Company: Caesars Entertainment  
Position Type: Full-Time Employment  
College Major(s): Computer Science

Company Website: https://www.caesars.com/  
Work Location: Las Vegas, NV  
Salary: N/A  
College Level(s): Graduates

OVERVIEW

They are looking for a recent college graduate with a major in Computer Science, Management Information Systems (or equivalent) to start off their career in IT as a Programmer/Analyst with the Enterprise Data Warehouse (EDW) team at Caesars Entertainment. The ideal candidate should be dynamic and motivated with a ‘can-do’ attitude. If you fit the profile and are eager to learn and grow within the organization, you could be the right candidate for this position.

The Enterprise Data Warehouse plays a very important role in the organization in that it helps answer business critical questions. Furthermore, it is the backbone of all marketing campaigns. EDW team ensures that operational data is sourced from applications across the Enterprise and stored in a unified database for the consumption of the business team.

Here is what they do on a daily basis:

- Ensure that all data loads in to EDW occurs in an accurate and a timely manner
- Design, Develop, Test, and Deploy processes of sourcing data from applications
- Engage in efforts such as installation and upgrades to tools that we use in our space
- Collaborate with other teams to expand business capabilities across the Enterprise
- Assist with property openings and divestitures
- Administration of tools in our space such as patching and rebooting

Preferred skills for this position:

- Data warehouse concepts
- Structured Query Language (SQL)
- Unix/Linux operating system
- Shell scripting

Core concepts:

- Systems concepts
- Database concepts
- Software concepts
- Analysis, Modeling, and Design
