

Coleman Two Burner Stove

The Coleman Matchlight 2-Burner Propane Stove is especially designed for outdoor cooking. It features an all-metal construction with 2 adjustable burners. The burners are fully controllable from simmer to full output, giving you maximum control over the cooking process. This Coleman 2-burner propane stove has a high-pressure regulator that ensures a constant flame regardless of weather conditions. Wind baffles shield the flame from wind while cooking. A single cylinder of this outdoor 2-burner stove will last up to 1.1 hours with both burners on high. If the burners are kept on low, it can last for up to 4.5 hours. This is usually enough to take care of most of your cooking needs. This 10000-BTU propane stove has a removable nickel-chrome-plated grate that makes for easy cleaning. The aluminized and nickel-chrome cooktop is very rugged, holding up to hot food and bumps or everyday use.

This item will need a Propane cylinder, purchased from a local convenient store (not included)
