Professional Behaviors
Introduction

Welcome to UNLVPT! After a thorough review of your past achievements and a personal interview, you have been selected as one of our students. This reflects our confidence in your potential to become a competent and ethical practitioner of physical therapy who will be able to deliver quality patient care in a variety of clinical settings.

During the first year, your education will include a combination of classroom and clinical experiences designed to give you a strong background in basic sciences such as human anatomy, neuroanatomy, pathophysiology, and general orthopaedic and neurologic principles. You will also learn about the principles of assessment and be introduced to many of the therapeutic techniques used in rehabilitation evidence-based practice.

The second year of study will combine didactics with a clinical science approach. Some of your classroom time will be spent working in small, problem-solving groups. Each group will discuss cases typically seen by therapists in orthopaedics, neurology, pediatrics, geriatrics, etc., with an emphasis on evidence-based practice. You will learn how to evaluate clinical scenarios using appropriate examination tools and then will develop specific interventions using sound, evidence-based reasoning. This strategy is one method of helping you to integrate the knowledge you have gained and apply it to actual clinical situations.

Another method of integration will be through clinical affiliations of various lengths (six to twelve weeks). These will begin during the summer after completion of your first year of education. You will be given the opportunity to work in and experience the varied scope of practice assigned to physical therapists. In keeping with our mission, you will also have at least one clinical affiliation in a rural or underserved setting.

Your education is a process that builds on the previously learned information. Each segment is critical for guiding you into a profession that is rapidly changing and wide in scope. The first step in this process is to become thoroughly familiar with our program. The purpose of the UNLVPT Handbook is to introduce you to our mission and to inform you of what is expected of you as a student. There is also general information that will answer most of your questions about the program. Become familiar with the UNLVPT Handbook and keep it for your reference.

We are here to help you achieve the goal of becoming an effective, competent, and caring physical therapist. We hope that you will consider the staff and faculty as your partners in this effort and we hope you will feel free to come to us at any time with problems and suggestions.
**Student Responsibility for Handbook Information**

Each student is responsible for being familiar with the information contained in this handbook. Failure to read the information will not be considered an acceptable excuse for non-compliance. All students must read and sign the “Acknowledgment of Receipt.” This form must be returned to the Department administrative assistant prior to the end of your first week in the program. By signing this form, you are declaring that you have read and have been informed of the contents of the UNLVPT Handbook. UNLVPT reserves the right to change policies or revise curricula as necessary and will keep you informed of changes as they occur.

**Waiver of Regulations**

Rules and regulations in this Handbook have been adopted by the faculty and administration. When a student finds that extenuating circumstances might justify the waiver of a particular regulation, the student may petition the Chair of UNLVPT.

**Purpose**

The UNLVPT Handbook has been developed to serve as a guide for students. We hope that this Handbook will provide practical information that will facilitate the orientation process, and help the newly entering student to become familiar with the student learning outcomes and the procedures of UNLVPT. It also serves as a reference throughout the period of your UNLVPT enrollment.
University of Nevada, Las Vegas - Mission Statement

The University of Nevada, Las Vegas is a research institution committed to rigorous educational programs and the highest standards of a liberal education. We produce accomplished graduates who are well prepared to enter the work force or to continue their education in graduate and professional programs. Our faculty, students, and staff enthusiastically confront the challenges of economic and cultural diversification, urban growth, social justice, and sustainability. Our commitment to our dynamic region and State centrally influences our research and educational programs, which improves our local communities.

Our commitment to the national and international communities ensures that our research and educational programs engage both traditional and innovative areas of study and global concerns. UNLV’s distinctive identity and values permeate a unique institution that brings the best of the world to our region and, in turn, produces knowledge to improve the region and world around us.

UNLV is committed to and driven by these shared values that will guide our decision making:
- High expectations for student learning and success;
- Discovery through research, scholarship, and creative activity;
- Nurturing equity, diversity, and inclusiveness that promotes respect, support, and empowerment;
- Social, environmental, and economic sustainability;
- Strong, reciprocal, and interdependent relationships between UNLV and the region around us;
- An entrepreneurial, innovative, and unconventional spirit.

School of Allied Health Sciences - Mission Statement

The School of Allied Health Sciences (SAHS) primary mission is to provide quality professional instruction at the undergraduate and graduate levels; conduct basic and applied research; and perform public service related to the improvement of health care delivery.
UNLVPT - Mission Statement

The mission of UNLVPT is to enhance the health and quality of life of residents of Nevada and beyond by advancing the science and practice of physical therapy by:

- Engaging in and disseminating research to advance the science of rehabilitation;
- Developing competent and compassionate practitioners who are doctorally prepared to engage in critical thinking, life-long learning, evidence-based practice, and to provide inter-professional care; and,
- Modeling service to the community, including rural and underserved areas, that reflects the core values of UNLVPT.

Vision: The vision of UNLVPT is to provide excellent student-centered physical therapy education, growing the department, and being recognized nationally as a leader in PT research, education, and service.

Our core values:
- Student-centered education with faculty accessibility
- Professionalism (accountability, altruism, compassion/caring, excellence, integrity, professional duty, social responsibility)
- Respect for the dignity and diversity of all individuals
- Evidenced-based and outcomes driven practice
- Excellence in research, teaching, and service

Program Goals

The goals of UNLVPT are as follows:
1. To provide an environment in which the student may develop responsibility for professional behaviors as outlined in the APTA Code of Ethics (see Code of Ethics for the Physical Therapist) and the APTA Professional Behaviors (see Professional Behaviors).
2. To provide the educational experience necessary for students to be competent in evidenced-based physical therapist practice, to be excellent purveyors of the scientific literature, and to be committed to maintaining continued competence through life-long learning.
3. To create an appreciation for the physical therapist as an autonomous practitioner.
4. To develop students who exhibit sound reasoning skills allowing them to be efficient and effective in clinical decision making.
5. To develop students who have the necessary educational and clinical skills to practice in any physical therapy setting.
6. To create an educational experience wherein students gain an appreciation for practice in rural and underserved areas.
7. To provide an educational experience wherein students will develop the skills and the desire to give back to the profession through service, education and research.
Program Outcomes

Upon completion of the DPT degree, students should be prepared to:

1. Commit to and demonstrate the professional behaviors as outlined by the American Physical Therapy Association (APTA) (Goal 1)
2. Engage in the ethical practice of physical therapy reflecting the core values as outlined by the APTA and other key documents including Guide to Physical Therapist Practice, Standards of Practice, Code of Ethics, and Guide for Professional Conduct (Goal 1)
3. Achieve entry-level competence in all areas of clinical practice as measured by the Clinical Performance Instrument (Goals 1, 2, 3, 4, and 5)
4. Competently address all areas of physical therapy patient/client management including
   a. Examination
   b. Evaluation
   c. Diagnosis
   d. Prognosis
   e. Intervention
   f. Outcome measurement (Goals 1, 2, 4, and 5)
5. Facilitate patient progress toward improved outcomes across all levels of the International Classification of Functioning, Disability, and Health including
   a. Health conditions
   b. Body structure and function
   c. Activities
   d. Participation (Goals 1, 2, 4, and 5)
6. Assume professional roles including those in the areas of education, critical inquiry/research, administration, and consultation (Goals 1 and 7)
7. Engage in evidence-based practice based on sound, critical reasoning processes (Goal 2)
8. Become autonomous primary health care providers within the scope of physical therapy practice to include screening/systems review, differential diagnosis, referral, and teaming as appropriate (Goal 3)
9. Engage in physical therapy roles in prevention, and the promotion of health, wellness, and fitness (Goal 5 and 6)
10. Provide care to rural and underserved populations (Goal 6)

Faculty Goals

The goals of the UNLVPT faculty are:

1. To develop an educational model which fosters professional behavior.
2. To keep current with the evidence in physical therapy and to regularly update coursework so that it is consistent with current evidence.
3. To maintain the highest standard of physical therapy education by improving teaching skills and keeping coursework consistent with APTA educational standards.
4. To provide opportunities in the curriculum for students to improve critical thinking skills.
5. To advance physical therapy and healthcare through scientific research.
6. To enhance the profession of physical therapy and the community by engaging in service.
7. To provide support for rural and underserved populations by instituting programmatic policies and curricula that will improve the likelihood of graduates practicing in those settings.

**Faculty Outcomes**

UNLVPT faculty will:
1. Demonstrate professional behavior through membership and participation in the APTA and other professional organizations (Goal 1)
2. Model professional behavior and attitudes by maintaining a high standard of ethical behavior, speech, and professional dress (Goal 1)
3. Commit to attend at least one national conference per year and other continuing education experiences that are consistent with the courses they teach (Goal 2)
4. Regularly stay abreast of current trends in physical therapy and adjust coursework to be consistent with educational standards that have been adopted by the APTA and the Commission on Accreditation on Physical Therapy Education (CAPTE) (Goal 3)
5. Challenge student reasoning skills by using class discussion, challenging test questions, clinical scenarios, critical appraisals and mentored research projects (Goal 4)
6. Perform scholarly activities that enhance the field of physical therapy, including peer-reviewed publications, books, grants, and scientific presentations (Goal 5)
7. Demonstrate service and leadership by serving on local and national committees, and promoting physical therapy in the local community (Goal 6)
8. Encourage participation in serving rural and underserved areas by creating coursework that will enable graduates to handle the broad patient populations seen in rural and underserved areas (Goal 7)

**UNLVPT Educational Philosophy**

The faculty of UNLVPT believes learning to be a lifelong process that requires active participation of both the teacher and the student within an open and supportive learning environment. A wide range of teaching methodologies are utilized to meet the needs and objectives of the educational program.

