OVERVIEW

For millions of people around the world, Polaris has become synonymous with adventure and passion, in both work and play. For more than 60 years, we’ve been making high-quality, breakthrough products—whether it’s launching the snowmobile industry, reinventing ATV categories year after year, developing the first purpose-built military vehicles or introducing a radical 3-wheel moto-roadster.

From our entrepreneurial roots as a mechanical shop, we’ve grown into one of the world’s largest Powersports companies. And in recent years, we’ve expanded beyond Powersports into adjacent markets, like commercial and military vehicles, where we can add value.

Today, Polaris offers a diverse portfolio of best-in-class brands that fuel the passion of workers and outdoor enthusiasts around the globe by delivering innovative, high-quality vehicles, products, services and experiences that enrich their lives.

Students with SAE Collegiate Design Series experience are desired candidates because of the ability to apply skills gained in the classroom to real engineering challenges.

Polaris is seeking engineering students interested in a career working with Motorcycles, Small Electric Vehicles, ATVs, Side by Sides, Snowmobiles and other products in Polaris’ growing product line. For more information about the Development Programs, please visit the Polaris Development Program Information Page, and to apply visit the Polaris Careers Page.

Applications for December 2016 and May 2017 grads will be accepted in August and through the fall recruiting season.

We haven't forgotten about Engineering Internship opportunities! Summer 2017 opportunities will be posted in the next few months at www.polaris.com/careers. Strong and substantial internship experiences also make for preferred EDP/ODP candidates.

For Development Program and Internship placements in 2017, we will collect and review resumes in September/October 2016 with offers made by November.

The Engineering Representatives below will be at the Baja competitions accepting resumes, or
you can always reach Engineering Human Resources Representatives via email at recruiting@polaris.com. Good luck at competition, we hope to see you there!
