PROJECT ENGINEER JOB OPPORTUNITY

Posting ID: E030416
Company: Helix Electric
Job Title: Project Engineer or Estimator
Position Type: Full-Time
College Major(s): CEM and EE

Company Website: www.helixelectric.com
Work Location: San Diego, CA
Salary: N/A
College Level(s): Graduate Student

OVERVIEW

Helix Electric, Inc. is considered to be one of the most successful open-shop electrical contracting companies in the nation. San Diego based Helix Electric has expertise with projects in virtually every field of electrical construction – design/build services, industrial and commercial developments as well as government, institutional, communications and utilities projects. Helix Electric possesses world-class technical experts who maintain vital, long-term relationships and a high level of credibility with general contractors, utility and power user customers we serve. We have a strong reputation and extensive network of customer relationships and have consistently provided new, cutting-edge product innovations.

Helix Electric currently in search of talented and motivated Project Engineers to work with our seasoned Project Management team on some of the largest and most complex construction projects in the nation. Your initial role will be ensuring the safe and efficient construction of large scale electrical projects located all over the Western United States.

If you are interested in a position that offers a fast track into Project Management or Estimating, you are encouraged to apply. A bachelor’s degree in construction science/management/engineering or electrical engineering (with a power distribution focus) is highly preferred.

As a Project Engineer, some of your day to day responsibilities at Helix Electric would include.

- Tracking progress of multi-million dollar construction projects
- Creating and responding to RFIs
- Managing labor schedules, by working closely with Project Managers and Superintendents
- Estimating and pricing change orders
- Updating technical drawings with RFI response using AutoCAD
- Creating and maintaining detailed job logs
- Walk jobs, learn the trade inside and out, uncover efficiencies and implement them
- Nourish you entrepreneurial instincts in an environment that marries fresh ideas with proven methodologies

Helix Electric’s Project Engineers are afforded the following:

- Resources, training and support needed to reach you potential
- Responsibilities that will test your limits
• Several varying growth paths within the organization
• All the professional tools required for success
• Outstanding compensation and benefits packages