The pre-requisite general education courses selected are those necessary to give the student a knowledge base in the areas of psychology, human biology, mathematics, and physical sciences. It is essential that physical therapists be open-minded, reflective
individuals who are able to critically analyze ideas, understand human nature, and who have broad interests.

Physical therapy is dedicated to the promotion of wellness, optimal human health and function, and prevention of disability for any age individual in any setting. We believe that individuals are entitled to high quality health care and that consumers should have a decision-making role in the utilization of health care services.

Due to constantly changing environments within the health care system, the physical therapist must be flexible and holistic in the approach to the delivery of health care. As a result, we believe that the curriculum should be designed to provide the student with opportunities to develop critical reasoning skills, clinical and research competence, professional values and behaviors, leadership skills, and effective communication skills in an effort to understand and function within the dynamic health care environment and to develop skills and strategies to be able evidence-based practitioners. In addition, we believe it is necessary to promote an understanding and acceptance of the diversity of individuals of various cultures, races, and religions.

The two major components of the professional education curriculum are academic and clinical experiences. We believe the two components should be planned and implemented to be interdependent and to reinforce one another. The academic setting is designed to provide the information and theory base that is integrated and expanded in the clinical setting. However, clinical competence will be verified in the classroom as well as in the clinical setting. Clinical components are integrated into various parts of the curriculum to allow students to utilize their knowledge and develop skills in a supervised situation.

We believe that a curriculum that utilizes a competency-based approach has been proven to be most effective when assessing a student’s performance level. To verify clinical competency, students will be required to successfully complete a series of “practical check-offs” throughout the curriculum. Competency-based performance ensures that learning experiences and evaluations are organized around the major clinical behaviors that must be exhibited by students at entry into the profession; integrated learning experiences throughout the curriculum enhances the acquisition, utilization, and retention of concepts and skills necessary for competent entry-level practice. The initial focus of the physical therapy curriculum is on normal human function in conjunction with theory-based information and the introduction of problem solving skills and critical thinking. As the curriculum advances, clinical reasoning using clinical scenarios is introduced; this encourages students to problem-solve and analyze patient cases that are more complex in terms of pathology and psychosocial issues. Repetition of key information, reinforcement of theory and hands-on practice, and the incorporation of a variety of teaching styles and methods of learning as a way of developing critical thinking and inquiry, are areas emphasized to promote full retention of material and attain proficiency in entry-level competencies. Development of coping strategies, appropriate oral and written communication skills, and understanding the roles of members of the health care team are also areas targeted to be integrated throughout the educational experience.
We believe it is the faculty’s responsibility to develop and use assessment tools appropriate for didactic and clinical education performance within the scope of practice for a physical therapist, to evaluate student performance consistently and fairly, and to provide feedback and guidance to the students regarding their performance. The onus of responsibility is placed on the students for their own learning through research and presentation. The students are also responsible for making choices and accepting the consequences of those choices.

**Accreditation**

UNLV is accredited by the Northwest Commission on Colleges and Universities ([http://www.nwccu.org](http://www.nwccu.org)), an institutional accrediting body recognized by the Secretary of the US Department of Education. UNLV is classified as Research University with high research activity (RU/H) according to the classification system used by the Carnegie Foundation ([http://classifications.carnegiefoundation.org](http://classifications.carnegiefoundation.org)). UNLVPT is currently accredited through the Commission on Accreditation in Physical Therapy Education (CAPTE: [http://www.capteonline.org](http://www.capteonline.org)) of the American Physical Therapy Association. The next accreditation site visit is scheduled during Spring 2015.

**Curriculum Overview**

The organization of curricular content has been designed around several clearly identified vertical themes that are expressed throughout the curriculum as a learning spiral, resulting in a solid integration of courses. Particular attention has been given to the horizontal integration of the curriculum as well, enhancing the student's assimilation of learning. Vertical integration refers to the increasing complexity of subject matter throughout the Program, whereas horizontal integration is defined as the thematic curricular organization within a given semester.

The commitment of UNLVPT is to provide students with an intellectual environment enabling them to procure skills necessary to become competent, autonomous, evidenced-based practitioners. Integral to this environment are fundamental objectives that form the basis of the curriculum.

*First*, professional education in physical therapy should include a strong emphasis on the foundational sciences, such as anatomy, pathophysiology, neurosciences, general orthopaedic principles, and the physical and behavioral sciences. UNLVPT students begin the curriculum with these foundational courses.

*Second*, physical therapy is a clinical science. Thus, students must learn a systematic approach to all elements of physical therapy patient/client management as outlined in the *Guide to Physical Therapist Practice*. These skills will need to be developed and must be explicitly integrated into the academic curriculum. Moreover, to obtain clinical
efficacy, students must be skilled in clinical reasoning based on critical analysis of the literature to guide them in their treatment approaches.

The specific objectives and desired outcomes of the educational process are assessed throughout the curriculum via practical examinations and are an integral part of the learning process. Expected levels of competency are defined at each stage of the curriculum by the faculty as well as self-assessment by the students. Curricular objectives are classified for purposes of testing as relating to (1) knowledge base (written exams), (2) clinical skills (practical exams), (3) clinical reasoning and analysis (written exams, practical exams, assignments, research projects), and (4) professional behavior (group interaction, written and oral communications, participation in class activities, and handling skills). After graduation, a pre-graduation program assessment survey is used to identify the effectiveness of the learning experience and serves as feedback to address any deficiencies of the program.

Third, the teaching of the science of physical therapy must be organized around the International Classification of Functioning, Disability, and Health Model of Enablement to include the concepts of health conditions, body functions and structures, activities and participation, and environmental factors.

Fourth, integrating didactics with clinical practice is a fundamental cornerstone of the curriculum and includes learning experiences throughout the curriculum to enhance acquisition, utilization, and retention of concepts and skills necessary for entry-level practice. This is achieved, in part, via use of a clinical science-based educational model. Implemented in the second year, students will work in small groups, whereby they are given clinical problems carefully designed to assist them in meeting unit objectives. Clinical reasoning and critical analysis in physical therapy are high-level skills that are best learned in a self-directed, student-centered framework. Clinical science-based learning provides this framework by enabling students to integrate basic and clinical science, clinical reasoning, and critical analysis for a particular clinical problem.

Clinical education needs to be integrated with the academic curriculum; performance of students in their clinical affiliations will be evaluated and used to modify the curriculum. Students will also assess the strengths and weaknesses of the clinical sites.

Fifth, as part of our mission statement, the unique needs of frontier, underserved, and rural populations are addressed. Emphasis in this curriculum is placed on serving the rural and underserved areas of the state. Students learn the diverse nature of rural physical therapy via placement in at least one rural or underserved clinical affiliation. The importance of networking with other disciplines, functional rehabilitation, time management, travel considerations, dealing with life threatening emergencies on the frontier, and involvement of family members in intervention planning are all goals identified in this experience.

Sixth, it is important to realize the necessity of research to validate the profession of physical therapy. Research concepts need to be integrated for the development of
critical thinking skills, thus endowing students with the ability to research and organize relevant information. Students are then given the opportunity to develop and research a scientific question, perform a literature review, or aid a faculty member or area clinician through participation in new or on-going research projects. Students are also taught to critically evaluate published research.

Seventh, professional behavior is expected from all students. Specific behaviors have been delineated and are emphasized during interaction with other students, faculty, and clinicians. Inconsistencies in students’ behaviors with the professional behaviors as outlined will be brought to the students’ attention in an effort to make them cognizant of potential problems that may be encountered in a professional environment.

Eighth, the clinical practice of physical therapy should reflect the art as well as the science of our profession. This includes respect for differences related to age, gender, sexuality, culture, ethnicity, race, and religion. This is achieved in part by tailoring our communication and treatment design for each patient and his/her family.

Furthermore, as a final culminating experience, the students must prepare and orally defend a research project. As a whole, these learning experiences will be the cornerstone that will produce competent, autonomous practitioners.

**UNLVPT Core Faculty**

Merrill R. Landers, PT, DPT, PhD, OCS, Chair  
Sue Schuerman, PT, PhD, MBA, GCS, Director of Clinical Education  
Daniel Young, PT, DPT, PhD  
Robbin Hickman, PT, DSc, PCS  
Emilio “Louie” Puentedura, PT, DPT, PhD, OCS, FAAOMPT, Graduate Coordinator  
Szu-Ping Lee, BSPT, PhD  
Catherine “Cassy” Turner, PT, DPT, OCS  
Kai-Yu Ho, PT, MSPT, PhD  
Carrie Gillis, PT, DPT, Administrative Faculty

**Doctor of Physical Therapy Degree Curriculum:**

**SUMMER SEMESTER 1st YEAR (BOTH SESSIONS)**

- DPT 744 Gross Human Anatomy I - 2 credits  
- DPT 744L Gross Human Anatomy I Lab - 1 credit  
- DPT 745 Gross Human Anatomy II - 2 credits  
- DPT 745L Gross Human Anatomy II Lab - 1 credit  
- DPT 726 Evidence-Based Clinical Practice I - 1 credit  
- DPT 727 Evidence-Based Clinical Practice II - 1 credit  

