SOFTWARE ENGINEERING INTERN

Posting ID:
Company: LT Game
Job Title: Intern
Position Type: Part-Time, 20-30 hrs/wk
College Major(s): Computer Science

Company Website: www.ltgame.com
Work Location: Las Vegas
Salary: $20-22/hour
College Level(s): Any

Overview
LT Game is one of the major gaming and casino providers in Macau and in the Asia Pacific region. Some of its avant-garde gaming products include the Live Multiple Games System (Which has live dealers, supports multiple table and has a terminal-based multi-game selection system) and the Paradise Jackpot System (Baccarat Side-Bet Progressive Jackpot). Both have been patented in Macau, USA and PCT (Patent Cooperation Treaty) countries. LT Game is striving to be at the forefront of the global gaming industry.

Responsibilities
The engineering intern will participate as a valuable member of the engineering team at LT Game, Ltd. by working directly with the engineering staff to design, develop, and implement the software for the electronic table game market. This is a paid internship that requires a minimum commitment of one semester and 20-30 hours per week. The intern will work directly with the engineering staff doing a variety of tasks related to developing both game and back end software.

Participate as a multidisciplinary engineering team member
Assist engineers with the design, development, integration, and testing of electronic table game software
Assist with the documentation of software and engineering data
Participate in the QA/QC process of software and hardware
