STUDENT INTERN

Posting ID: I070316
Company: Terbine
Position Type: Internship
College Major(s): Any

Company Website: www.terbine.com/careers
Work Location: Las Vegas, NV
Salary: $15/hr, 30hr/week
College Level(s): Any

OVERVIEW

Terbine is looking for interns who would ideally be on their summer break from university or just graduated, and in disciplines that are engineering/science-related to include applied physics, mechanical engineering, electrical engineering and/or related.

The task set involves:
Doing deep, web-based research from home (or wherever, the point is that it can be done from anywhere with their own computer and Internet access) to find publicly available sensor datasets and streams.

These will be looked at for inclusion in the Terbine system (www.terbine.io). It turns out to be extraordinarily challenging to find this data without sophisticated searching and having a science or engineering education is very helpful to doing it successfully.

STUDENTS!
It’s important that you look thoroughly through their website www.terbine.com so that you have the basis for efficient conversation.

How to Apply
Send resumes to David Knight at pilot@terbine.com