Total Semesters Credit Hours: 8
FALL SEMESTER 1st YEAR
- DPT 730 Foundations of Observation and Assessment - 2 credits
- DPT 730L Foundations of Observation and Assessment Lab - 2 credits
- DPT 742 Clinical and Pathological Physiology - 5 credits
- DPT 746 Neuroanatomy - 3 credits
- DPT 746L Neuroanatomy Lab - 1 credit
- DPT 741 Orthopaedic Principles - 3 credits
- DPT 749 Applied Exercise Physiology - 2 credits
- DPT 749L Applied Exercise Physiology Lab - 1 credit
Total Semester Credit Hours: 19

SPRING SEMESTER 1st YEAR
- DPT 754 Orthopaedic Assessment in Physical Therapy - 3 credits
- DPT 754L Orthopaedic Assessment in Physical Therapy Lab - 1 credit
- DPT 732 Therapeutic Exercise - 2 credits
- DPT 732L Therapeutic Exercise Lab - 1 credit
- DPT 748 Pharmacology in Physical Therapy - 2 credits
- DPT 756 Neurophysiology - 4 credits
- DPT 790 Clinical Research in Physical Therapy - 3 credits
- DPT 735 Functional Training and Acute Care - 4 credits
- DPT 735L Functional Training and Acute Care Lab - 1 credit
Total Semester Credit Hours: 21

SUMMER SEMESTER 2nd YEAR (BOTH SESSIONS)
- DPT 752 Physical Agents and Electrophysiology - 2 credits
- DPT 752 Physical Agents and Electrophysiology Lab - 1 credit
- DPT 740 Movement Science - 2 credits
- DPT 761 Supervised Clinical Education I - 3 credits
Total Semesters Credit Hours: 8

FALL SEMESTER 2nd YEAR
- DPT 720 Professional Development - 2 credits
- DPT 770 Cardiopulmonary Rehabilitation - 1 credit
- DPT 770L Cardiopulmonary Rehabilitation Lab - 1 credit
- DPT 785 Orthopaedic Rehabilitation - 2 credits
- DPT 785L Orthopaedic Rehabilitation Lab - 1 credit
- DPT 786 Neurological Rehabilitation - 3 credits
- DPT 786L Neurological Rehabilitation Lab - 1 credit
- DPT 791 Applied Research Statistics - 3 credits
- DPT 757 Wound Care - 2 credits
Total Semester Credit Hours: 16

SPRING SEMESTER 2nd YEAR
- DPT 755 Pediatric Rehabilitation - 2 credits
- DPT 755L Pediatric Rehabilitation Lab - 1 credit
- DPT 747 Geriatric Examination and Intervention - 1 credit
- DPT 750 Prosthetics and Orthotics - 2 credits
- DPT 750L Prosthetics and Orthotics Lab - 1 credit
- DPT 788 Spine Examination and Intervention - 2 credits
- DPT 788L Spine Examination and Intervention Lab - 1 credit
- DPT 758 Diagnostic Testing and Imaging - 2 credits
- DPT 793 Seminar - 1 credit
- DPT 780 Balance and Vestibular Rehabilitation - 2 credits

Total Semester Credit Hours: 15

SUMMER SEMESTER 3rd YEAR (Both Sessions)
- DPT 772 Physical Therapy Administration - 2 credits
- DPT 774 Psychosocial Aspects of Physical Therapy - 2 credits
- DPT 751 Women’s Health in Physical Therapy - 2 credits

Total Semesters Credit Hours: 6

FALL SEMESTER 3rd YEAR
- DPT 762 Supervised Clinical Education II - 5 credits
- DPT 763 Supervised Clinical Education III - 5 credits

Total Semester Credit Hours: 10

SPRING SEMESTER 3rd YEAR
- DPT 764 Supervised Clinical Education IV - 6 credits
- DPT 798 Directed Research - 3 credits

Total Semester Credit Hours: 9

Total Curriculum Credit Hours: 112

Course Descriptions

DPT 720 Professional Development (2 Credits)
Theories and experiences designed to develop skills to accurately, sensitively and assertively communicate with patients, families, and colleagues. Principles of written and oral communication. Professional issues of changes in health care, state and local laws, standards of practice, code of ethics, quality assessment and quality assurance.

DPT 726 Evidenced-Based Practice in Physical Therapy I (1 Credit)
Designed to provide the student with knowledge and hands-on experience in skills required to engage evidence-based clinical practice of physical therapy. Students will learn how to write answerable questions, search the literature, and critically analyze evidence for application in clinical practice.

DPT 727 Evidenced-Based Practice in Physical Therapy II (1 Credit)
This 1-credit course builds on DPT 726 and 790, providing students with knowledge skills to implement evidence-based practice in physical therapy. Students will critique special cases of evidence and psychometric properties of diagnostic tools and outcome measures, and create a minimal data set in order to integrate evidence into practice. Prerequisite: DPT 726.
DPT 730 Foundations of Observation and Assessment (2 Credits)
Basic patient assessment skills with an introduction to posture and gait evaluation through observation. Patient history and review of the medical record. Documentation in S.O.A.P note and functional outcome formats. Assessment skills emphasized include: anthropometric measures, reflex and sensation testing, goniometry, manual muscle testing, vital signs, and surface palpation. Prerequisites: Graduate standing in PT.

DPT 730L Foundations of Observation and Assessment Lab (2 Credits)
Lab of basic patient assessment skills including posture, gait evaluation, anthropometric measures, reflex and sensation testing, goniometry, manual muscle testing, vital signs, and surface palpation. Patient history and review of medical records, documentation in SOAP format, and functional outcome formats. Co-requisite: DPT 730.

DPT 732 Therapeutic Exercise and Functional Training (2 Credits)
Holistic approach to evaluation and management of patients with various orthopaedic pathologies and other related movement dysfunction. Emphasis placed on theoretical basis of specific exercise physiology, therapeutic exercise and functional training skills interrelated with clinical decision-making methodology. Rationale for and implementation of treatments with safety awareness and proper body mechanics. Prerequisites: Graduate standing in PT.

DPT 732L Therapeutic Exercise and Functional Training Lab (1 Credit)
Laboratory sessions to practice the evaluation and management of patients (and patient scenarios) with various orthopaedic pathologies and other related movement dysfunctions. Emphasis on exercise prescription and demonstration, as well as progression. Prerequisites: Graduate standing in PT.

DPT 735 Functional Training and Acute Care (4 Credits)
Performance and application of positioning skills, transfers techniques, and assistive devices. Advancement to clinical decision-making skills and incorporation of learned materials into therapy interventions. Clinical reasoning and critical analysis skills in assessment, treatment design and intervention, goal development and discharge planning for patients in the acute hospital environment. Co-requisites: DPT 744, DPT 745, DPT 730.

DPT 735L Functional Training and Acute Care Lab (1 Credit)
Hands-on performance and application of positioning skills, transfers techniques, and assistive devices. Advancement to clinical decision-making skills and incorporation of learned materials into therapy interventions. Clinical reasoning skills in assessment, treatment design and intervention, goal development and discharge planning for patients in the acute hospital environment. Prerequisites: DPT 735.

DPT 740 Movement Science (2 credits)
This course will introduce students to principles and theories in movement science. Students will be introduced to concepts related to motor control, motor development,
and motor learning. Students will also apply these principles to the clinical practice of physical therapy and to observe and assess related phenomena in patients.

**DPT 741 Orthopaedic Principles (3 Credits)**
Principles of orthopaedic physical therapy including biomechanics, applied anatomy, and osteokinematic and arthrokinematic concepts examined. Musculoskeletal system investigated from histological, structural, and functional perspectives. Prerequisite: Graduate standing in PT.

**DPT 742 Clinical and Pathological Physiology (5 Credits)**
Fundamentals of physiology and pathology related to diseases causing abnormal movement patterns or capabilities. Processes and diseases most frequently encountered in physical therapy practice emphasized. Prerequisites: Graduate standing in PT.

**DPT 744 Gross Human Anatomy I (2 Credits)**
Study of gross human anatomy as it applies to physical therapy. Materials to be covered include: muscle, tendon, ligament and nerve innervation of the trunk and upper extremity, structural identification and function of the spine, heart, lungs, abdominopelvic organs, circulatory and sensory systems. Prerequisites: Graduate standing in PT.

**DPT 744L Gross Human Anatomy I Lab (1 Credit)**
Gross human anatomy cadaver lab with supervised dissection and exploration of muscle, tendon, ligament and nerve innervation of the trunk and upper extremity, structural identification and function of the spine, heart, lungs, abdominopelvic organs, circulatory and sensory systems. Co-requisites: DPT 744.

**DPT 745 Gross Human Anatomy II (2 Credits)**
Study of gross human anatomy as it applies to physical therapy. Materials to be covered include: muscle, tendon, ligament and nerve innervation of the head, neck, and lower extremity, structural identification and function of the corresponding circulatory and sensory systems. Prerequisites: Graduate standing in PT.

**DPT 745L Gross Human Anatomy II Lab (1 Credit)**
Gross human anatomy cadaver lab with supervised dissection and exploration of muscle, tendon, ligament and nerve innervation of the head, neck, and lower extremity, structural identification and function of the corresponding circulatory and sensory systems. Co-requisites: DPT 745.

**DPT 746 Neuroanatomy (3 Credits)**
High level immersion into the anatomy of the nervous system, emphasizing structure and functional relationships. Coursework will also relate the structural relationships of the central and peripheral nervous systems to brain dysfunction and pathology. Prerequisites: Graduate standing in PT.
DPT 746L Neuroanatomy Lab (1 Credit)
Human cadaveric dissection of the central nervous system through a series of weekly laboratory experiences with an emphasis on its three-dimensional structure. Co-requisites: DPT 746.

