OVERVIEW

Structural Design Engineer #12-ENG-31

Las Vegas, Nevada

Structural design engineer position available to join a successful and growing engineering team engaged in the design of public infrastructure. Participate in project teams to prepare design of public highways, roads and streets, bridges, building facilities, transit facilities, or a combination of these project types. Acquire progressive experience leading to a leadership position in project engineering. The ideal candidate will possess working knowledge of structural analysis and design software and have bridge or other heavy civil structural design experience. Working knowledge of AASHTO Bridge Design Specifications, as well as AutoCAD and Microstation preferred.

Position Requirements:

- 0 to 5 years of relevant design experience
- BSCE, MSCE preferred
- EIT or PE license (Nevada State)
- Strong written and oral communication ability
- Energetic team attitude
