UNDERGRAD RESEARCH ASSISTANT

Posting ID:
Company: Hanlab, UNLV
Job Title: Research Assistant
Position Type: Part-Time
College Major(s): Any

Company Website:
Work Location: Las Vegas
Salary: $10/hr - $15/hr
College Level(s): Undergrads

Overview
Hanlab at UNLV is looking for undergraduate research assistants who are good at programming. We are a bioinformatics lab studying genomes by analyzing massive datasets generated from genome sequencing.

We look for students who can commit 15~20 hours a week of work, who are good at programming in at least one language (preferably python or C/C++), and comfortable with the linux environment.

It would be great if you are a curious person with interests in biology.

The pay starts at $10 per hour but can go up to $15 per hour based on your performance.

It is a good opportunity to hone your skill sets while working in between classes on campus. I had students who worked in the lab continuously for more than two years till their graduation.

If you are interested please send me an email, including your CV, unofficial transcript, and some examples of your code.

Thank you.