DPT 747 Geriatric Examination and Intervention (1 Credit)
Examination, evaluation, plan of intervention, outcomes, patient education, and health promotion as applied to the geriatric client. Issues include factors affecting normal aging, pathological aging, common pathologies associated with aging, quality of life, successful aging, care settings, reimbursement, and public policy. Prerequisites: Graduate standing in PT.

DPT 748 Pharmacology in Physical Therapy (2 Credits)
Actions and effects of pharmaceutical agents commonly encountered in the physical therapy clinical practice. Prerequisites: Graduate standing in PT.

DPT 749 Applied Exercise Physiology (2 Credits)
Review of systems responsible for the generation of energy. Overview of the physiologic responses of the human body to acute bouts of exercise and how training leads to chronic adaptation of selected systems. Course content focuses on principles of exercise, role of nutrients in body metabolism, human development and performances. Prerequisites: Graduate standing in PT.

DPT 749L Applied Exercise Physiology Lab (1 Credit)
Laboratory and active learning experiences to include major components of physical fitness such as aerobic fitness; muscular strength, power, and endurance; fatigue thresholds; body composition and body build; and flexibility. Co-requisites: DPT 749

DPT 750 Prosthetics and Orthotics (2 Credits)
Evaluation of medical, surgical and prosthetic and rehabilitation management of amputations. Discussion of design, fabrication and fitting of prosthetic devices as well as general orthotic principles examined. Basic clinical problem solving skills integrated in the context of prosthetic and orthotic management of patients. Prerequisites: DPT 730, DPT 741, and DPT 732. Prerequisites: Graduate standing in PT, DPT730, DPT741, and DPT732.

DPT 750L Prosthetics and Orthotics Lab (1 Credit)
Application of medical, surgical and prosthetic and rehabilitation management of amputations. Design, fabrication and fitting of prosthetic devices as well as general orthotic principles examined. Basic clinical problem solving skills are integrated in the context of prosthetic and orthotic management of patients. Prerequisites: Graduate standing in PT.

DPT 751 Women’s Health in Physical Therapy (2 Credits)
Overview of the anatomical, physiological, nutritional, psychological, and sociological influences throughout the woman’s life span including: adolescence, the reproductive years, the middle years, and older age. Discussion of physical therapy management of
musculoskeletal, integumentary, cardiopulmonary, and visceral pathologies common to women. Prerequisites: Graduate standing in PT.

DPT 752 Physical Agents and Electrophysiology (2 Credits)
Biological processes of injury and repair, clinical application of soft tissue techniques, thermal agents, intermittent compression, continuous motion, and mechanical traction. Advancement to clinical decision-making skills and incorporation of physical agents in physical application. Prerequisites: DPT 742.

DPT 752L Physical Agents and Electrophysiology Lab (1 Credit)
Hands on performance and clinical application of soft tissue techniques, thermal agents, intermittent compression, continuous motion, electrical stimulation, mechanical traction, therapeutic electrical stimulation. Prerequisites: DPT 752.

DPT 753 Electrotherapy (2 Credits)
Principles of electrophysics and neurophysiology as they pertain to the use of therapeutic electrical stimulation. Application techniques of various electrical stimulation devices are also presented. Prerequisites: DPT 742, DPT 752, DPT 730, DPT 732. This course is currently not being taught.

DPT 754 Orthopaedic Assessment in Physical Therapy (3 Credits)
Evaluation and assessment of upper and lower extremity orthopaedic problems. Functional anatomy, biomechanics, and evaluative manual therapy skills used to functionally diagnose orthopaedic pathologies and disorders. Prerequisites: DPT 730, DPT 741, DPT 744, and DPT 745.

DPT 754L Orthopaedic Assessment in Physical Therapy Lab (1 Credit)
Evaluation and assessment of upper and lower extremity orthopaedic problems. Practical application of functional anatomy, biomechanics, and evaluative manual therapy skills used to differentially diagnose orthopaedic pathologies and disorders. Prerequisites: DPT 730, DPT 741, DPT 744, and DPT 745.

DPT 759 Pediatric Rehabilitation (2 Credits)
This course provides foundational knowledge of development (typical and atypical) and an overview of pediatric physical therapy practice for children with atypical development. Presents examination, evaluation, and development of physical therapy plans of care for children with various disabilities within the frameworks of family-centered care and disablement/enablement models. Prerequisites: Graduate standing in PT.

DPT 759L Pediatric Rehabilitation Lab (1 Credit)
This course focuses on application of developmental concepts and an overview of pediatric physical therapy practice for children with atypical development. Provides students with opportunities to observe/engage in examination, evaluation, and development of physical therapy plans of care for children with various disabilities within the frameworks of family-centered care and enablement models. Prerequisites: Graduate standing in PT.
DPT 756 Neurophysiology (4 Credits)
High level immersion into the function of the human central and peripheral nervous systems based on current research and theory. Topics will include normal human motor and sensory neurophysiology, cognitive and learning neurophysiology, neuropathophysiology, neuroplasticity, neurodiagnostics and neurologic treatment options. Prerequisites: DPT 746.

DPT 757 Wound Care (2 Credits)
Clinical practice of wound care including physiology of tissue healing, wound assessment tools, dressings and treatment approaches. Processes and diseases most frequently encountered in physical therapy practice specializing in wound care. Prerequisites: DPT 742, DPT 752.

DPT 758 Diagnostic Testing and Imaging (2 Credits)
Presentation of diagnostic tests used by disciplines and specialties within and outside of the profession of physical therapy. Discussion of blood studies, nuclear medicine studies, and radiologic/X-ray studies. Interpretation of test results as it applies to physical therapy evaluation, intervention planning and treatment. Prerequisites: Graduate standing in PT.

DPT 761 Supervised Clinical Education I (3 Credits)
The first clinical affiliation is a supervised full time extended clinical learning experience 6 weeks in duration. The primary purpose is to provide students with the opportunity to actively engage in experiential learning in order to develop introductory clinical competence in the delivery of services to persons with movement dysfunction. Prerequisites: Graduate standing in PT.

DPT 762 Supervised Clinical Education II (5 Credits)
The second clinical affiliation is a supervised, full time extended clinical learning experience 11 weeks in duration. The primary purpose is to provide students with the opportunity to actively engage in experiential learning in order to advance clinical competence in the delivery of services to persons with movement dysfunction. Prerequisites: DPT 761.

DPT 763 Supervised Clinical Education III (5 Credits)
The third clinical affiliation is 10 ½ weeks and is a supervised full time extended clinical learning experience. The primary purpose is to provide students with the opportunity to actively engage in experiential learning in order to advance clinical competence in the delivery of services to persons with movement dysfunction. Prerequisites: DPT 762.

DPT 764 Supervised Clinical Education IV (6 Credits)
The fourth clinical affiliation is 12 weeks and is a supervised full time extended clinical learning experience. The primary purpose is to provide students with the opportunity to actively engage in experiential learning in order to advance clinical competence in the delivery of services to persons with movement dysfunction. Prerequisites: DPT 763.
DPT 770 Cardiopulmonary Rehabilitation (1 Credit)
Evaluation and treatment of patients with acute and chronic cardiopulmonary disease and dysfunction. Emphasis is placed on regulation of cardiac, circulatory and pulmonary functions at rest and the responses of these systems to differing modes, intensities, and durations. Prerequisites: Graduate standing in PT.

DPT 770L Cardiopulmonary Rehabilitation Lab (1 Credit)
Lab of basic patient skills including assessment of vital signs, breathing patterns, heart sounds, ECG interpretation, pulmonary function testing, blood gases, chest wall mobility, cough and sputum, ventilation, performance of bronchial drainage, prescribe exercises for patient with compromised cardiopulmonary function. Co-requisites: DPT 770.

DPT 772 Physical Therapy Administration (2 Credits)
General principles of organization and administration that impact the ethical and legal aspects of physical therapy practice. Topics such as budget development, cost accounting, supervision, communication skills, evaluative techniques, and methods of management and quality assurance.. Prerequisites: Graduate standing in PT.

DPT 774 Psychosocial Aspects of Physical Therapy (2 Credits)
Social and psychological issues, which arise during illness will be examined and discussed in an open class discussion format. Emphasis will be placed on self-awareness as well as awareness of others with respect to cultural differences, religious beliefs, addictions, and coping strategies during stress. Prerequisites: Graduate standing in PT.

DPT 780 Balance and Vestibular Rehabilitation (2 Credits)
This course will introduce students to principles and theories of rehabilitation for the patient with balance dysfunction. There will be emphasis on sound clinical reasoning and assessment of balance impairment and disability. Students will be exposed to theoretical applications of different treatment modalities in balance and vestibular rehabilitation.

DPT 785 Orthopaedic Rehabilitation (2 Credits)
Manual therapy and therapeutic exercise techniques for the extremities with emphasis on integrating these techniques into treatment regimes for specific orthopaedic pathologies/disorders. Includes pathogenesis, clinical presentation, medical/surgical management and rehabilitation. Review, integrate, and enhance knowledge from previous course work as it pertains to appropriate entry-level application. Prerequisites: DPT 732, DPT 741, DPT 754.

DPT 785L Orthopaedic Rehabilitation Lab (1 Credit)
Orthopaedic Rehabilitation lab with supervised integration of manual therapy and therapeutic exercise techniques for the extremities. Focus will be on developing and providing treatment regimes for specific orthopaedic pathologies/disorders. Students will refine skills from previous course work as it pertains to appropriate entry-level application. Co-requisite: DPT 785
DPT 786 Neurological Rehabilitation (3 Credits)
This course fosters clinical reasoning and critical analysis skills across elements of patient client management for individuals with neurologically-based movement disorders. Students are exposed to theory and movement science as related to clinical reasoning. Students are expected to incorporate professional behavior, scientific and clinical knowledge and critical analysis to clinical applications. Prerequisites: DPT 744, DPT 745, DPT 746, DPT 756, DPT 732, DPT 730.

