Water - it is a natural resource and necessity for each person on the planet. Today, it is increasingly challenging to provide and sustain clean water resources. As part of CH2M HILL’s Water Group you will be helping to provide solutions that enable people around the world to have access to safe, life-sustaining water. It is a big challenge, but the global and lasting impact is even greater.

Description and Desired Qualifications

CH2M HILL Water Careers - Las Vegas, NV US

The Challenge? Our Senior Wastewater Project Managers help provide and sustain clean water resources around the world. We are looking for individuals that can lead and manage large wastewater projects (>3M in fee) that have an average to above average level of technical complexity. Candidates will be evaluated based on their ability to demonstrate an understanding of project management competencies; a mastery of wastewater treatment; an understanding of business development and project delivery processes; and a working knowledge other water technologies that may be needed to procure and deliver project.

Additional Information: CH2M HILL will not sponsor an employment visa (e.g. H1-B, etc.) for this position.
Our **Wastewater Project Managers**:

- Knowledgeable in business development activities such as client relationship development, project positioning activities, proposal preparation, oral presentations, and contract negotiations
- Execute project through all phases of project consistent with established project delivery processes to meet the scope, schedule, budget and other specified contract requirements
- Mentor junior and mid-level staff
- Accountable for successfully completing projects to the satisfaction of the client while ensuring that health and safety, quality, financial, project delivery, and risk management policy expectations are met

**Basic Qualifications**

- B.S. Civil or Environmental Engineering
- 15 years of experience in wastewater project management and design

**Preferred Qualifications**

- MS in Civil or Environmental Engineering or a closely related field
- Basic skills/attributes should include excellent oral and written communications, self-motivation, team-oriented work practices, and strong expertise in data analysis and technical problem solving
- Able to form a team and complete projects in a focused and efficient manner
- Able to lead and guide junior to mid-level wastewater staff through all phases of wastewater process project
- Experienced in the areas of municipal wastewater treatment, whole plant process simulations, pilot-scale design and operation, wastewater collection systems, laboratory analysis of wastewater quality, and data analysis of wastewater quality
- Working knowledge of other water disciplines such as drinking water treatment, wastewater collection, and solid waste treatment, disposal, and permitting

**Degree Required**

Bachelors or 4 Year Degree
