result, students can complete the MS MIS degree with as little as 24 additional credits or one year of full-time study. To qualify for graduate participation, undergraduate students must meet the following requirements at time of enrollment in each graduate course:

Requirements

- Upper Level Undergraduate Standing
- Minimum 3.00 overall GPA
- Recommendation of the MIS Graduate Coordinator
  - Recommendation of the coordinator must be obtained for each such course registration. To apply for graduate enrollment, undergraduate students must submit a completed Bridge Option Enrollment Request form to the MIS Graduate Coordinator, no less than two weeks before the beginning of the semester for which they would like to register for graduate courses. Please email *misgradprogram@unlv.edu* for the form and further instructions.

Approval to take these graduate courses does not convey a preference for admission to the MS MIS program.
Details on the MS MIS degree and admission requirements are available at *www.unlv.edu/degree/ms-management-information-systems*. See the MS MIS Course Descriptions at *www.unlv.edu/MET/course-descriptions* for course details.