DPT 786L Neurological Rehabilitation Lab (1 Credit)
Course emphasizes hands-on skill development, clinical reasoning, and critical analysis skills for all elements of patient client management for individuals with neurologically-based movement disorders across the lifespan. Students are expected to incorporate professional behavior, scientific and clinical knowledge, critical analysis and competent skill performance in laboratory and practical skill application. Co-requisites: DPT 786.

DPT 788 Spine Examination and Treatment (2 Credits)
Review of spine examination including biomechanics, observation, range of motion, muscle synergy, muscle strength, joint play and special tests. Inclusion of examination schema and differential diagnosis of commonly seen spine pathology. Emphasis on hands-on examination, assessment, and treatment including manual therapy, spinal mobilization and spinal manipulation skills.
Prerequisites: Graduate standing in PT.

DPT 788L Spine Examination and Treatment Lab (1 Credit)
Lab sessions focusing on hands-on examination, assessment, and treatment of spine dysfunction, including manual therapy, spinal mobilization and spinal manipulation skills. Co-requisites: DPT 788.

DPT 790 Clinical Research in Physical Therapy (3 Credits)
Introduction to principles and concepts of clinical research in physical therapy. Covers development of the research question, measurement issues, statistical analysis, literature review, and writing of results. Prerequisites: Graduate standing in PT.

DPT 791 Applied Research Statistics (3 Credits)
Review of foundations of research design and concepts of measurement in clinical study. Emphasis will be placed on hands-on data analysis and interpretation of clinically relevant research statistical methods including descriptive statistics, statistical inferences, analysis of differences, and analysis of relationships. Prerequisites: Graduate standing in PT.

DPT 793 Seminar (1 credit)
Preparation and presentation of seminars on topics of current interest in physical therapy and rehabilitation. Topic changes by semester and by course instructor; see class schedule for details.
DPT 795 Independent Study (1-3 Credits)
Course allows students to pursue a topic related to physical therapy beyond that covered in the curriculum. Satisfactory completion will be accomplished through individualized, self-directed study. Topics based on student preferences and faculty approval. May be repeated for a maximum of six credits. Prerequisites: Graduate standing in PT.

DPT 798 Directed Research (1-6 Credits)
Critical inquiry by participating in new or ongoing research with faculty who serve as project advisors. Students summarize research by a written report and present each project orally to the faculty and area clinicians. May be repeated to a maximum of six credits. Prerequisites: DPT 790.

Scholarly Project

One of the most important components of a graduate education is the final scholarly project, which must be completed to meet the requirements of the DPT degree. The process followed in developing the final product demonstrates the student’s reasoning, creative ability, critical thinking and written communication skills. Scholarly projects must meet acceptable standards of scientific inquiry as determined by the faculty of UNLVPT. The faculty expects students to be engaged and active participants in all aspects of the scholarly projects. The final project is intended to provide a learning opportunity for students that will contribute to the rehabilitation body of knowledge.

Each student must satisfy a scholarly project requirement. This requirement can be met in one of three ways: students may undergo a research project, complete a professional paper (i.e., meta-analysis or systematic review), or complete a case study of a unique presentation or novel physical therapy treatment. The project should demonstrate the student’s ability to design research questions and hypotheses, to identify appropriate tests and measures, to implement a research design, to collect and analyze data, and to report results in a scholarly paper, disseminate results via a professional presentation, and be able to answer questions related to the methods, conduct, or results of the project. Before beginning a research project, students must have their project, paper, or case study approved by the UNLVPT faculty and their advisor. Faculty project choices will be presented during the first couple of weeks of Spring Semester in the students first year. The final project will be presented in a formal presentation defense format during the students’ final semester as part of DPT 798. The final document will be sent to the Graduate College for publication within the University library system.

UNLVPT Student Policies and Procedures

Academic Dishonesty
Academic integrity and ethical behavior are cornerstones of a high quality educational environment and the Department of Physical Therapy fully embraces the University
Student Academic Misconduct of accepting no form of academic dishonesty (http://www.unlv.edu/studentconduct/misconduct/policy). In accordance with this policy, UNLVPT has adopted a “zero tolerance policy” for any acts of cheating, plagiarism, or other forms of academic dishonesty/misconduct. Under this policy, any student found to have committed such an act will be brought before the Academic Review Committee. If the student is found to be guilty of an act that violates our academic standards of performance, a grade of “F” will automatically be given for the course in which the act was discovered and the student will be subsequently separated from UNLVPT. The student must sign the attached statement as to their understanding of this policy.

UNLVPT has also adopted the following policies:

- As professional behavior is an important part of physical therapy education, misrepresentation to the department in any form will be considered an academic issue.
- Students must always submit their own work unless the professor has given permission to do otherwise.

**Academic Review Committee**

The Academic Review Committee (ARC) consists of at least three UNLVPT faculty members who oversee academic and professional behavior issues for students in the Physical Therapy Program. Their role is to ultimately determine if any disciplinary action is warranted and make recommendations concerning such action to the UNLVPT Chair. Additionally, they will meet on an as needed basis in an advisory role when a student action is referred to the Committee. Disciplinary actions referred to the ARC are confidential and will proceed in the following manner:

- Any breach of professional behavior will be immediately addressed by the instructor or CI in charge.
- The ARC Chair will be informed of the incident, who will then forward the information to the student's advisor as appropriate.
- The incident will be documented and placed in the student’s file.
- Depending on the situation, either the student's advisor or the ARC will arrange for formal advisement with the student.
- If a situation warrants ARC involvement, the Chair of the ARC will send a letter to the student stating the time and place of the meeting.
- The ARC and the student will develop an action plan to resolve the problem. The action plan will be written and signed by the ARC members and the student.
- If a student has already been notified by the ARC for previous academic, clinical, or professional behavior issues (i.e., warning or probation), the ARC may directly handle new problems concerning the student.
- If the student does not follow through with the action plan, the ARC will meet again with the student.
- The Committee’s recommendations for probation, separation from the program or other disciplinary actions will be forwarded to the UNLVPT Chair.
- The Chair, along with input from the Graduate College Dean, will make the final decision regarding probation, program separation, or disciplinary actions and notify the student of the decision.
Administrative assistants
Administrative assistants are not allowed to:
- Give personal information concerning students.
- Give students their grades.
- Type, copy or fax information for students.
- Take personal messages for students.
- In case of an emergency, administrative assistants may deliver a message to the student.

Admissions
Admission to UNLVPT is without regard or discrimination on the basis of race, religion, national origin, sex, age, marital status, or status with regard to public assistance or disability. Students are informed that becoming a physical therapist requires the completion of an education program which is intellectually as well as physically challenging, that the candidate should be able to perform in a reasonably independent manner, and that reasonable accommodation does not mean that students with disabilities are exempt from certain tasks inherent to the profession of physical therapist (see Essential Tasks section). Admission procedures and requirements to the Department of Physical Therapy are clearly outlined on the Admissions webpage (http://www.unlv.edu/pt/admissions).

Advisement of Students
Students are required to meet with their advisors just after midterm of each semester to discuss student progress, portfolio review, and status within the program. In addition to required meetings, students may request a meeting with their advisor at any point during their UNLVPT enrollment as need arises.

Academic grades will be calculated at mid-term each semester and will be provided to the faculty advisors who will in turn meet with their students to discuss progress and performance. The advisor will be responsible for reporting any mid-term grade falling below a “B-“ to the Chair of the ARC. If any action is deemed necessary the Chair of the ARC will convene a meeting with the student.

Class Attendance
Students are required to attend all classes at the scheduled times. It is the student’s responsibility to notify the professor prior to class if an unavoidable absence should occur. A student is considered unexcused if they do not notify the instructor prior to the assigned time, although notification in and of itself does not make it an excused absence. Accumulated absences may result in probation or separation from the program.

Students are considered tardy if arriving for class after the scheduled starting time. If the student anticipates being late, they must notify the instructor or departmental secretary prior to class. It is up to the professor's discretion whether or not notification of absence or tardiness will guarantee an excuse. Excessive tardiness may result in
probation or program separation. Students with a total of three absences and/or tardies in one semester will be sent a warning letter from the ARC. If there is any tardy or absence thereafter then the ARC will convene a meeting with the student.

**Classroom Policies**
Since the average minimum length of most classes exceeds two hours, adequate breaks will be given at the discretion of the instructor. Food and drinks are allowed in class but students are responsible for cleaning up their seating area. No pets will be allowed in classrooms or labs. No classes may be audited by those not admitted to the UNLVPT program without consent of the instructor. Physical therapy students wishing to audit a class or bring a visitor should also gain permission from the instructor. Students are expected to keep their immediate workspace clean.

Physical Therapy Students have access to classrooms BHS 213, 214, and 216 with their Marlok cards. Students may study in these rooms when they are not otherwise in use. All students are responsible for upkeep of all classroom/laboratory areas. No food or drink is to be left in any BHS laboratory or lecture rooms.

