UNLV Health Care Summit

Tracey Green MD
Vice Chair of Clinical Affairs
March 11, 2016
Key to Health Care Delivery

Local Public Health System

- Police
- EMS
- Providers Serving People with Disabilities
- MCOs
- Health Department
- Faith Based Organization
- Home Health
- Corrections
- Parks
- Police
- EMS
- Health Care Providers
- Hospitals
- Philanthropist
- Schools
- Elected Officials
- Nursing Homes
- Mass Transit
- Fire
- Health Care Providers
- Lab Facilities
- Drug Treatment
- Civic Groups
- Community Centers
- Environmental Health
- Employers
- Economic Development

UNLV School of Medicine
630,000 Medicaid recipients; more than 400,000 in Clark County

Lack of clarity of services, qualifications and reimbursement

Opportunity to look at quality outcomes, population wellness and incentives

Shortage of ALL provider types
Medicaid expansion
- Enrollment projected to increase: 800K by 2023
- Growing number of children on Medicaid
- Nearly 50% of Medicaid medical cost for institutional services

Homeless population 33K; largest in U.S.

Growing population of military veterans

Aging population projected to increase to 18.6% by 2030; high suicide rate

Tourists: 50-100K per week
## Challenges & Opportunities

Random acts of innovation vs. aligned efforts with strategic goals
A community-based system of care is comprehensive coordinate network of care

Identifying and directing services to meet individual needs, such as complex behavioral, educational, social, medical, etc.

The right care in the right place at the right time

Focus on initial upfront assessment that remains with patient
### Strengths
- Collaboration and Consensus/desire
- Wide array of diverse participants delivering care
- Community desire to improve health care
- Schools to develop a workforce
- Data-driven
- Measurable objectives with targets that align with 2 A’s

### Challenges
- Balancing between crisis and prevention
- Integrating at all opportunity
- Developing and funding of integrated data sources
- Developing an implementation plan
- Change!!!!
Nevada medical schools will graduate 320 medical students annually by 2021

- Need at least the same number of slots as graduates in Las Vegas
- 68% of students remain in state where they completed medical school & residency training
- Nevada needs to keep medical graduates in state
Focus on Medicaid patients
- Alleviate strain on local hospitals, ERs, and physician clinics (20% or more)

Students and residents will receive patient care experience
- 1-year longitudinal integrated clerkship
- All 60 students will work in clinic, along with 60+ faculty and residents

Hospitality in health care outpatient clinics

Integration with co-location across disciplines!
Unique opportunity to build a future health care delivery system

Next generation of health care delivery includes:

• Population-based health
• Value/outcome based health
• Outpatient focused
• Strategic partnerships
• Community integration with heavy focus on primary care (mental health)
• Patient-centric, proactively identifying and managing patients through data analytics
