INTERNSHIP/JOB OPPORTUNITY

Posting ID: E030716

Company: Caesars Entertainment  
Company Website: [www.caesars.com](http://www.caesars.com)

Job Title: Database Programmer/Analyst  
Work Location: Las Vegas, NV

Position Type: Full-Time Employment  
Salary: N/A

College Major(s): Computer Science  
College Level(s): Graduates

OVERVIEW

We are looking for a recent college graduate with a major in Computer Science, Management Information Systems, or equivalent to start off their career in IT as a Database Programmer/Analyst with the Enterprise Data Warehouse (EDW) team at Caesars Entertainment. The ideal candidate should be dynamic and motivated with a ‘can-do’ attitude. If you fit the profile and are eager to learn and grow within the organization, you could be the right candidate for this position.

Here at Caesars, you will be in the company of very experienced and highly skilled IT professionals. In fact, Caesars IT was ranked 11th on the Top100 places to work in IT in 2014 by ComputerWorld magazine and in the Top100 for many years prior to that.

The Enterprise Data Warehouse plays a very important role in the organization in that it helps answer business critical questions. Furthermore, it is the backbone of all marketing campaigns. The EDW team ensures that operational data is sourced from applications across the Enterprise and stored in a unified database for the consumption by the various business groups. The Database Programmer/Analyst will play a critical role within the EDW team with responsibilities including coding the load jobs to populate the data warehouse, building database structures such as tables/views/macros/triggers, integrating the processes into the overall Caesars system architecture, and much more.

Preferred skills for this position:
- Data warehouse concepts
- Structured Query Language (SQL)
- Unix/Linux operating system
- Shell scripting

Core concepts:
- Systems concepts
- Database concepts
- Software concepts
- Analysis, Modeling, and Design