**Cell Phones and Electronic Media**
Students are not allowed to use cell phones during any class period, including all lecture and lab sessions. All cell phones must be in the “off” position and therefore no text messaging, emailing or other cell phone functions are allowed. When students are on breaks, cell phones may be used. Students are required to purchase an iPad for use in class for note taking, testing, and other classroom activities. Faculty will no longer be providing paper notes for class; however, faculty will provide electronic notes to the students on the day of class. If students would like to have paper notes, they may print them out at their own expense. UNLVPT will provide a scholarship to all students in the amount of a basic iPad excluding taxes ($600) at the beginning of the program. Students are welcome to upgrade their devices but must do at their own expense. These iPads belong to the students and will subsequently not be serviced or replaced by UNLVPT or UNLV. It is the students’ responsibility to bring them to class and to maintain sufficient battery charge. If a student neglects to bring their iPad to class and there is an assignment or test that requires its use, then the student will be docked 10% off the overall grade of the assignment. As faculty will be providing educational experiences that are compatible with iPad software, students who choose to use an alternative electronic device will be held to the same standards and penalties (i.e., 10% off overall score) if assignments/quizzes/tests cannot be accessed or completed appropriately. UNLVPT will not be responsible for a lost, damaged, or stolen iPad.

**Clinical Competencies**
UNLVPT will utilize competency check-offs in most courses where clinical skills are taught. The purpose is to ensure that the student is able to demonstrate all required clinical skills safely, accurately, and professionally. Many of the check-offs are graded using a rubric and some are graded on a pass/fail basis. In general, to pass on either the rubric or pass/fail methods, a student must perform all skills tested according to entry-level clinical performance standards based on the Clinical Performance Instrument Guidelines.
A *pass* constitutes entry-level clinical competency for that skill. A *fail* constitutes lack of clinical competency, which is below a 73% in any skill criterion. Failure in any one criterion will constitute a fail for the entire check-off. Failure will also result if there is any breach of professional behavior or safety. Each student will be given 3 opportunities to pass each individual check-off. The initial check-off will be scheduled as per instructions in the course syllabi. If the student fails, they will have 2 additional opportunities to pass during the course of the semester. All check-offs must be completed and passed prior to the final practical exam or the student will not be allowed to take it.

The first re-take must be attempted within 2 weeks of the initial check-off. It is the student’s responsibility to schedule this re-take with the instructor. If the first re-take is failed, the student will be allowed one additional re-take, which must be scheduled no later than one week prior to the final practical exam.

Each instructor will grade students on each performance criterion using their professional judgment in regards to the following areas: quality of care, supervision/guidance required (verbal cueing), accuracy/consistency of performance, complexity of task/environment, and efficiency of performance.

Consistent with course policy, if the student does not pass in 3 attempts, a failure in the course will result, regardless of the grade in the course prior to the third failed check-off. No retakes will be given for the final practical exam, which, in some cases, may also be pass/fail and may not be graded. In the case of pass/fail, failure of the final practical exam will result in failure of the course, regardless of the current grade.

**Consensual Relationships**

The University of Nevada, Las Vegas’ mission is to promote the personal and academic development of students. This mission is promoted by professionalism in relationships between members of the university community. It is the university's goal to create an environment conducive to learning where students, faculty, and staff trust and respect one another.

The University of Nevada, Las Vegas prohibits romantic or sexual relationships between members of the university community when one of the individuals involved has direct professional influence or direct authority over the other. In that circumstance, both the university and the person in the position of influence are vulnerable to charges of sexual harassment from the person in the position of lesser power and/or by third parties.

Consensual relationships existing between individuals, neither of whom has direct professional influence or authority over the other, are not prohibited by this policy. A member of the university community is considered to have direct professional power or direct authority over another individual when he or she is in the position to do any of the following:
- Supervise a student in any capacity, including evaluating any academic work, assigning grades, academic advising, formal psychological counseling, or serving on thesis, dissertation, or scholarship committees;
- Influence a student's employment, graduate assistantship, housing, participation in athletics, or any other university activity;
- Supervise and/or evaluate the work performance of a member of the faculty or professional or classified staff;
- Recommend or award merit or promotions to a member of the faculty or professional or classified staff;
- Serve on promotion or tenure committees.

When a romantic or sexual relationship exists, both parties involved may be subject to disciplinary action. Both parties are equally responsible for reporting the existence of the relationship to the appropriate supervisor at the beginning of the relationship. A self-report will be kept confidential by the supervisor unless university policy requires him/her to divulge it.

Once the university administration learns of a romantic or sexual relationship, whether through self-reporting or otherwise, it will take immediate steps to eliminate the power and authority of the one individual over the other. This may be accomplished by reassigning duties or responsibilities or requiring withdrawal from a committee. If the individuals involved fail to comply with this policy, or if the relationship is not self-reported, the university may impose one or more of the sanctions available through its disciplinary procedures, as outlined in the NSHE Code (for faculty and professional staff), the Nevada Administrative Code (for classified staff), or the UNLV Student Conduct Code (for students).

When a relationship exists between a student who is being paid to administer a recognized student organization/group and another member of the organization/group, the above policy applies. If the student leader involved in such a relationship is not being paid to administer the organization, special circumstances apply; the involved students will report the relationship to the organization's advisor (or another university representative assigned by the office of the vice president for student life). Thereafter they will refrain from making decisions within the organization that are designed specifically to benefit or harm the other individual in the relationship. This policy shall not be construed to mean that either party to the relationship will necessarily be required to forfeit his or her membership status or position within the organization.

Persons bringing groundless or malicious charges under this policy are subject to disciplinary action for personal misconduct under the appropriate faculty/staff personnel policies or the Student Conduct Code.

**Copyright and Fair Use Laws**
The University requires all members of the University Community to familiarize themselves and to follow copyright and fair use requirements. YOU ARE INDIVIDUALLY AND SOLELY RESPONSIBLE FOR VIOLATIONS OF COPYRIGHT AND FAIR USE
LAWS. THE UNIVERSITY WILL NEITHER PROTECT NOR DEFEND YOU NOR ASSUME ANY RESPONSIBILITY FOR EMPLOYEE OR STUDENT VIOLATIONS OF COPYRIGHT AND FAIR USE LAWS. Violations of copyright laws could subject you to federal and state civil penalties and criminal liability as well as disciplinary action under University policies. To help you familiarize yourself with copyright and fair use policies, the University encourages you to visit its copyright web page at:
http://www.unlv.edu/provost/copyright/.

Course Policies

1. All students are required to be skilled in all course content. Attendance is mandatory for all lecture and lab sessions. Tardiness will not be tolerated. If you are unable to attend due to illness or other extenuating circumstances, the professor must be contacted prior to class. The student will be held responsible for all missed information.

2. Exams must be taken on the scheduled dates and assignments are to be handed in on their due dates. Late assignments without approval from the professor may be subject to a penalty assessment of up to 10% off per day. Some instructors may have a more rigorous penalty for late assignments (see specific class syllabus for details). Make-up exams will not be given unless prior arrangements are made with the instructor.

3. All printed homework assignments must be of high print quality (i.e., no blurred printing, no lines across the page). Students who are asked to reprint papers will be held to the late assignment policy (See #2 above).

4. Any grade below that of 80% reflects unsatisfactory work on the graduate level and as all work builds on preceding concepts, the following format will be followed:
   - A minimum grade of "B-" (80%) is expected to be maintained in all course work, although a minimum cumulative GPA of 3.0 or "B" (83%) is necessary to remain in the program. Students who do not maintain this average will be placed on probation at the end of the semester if they do not raise their average to at least 83% by that time (see Probation section in student manual). If a student's average score in any class is below 80% at midterm, the student will be notified in writing and should seek individual counseling with the professor and/or advisor to remedy the grade in question.
   - When a student’s cumulative GPA or semester GPA falls below a 3.0 (“B” average) and/or when a student receives a grade of “C+” or below in any one class at the end of the semester, the student will automatically be placed on academic probation and be notified of this status.
   - A second grade of “C+” or lower received in any course at the end of the ensuing semester or failure to restore the cumulative average to 3.0 or above at the end of the semester will bring about separation from the program.
   - A grade of “C+” or below in more than one course in any semester will bring about separation from the program.

5. If probation is not rectified in one semester, based on a grade earned in any class or cumulative GPA, then the student will be separated from the program.
6. In most cases, the probationary period will extend through one ensuing semester. In the event of probation in or at the end of a Spring semester, the probationary status may extend through the Summer and Fall semesters. The ARC reserves the right to modify the probationary time frame.

7. A student on probation must maintain grades of “B-” or better in all coursework, in addition to maintaining a minimum semester and cumulative GPA of 3.0 at the end of the semester, to be removed from probationary status.

8. If a student faces probation more than one time, the ARC will review the matter and a recommendation will be forwarded to the Chair and the Graduate College Dean as to remediation or separation from the program (see Probation).

9. An earned “F” in any didactic lecture course will result in separation from the program. An earned "Fail" in any didactic lab or Clinical Education course is subject to ARC review and may result in separation from the program.

10. An earned “FAIL” for any final practical pass/fail exam, regardless of the course grade, will result in an “F” in the course and separation from the program.

11. During the semester, a student will be given 2 additional opportunities to pass a failed competency check-off. Failing a competency check-off 3 times will result in failure of the course regardless of the grade in the course prior to the third failed check-off. Therefore, it is highly recommended that the student consult with the professor prior to attempting the third competency check-off.

12. A competency check-off or final practical exam will be failed if a student earns below a 73% in any skill criterion. Failure will also result if there is any breech of professional behavior or safety.

13. If a student is suspected of cheating, the case will be reviewed by the ARC. If found guilty of cheating the student will be separated from the program.

