What is Sustainability?

***“Meeting the needs of the present without compromising the ability of future generations to meet their own needs”
(Brundtland Report, 1987)***

Environmental—Economic
Energy efficiency
Incentives for green buildings

Economic—Social
Ethical business practices
Fair trade
Worker's rights

Environmental—Social
Environmental justice
Stewards of the environment

Adapted from the 2002 University of Michigan Sustainability Assessment

USI Mission

To reach out and collaborate with faculty, students, community groups, and national/international leaders in finding solutions for the quality of life challenges confronting the Las Vegas metropolitan area, Nevada, the Southwest, the nation, and world.

USI Goals

- Facilitate interdisciplinary and multidisciplinary research, scholarship, and creative activity
- Promote sustainability education
- Conduct targeted outreach to community and beyond
- Encourage campus sustainability

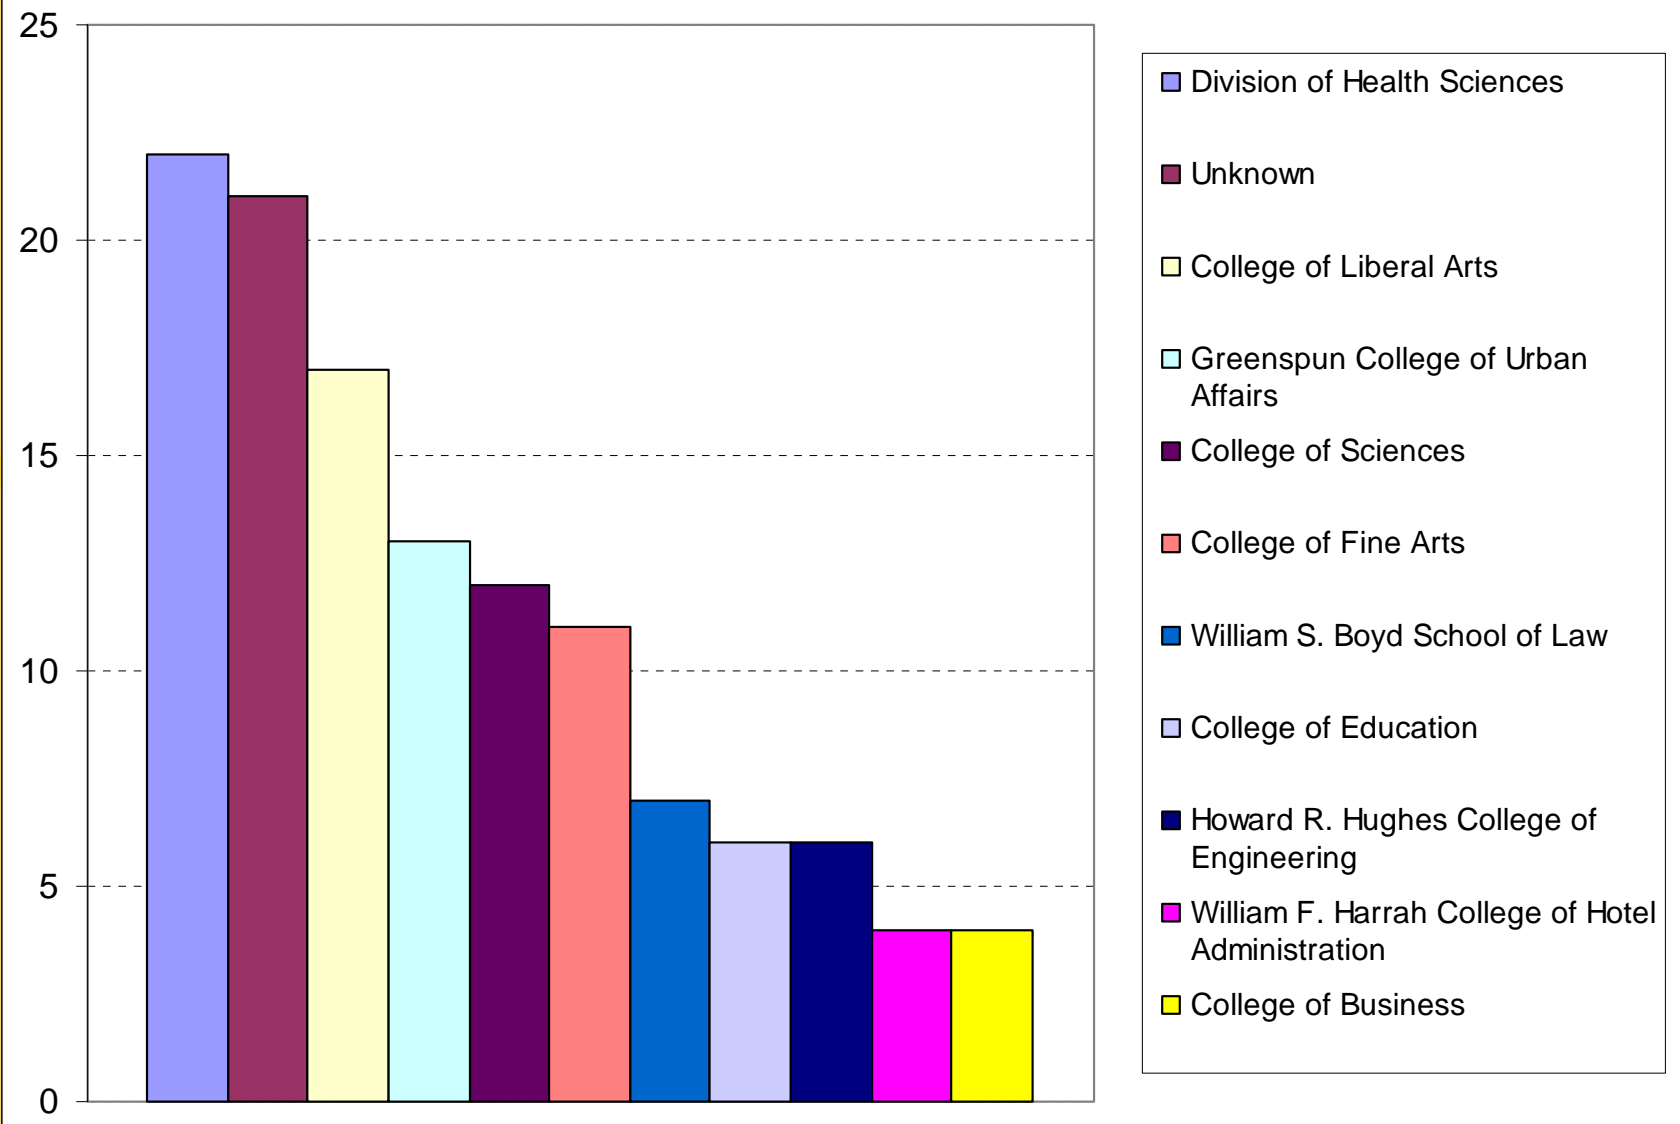

USI Support

- Faculty-Staff Advisory Committee
- Division of Research and Graduate Studies
- Community Partners
- Faculty Scholarship across units
- UNLV 50-100 Strategic Plan
- Students

- Association of Advancement of Sustainability in Higher Education (AASHE)

The screenshot shows the AASHE website homepage. At the top, the AASHE logo is displayed with the tagline "Association for the Advancement of Sustainability in Higher Education". A navigation menu on the left includes links for Home, About AASHE, Programs, Professional Development, Resource Center, Membership, Business Partnerships, Contact Us, FAQs, Member Login, and Search. A "SUBSCRIBE TO AASHE BULLETIN" button is located below the menu. The main content area features a large banner for "AASHE2008" with the text "Thank you for coming!" and "2ND BIENNIAL CONFERENCE & EXPO NOVEMBER 9-11 RALEIGH, NORTH CAROLINA". Below the banner is a section titled "AASHE 2008 Conference & Expo" with a brief description and a link to view photos and blog posts. To the right, there is a "Member Spotlight" section featuring a photo of students at Pomona College and a description of their sustainability initiatives. Below the spotlight are "Top Resources" including links to the AASHE Digest 2007, Academic Programs in Sustainability, AASHE Bulletin, ACUPCC Reporting Tool, and Campus Sustainability Profiles. At the bottom left, there is a "Campus Sustainability Perspectives" section with a "Recent Posts" list, including an article about clean renewable energy bonds used to fund wind turbines at the University of Minnesota-Morris.

Challenges to Sustainability

With a predicted local population of 4 million in 2036 and 72 percent of Nevadans now living in the Las Vegas metro area, we have become a very urban state that faces many challenges if we are to achieve a sustainable community. These challenges include:

- economic growth and diversification
- labor training
- affordable housing
- water supply
- air quality
- traffic and congestion
- security and safety
- health care
- immigration
- the best use of land
- public places
- recreation
- and the list goes on

Blue Moon, Acrylic Painting, 4' x 5' by James B. Pink, Professor Emeritus, UNLV Art Department

Welcome

A grassroots effort has emerged among faculty and professional staff at UNLV to reach out and partner with the community in finding workable solutions to the challenges facing the Las Vegas metro area.

Our goal is for UNLV to play a major role in achieving a sustainable Las Vegas community with all its interrelated dimensions, including environmental, economic, and social/cultural sustainability. We view this initiative as one that is of vital importance to our students, faculty, and the entire community. We earnestly believe that the community is our campus. Together, not only can we change our community, but we can change it for the better.
