CONSTRUCTION MANAGEMENT JOB OPPORTUNITY

Company: Brown and Caldwell

Company Website: https://workfor.us/BrownAndCaldwell

Job Title: Entry Level Engineer

Work Location: Las Vegas, NV

Position Type: FULL-TIME

Salary: Unknown

College Level: Seniors, Graduates

OVERVIEW

Brown and Caldwell, a national environmental engineering firm, has an exciting opportunity for an entry level engineer to work on design infrastructure projects for municipal and private sector clients in our Las Vegas, NV office. You will provide civil/mechanical engineering support for a variety of projects which may include planning, evaluation, design and construction related activities for wastewater, water and storm water conveyance systems, pumping systems and related facilities. When you join Brown and Caldwell you will enjoy a unique and welcoming culture. You will find that we offer a nonhierarchical, collaborative, and supportive environment, allowing you to do your best work. You will be trusted to do the right thing by our project managers and external clients and given the flexibility to manage your own schedule to achieve this. The work we do is interesting, challenging and wide-ranging in nature, and so is our client base.

Role and Responsibilities

In this role you will work closely with project managers and other team members to execute work involving conventional types of civil engineering principals and other related activities for infrastructure projects. Specific duties may include the following: • Prepare infiltration/inflow analyses and pipeline condition assessments. • Assist with design of water and wastewater pipelines and pumping stations. • Assist with environmental studies, permitting, alternatives analyses, and other technical deliverables. • Check performance or conformity with plans and specifications as part of engineering services during construction. • Assist with submittal reviews, requests for information, correspondence, change requests, and change orders for construction projects. • Conduct field work as necessary for various projects. • Communicate effectively and coordinate with project teams including other disciplines (drafters, designers, and other engineers).
Qualifications and Education Requirements

- Bachelor’s degree in Civil/Environmental Engineering or related engineering field required
- EIT preferred
- 2 years professional experience in the study, design, and construction administration of wastewater facilities
- Excellent technical writing and communication skills required.

This position is subject to a pre-employment background check and a pre-employment drug test.