**Covert Audio and Visual Taping**

Covert videoing of faculty lectures is prohibited under Nevada System of Higher Education (Title 4, Chapter 1, Section 21). This policy is based on state law which expressly deems that surreptitious electronic surveillance to be unlawful without the knowledge of the person being observed (NRS 396.970). In addition, a student who surreptitiously audio-records a lecture may be in violation of state law (NRS 200.650). As such, you may not record, either audio or video, without permission from the faculty member. If you are granted permission to record you may not share the recording or use it for any other purposes except for that specific class.

**Criminal Background Checks**

All students enrolled in the physical therapy program will have to complete a criminal background check at least one time during the course of the program. Students will be required to pay for the background check, which will then be assessed by any clinical site that requests it. A few clinical sites require the DCE to verify a pass/fail on the background check according to a list of criteria in the appendices of the Educational Affiliation Agreement for that clinical site. UNLV will not be involved in the assessment of most of the background checks. If a student is unable to secure an affiliation in a specific setting due to their background checks, the student may not be able to complete the physical therapy program.
Disability Services
The Disability Resource Center (DRC) coordinates all academic accommodations for students with documented disabilities. The DRC is the official office to review and house disability documentation for students and to provide them with an official Academic Accommodation Plan to present to the faculty if an accommodation is warranted. Faculty should not provide students accommodations without being in receipt of this plan. UNLV complies with the provisions set forth in Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990, offering reasonable accommodations to qualified students with documented disabilities. If you have a documented disability that may require accommodations, you will need to contact the DRC for the coordination of services. For more information contact the DRC directly (location: Student Services Complex A, Room 143, webpage: http://drc.unlv.edu, phone: 702-895-0651).

Dissemination of Information
Dissemination of information that directly affects all prospective and enrolled students will be sent in a timely manner to assure that all prospective and enrolled students understand the rules and regulations related to admission, matriculation, and progression through the program. All students must open and maintain a UNLV Rebelmail account (http://rebelmail.unlv.edu) for the duration of their educational program. The faculty will use that account when corresponding with students. Prospective students will have access to information on the UNLVPT webpage regarding admission requirements, the academic and clinical education portions of the curriculum, licensure, accreditation status of UNLVPT, tuition costs, general information regarding scholarships and financial aid, and the UNLV campus.

Enrolled students will receive the UNLVPT Handbook 2014 during orientation. This will include the Educational Philosophy and Mission Statement, curriculum plan, tentative calendar, course descriptions, policies, rules and regulations, general information regarding clinical education, and a brief introduction to the faculty. Each student will be advised to visit the UNLV Graduate College website to familiarize students with grants, scholarships, available financial services, counseling services, testing services, and telemedia services.

Drop/Withdrawal Policy
As the curriculum in the Department of Physical Therapy is designed in a hierarchical manner, and students are required to take all courses sequentially, dropping or withdrawing from a course constitutes dismissal from the program. In the event of a severe accident or disabling illness that prevents the student from attending class for more than two consecutive classes, the student’s case will be sent to the Academic Review Committee for review.

Drugs and Alcohol
There will be no tolerance of alcohol or drug use during class, class breaks, or clinic hours. In accordance with the Drug-Free Schools and Communities Act Amendment of 1989, UNLV is committed to the prevention of alcohol or other drug abuse on campus.
If a student appears to be under the influence, the case will be immediately referred to the ARC and the student will not be allowed to participate in classroom or clinical activities until the situation has been resolved.

Drug Screens
All students enrolled in UNLVPT will have to complete a drug screen at least one time during the course of the program. Students will be required to pay for the drug screen. Results are faxed or emailed to UNLVPT. The Clinical Education Team will then fax or email the results to the appropriate Center Coordinator for Clinical Education at the clinical site.

Emergency
If an emergency arises, contact the departmental office at (702) 895-3003 and the administrative assistant will contact the appropriate parties. The following are emergency telephone numbers for police, fire and rescue:
- Public Safety (UNLV Police) (non-emergency number - 702-895-3668)
- Public Safety (emergency number - 911)
- Fire and Rescue (emergency number - 911)

In the event of a patient or student code:
- Faculty and students working directly with the patient will perform assessments and run life-saving measures.
- Students and faculty observing the patient will be designated to do the following tasks:
  o Call 911 - Remember, you must dial 8 then 911 if using a land line in one of the BHS rooms.
  o Retrieve any assessment tools needed
  o Make ready all chart and patient information upon arrival of medical personnel
  o One student to wait outside the building
  o One student to hold elevator
  o Other faculty and students are to clear the room and create easy access to the patient
  o Remember to stay calm

Employment
Due to the academically rigorous nature of this program and the extensive time required for academic, lab, and clinical requirements, the faculty strongly recommends that you not seek outside employment. As such, due to the intense nature of the curriculum, UNLVPT has an agreement with the Graduate College that allows out-of-state students to pay in-state tuition beginning the second year of the program (contact the Graduate College for further information). If you choose to work, then it must not interfere with coursework and cannot be used as an excuse for leniency if academic issues arise.
Evacuation of Research Subjects or Patients
In the event of a fire alarm or disaster alarm, all faculty members and students are to check BHS 213, 215, 216, 217, 218, and 112 as they prepare to evacuate the building. They are to make certain no subjects or patients are in these rooms. If a subject or patient is present, faculty members and students must assist in the evacuation of these individuals. The elevator on the second floor will not be available. As a result, faculty members and students may have to do a fire carry of the individual on the second floor. This might mean that 2 to 4 faculty members and students would make a “chair” to physically carry the individual down the northeast stairwell to the outside of the building. Other faculty members and students would carry the individual’s wheelchair down the northeast stairwell to the outside to be available for the subject or patient. In the event that the faculty members and students did not feel that they could physically form a “chair” to carry the individual, they should obtain two full sheets from BHS 213, lay the individual on the sheets (two for double thickness and increased safety), and then carry the individual down the stairwell to the outside in this manner. Other faculty members and students should carry the individual’s chair down the stairwell to the outside to be available for the subject or patient. Faculty members and students who check BHS 112 should assist in whatever way needed to evacuate an individual to the outside of the foyer of the building.

Equipment Usage
If permission is granted by the course instructor, students may check out selected physical therapy program equipment for class-related activities. Check-out and return of the equipment is coordinated by the UNLVPT Administrative Assistant and/or UNLVPT faculty member. All items checked out by a student must be returned before a student will be cleared for graduation.

Family Educational Rights and Privacy Act (FERPA)
The Family Education Rights and Privacy Act of 1974, commonly known as FERPA, is a federal law that protects the privacy of student education records. Students have specific, protected rights regarding the release of such records, and FERPA requires that institutions adhere strictly to these guidelines. Under FERPA, students have rights to view their personal UNLV records. UNLV cannot disclose student records to anyone without the student’s permission. This includes parents, legal guardians, clinical instructors, and prospective employers. As such, UNLVPT will have each student sign a FERPA release at the beginning of the program that will allow us to discuss your academic record with your clinical instructor and prospective employers should you desire us to become a reference for you. Additional information about FERPA is available at: http://www2.ed.gov/policy/gen/guid/fpco/ferpa/index.html.

Grading Policies
Grading Scale:
- A 93-100
- A- 90-92
- B+ 87-89
- B 83-86
- B- 80-82
- C+ 77-79
- C 73-76
- F <73
Graduation Awards
The following awards are generally given out each year to graduating students. Not all awards may be given out each year and multiple recipients may be identified at faculty discretion.

Leadership Award
- Chosen by the faculty and students of the graduating class and awarded to a graduating student.
- This awardee leads by example, influences classmates, takes initiative in classroom issues, respects classmates, articulates a focused vision for the class, exhibits enthusiasm, remains calm when crises arise, and commits to excellence.
- Award: $500.00

Clinical Education Award
- Recommended by the clinical faculty, chosen by the UNLVPT faculty, and awarded to a graduating student.
- This awardee exhibits sound reasoning, utilizes evidence-based practice, gets along with colleagues, is pleasant to work with, puts forth a good effort, is a hard worker, and takes criticism well.
- Award: $500.00

Excellence in Clinical Teaching
- Chosen by the students and faculty and awarded to a clinical instructor who was a clinical instructor during the 3rd year affiliations.
- This awardee demonstrates excellence in clinical teaching and mentorship. In addition, this awardee leads by example, models professionalism (e.g., Professional Behaviors, Code of Ethics), and specializes in at least one area of practice. The nominee should have at least 3 years of clinical experience and 2 years of being a clinical instructor.
- Award: $500.00

Faculty Recognition Award
- Chosen by the faculty with student input and awarded to a graduating student.
- This awardee typically has made significant achievements in the physical therapy program that deserves some recognition. Examples might include: a published CAT at the APTA’s Website; exceptional service to the class (e.g., golf tournament) or community; high academic performance; publication (with team) of research project prior to graduation; respectful communication among fellow students and with faculty; service as a volunteer to a Committee for the Nevada Chapter, APTA; service as an officer or representative to the APTA’s Student Assembly; service as an officer for the Nevada Chapter Student Special Interest Group (SSIG). This award may also be given to a graduating
student who has had to overcome difficult circumstances and has succeeded despite the challenges.

- Award: $500.00

**Academic Excellence Award**
- This award goes to the graduating student with the highest overall GPA in the graduating class.
- Award: $500.00

**Research Award**
- Chosen by the faculty and awarded to a student research group of graduating students
- This award typically goes to the research group that has exhibited excellence in research design, data collection, writing, and presenting. The awardees have had a strong commitment to the project and have had good attitude throughout the process. Moreover, the project makes a strong contribution to physical therapy in the form of publications and/or presentations.
- Award: $300 per research team member

**Outstanding Achievement Award**
- Chosen by the faculty with student input and awarded to a graduating student
- This well-rounded awardee exhibits excellence in all aspects of the UNLVPT experience: academic, clinical, and research. Moreover, this awardee is professional, exhibits leadership skills, is respected by classmates and faculty, and exhibits all of the traits addressed in the Professional Behaviors and Code of Ethics.
- Award: $1000.00

**Grievance - Due Process Procedural Steps**

**Appeal.** Students who are denied the privilege of readmission to UNLVPT after separation have the right to appeal. The appeal process will follow the steps outlined below beginning at step #3.

**Steps within the College.** If a student is unhappy with their educational experience (e.g., grading issues) in any course, a written grievance must first be submitted by the student to the faculty member involved. If the complaint is related to student-student interactions the complaint must first go to the Student Advisor or Class Advisor. If the complaint is against a faculty member (e.g., faculty-student interactions) or an administrative assistant then the complaint must first go to the Department Chair. In addition, if the complaint is regarding an appeal for readmission, then the complaint must first go to the Department Chair. If the grievance is not resolved to the student’s satisfaction after this initial submission, the grievance may be submitted in a step-wise fashion through the following administrative channels:
1. Faculty member involved
2. Student Advisor or Class Advisor
3. Academic Review Committee (if appropriate)
4. Department Chair
5. Associate Dean
6. Dean

Steps External to the College
7. The Graduate College Graduate Student and Faculty Issues Committee
8. Graduate Dean

Issues related to harassment/discrimination will be directed to the UNLV Diversity Initiatives Office (http://www.unlv.edu/diversityinitiatives). The Grievance Category issues for graduate students; the place to pick up the petition; and the appropriate point of resolution are identified in the UNLV Student Conduct Code (http://www.unlv.edu/sites/default/files/page_files/27/StudentConduct-Code.pdf).

Grievances that Fall Outside the Realm of Due Process
The policies and procedures for filing a complaint that falls out of the realm of due process, such as complaints from clinical education sites, employers of graduates, and the public may include the following:

An individual or organization that is unhappy with their experience or encounter with any student, faculty or staff member of UNLVPT is encouraged to file a written complaint against the department or program. The complaint will be kept on file in the Department Chair’s files under “Program Complaints” for a period of 5 years. The process for handling a complaint against UNLVPT:

1. When possible, the Department Chair will discuss the complaint directly with the party involved within 20 business days of receipt of the official complaint. If the matter is reconciled at this point, a letter from the Chair acknowledging the resolution of the complaint will be filed with the complaint and a copy sent to the complainant.

2. If no resolution is attained with the discussion with the Department Chair, or if the complaint is against the Department Chair, the involved party may submit a written complaint to the Associate Dean of the School of Allied Health Sciences. The Department Chair will also forward a written summary the previous discussions where appropriate. The Associate Dean will meet with each party separately and may schedule a joint appointment with the two parties in order to attempt a solution. A letter outlining the resolution by the Associate Dean should be filed with the complaint in the Department Chair’s office.

3. If the party feels that additional complaint is necessary, then the last line of complaint is to the Dean of the School of Allied Health Sciences. A letter outlining the resolution by the Dean should be filed with the complaint in the Department Chair’s office.

Complaints should be addressed to:
Department Chair, Department of Physical Therapy
University of Nevada, Las Vegas
4505 Maryland Parkway, Box 453029
Las Vegas, Nevada 89154-3029
Health Risks and Injuries

Health Conditions of a Continuing Nature
In the event of pregnancy, students may continue clinical affiliations in accordance with agency policy. Students having health problems of a continuing nature may be referred to the ARC for recommendations. In any situation where a student has a significant change in medical status, a new physical must be completed before the student can resume either the clinical affiliation or coursework.

Health Risks
Students will be informed of health risks that they may encounter throughout the educational program and will follow the OSHA regulations as stated in the Clinical Education Manual.

Student Injury in the Classroom or Clinical Area
The faculty member and/or health worker assesses the extent of injury to determine if the student can remain in the classroom or clinical area. If the student requests medical care, the faculty member and/or health worker will assist the student in obtaining appropriate care. The student and faculty member and/or health worker must complete an incident report if required by the University or clinical agency. The faculty member and/or health worker has the right to not allow the student to participate in class based on the extent of the injury.

HIPAA and Related Policies
An important part of professionalism in physical therapy is maintaining the patient’s confidentiality. Therefore, written work submitted to the professor must never contain the patient’s full name. Patient’s problems must not be discussed with family or friends. If the Department ascertains that the patient’s confidentiality has been violated, the student violating the confidence will be subject to disciplinary action.

In addition, in the course of physical therapy training, students will likely have access to confidential information related to other students, patients/clients, or others. Students will receive training in protecting patient/client confidentiality and HIPAA guidelines. It is the responsibility of the student to maintain confidential any information related to patients/clients. Per HIPAA guidelines, the following behaviors are prohibited:
- Releasing confidential patient/client information by any means (i.e., verbally, electronically (e.g., email), social media (e.g., Facebook, Twitter, Instagram), or in print) to any individual/agency who does not have the legitimate, legal or clinical right to the information
  - Unauthorized use, copying, or reading of patient medical records
  - Unauthorized use, copying or reading of employee/hospital records
  - Taking patient records outside the clinical facility
  - Any tampering of patient information

This policy applies not only to patients/clients with whom the student has direct contact in the clinical setting, but to any personal/confidential information to which the student
may have access while participating in physical therapy education. Discretion should be used when discussing patient/client information with other appropriate individuals to assure that the nature of the discussion remains professional, pertains only to information clinically relevant while in the clinical setting, and cannot easily be overheard by others. When discussing any patient information for educational reasons in the classroom, information must be properly de-identified and/or appropriate authorization obtained. Additionally, some clinical facilities will have their own published policies/procedures related to protecting patient/client information that students are expected to follow. Violations of this policy may result in probation and may be grounds for separation from the program.

Informed Consent
Informed consent forms will be provided to all patients or subjects who may participate in classroom demonstrations or research projects. Additional consent forms will be provided if the patient/subject is to be filmed or photographed.

Assumption of Risk/Release of Liability Form
Included with the Student Manual is an Assumption of Risk/Release of Liability Form that explains the potential risk involved with demonstration and practice of clinical skills sponsored by UNLVPT. Each student in UNLVPT must sign this form prior to initiating any clinical activities. Lack of a signature will preclude students from participating in these activities.

Office Hours
UNLVPT prides itself in accessibility to students. As such, UNLVPT faculty have made a covenant that they will respond back to students in a timely manner to their queries via electronic media and will make themselves available for student drop-in visits during their four office hours each week. Visits by students outside of these four office hours will need to be made by appointment. In general, please respect the faculty member’s time and make your visit efficient. Office hours are posted in syllabi and also on their bulletin boards adjacent their office doors. If faculty members are not able to hold their regular office hours they should notify the department administrative assistant and post a notice on their door when hours will be rescheduled.

Probation
Students may be placed on probation if they fail to meet UNLVPT standards in the areas of academics, professional behaviors, and/or clinical performance. The ARC will make all recommendations for probation to the Department Chair, who will then make recommendations to the Graduate College Dean. The Chair and the Graduate College Dean will make all disciplinary decisions and notify the student of such actions. In most cases, the probationary period will extend through one ensuing semester. In the event of probation in or at the end of the Spring semester, the probationary status will extend through the Summer and Fall semesters. The ARC reserves the right to modify probationary time frames. A student who performs in a way that constitutes probation in one of the other areas may be separated from the program. If a student is placed on probation a second time for any reason, the ARC will make recommendations regarding
separation, probation, probationary time frame, and/or remediation to the Chair. A student who meets any of the following criteria will be placed on probation:

- A student earns a grade below 80% (B-) in any one course at the end of a semester
- A student earns a semester GPA that falls below 3.0
- A student commits any infraction of professional behaviors
- Any clinical performance that is deemed unsatisfactory will result in remediation.

If a student requires clinical remediation, they will be placed on probation (see remediation policy in Clinical Education Handbook).

**Professional Appearance Standards**

Students are required to wear attire that conforms to the image of the professional physical therapist. UNLVPT is a setting where students, faculty, guests, patients, other professionals, and the general public form an initial impression about us and our profession based on our appearance and conduct. Therefore, the appearance and dress of UNLVPT students and faculty should be professional and should reflect modesty and cleanliness. The appearance and dress code policy of UNLVPT is the following and should be adhered to whenever the student is on the 2nd and 3rd floors of BHS (Monday through Friday), on clinical rotations, in the offices of professors, conducting research, or when on any errand for UNLVPT:

- **Appearance.** Students should be well-groomed and bath regularly. Hair should be kept clean and neat, and must be fashioned such that it does not fall forward or over the sides of the face when working with patients/clients. Hairstyles that are extreme in color (i.e., must fall within natural occurring shades) or style are not allowed. Beards and mustaches must be clean and neatly trimmed. Nails must be kept short and clean. Distracting body art such as facial/body piercings or easily visible tattoos are to be covered with clothing (or temporary cover) or camouflaged with makeup. Underwear or any type of cleavage should never be visible. No excessive use of makeup, cosmetics, perfumes, colognes or scented lotions is allowed. No excessive use of jewelry or facial piercings is allowed. Students may wear one set of earrings that are small and discrete but no other metal jewelry associated with body piercing may be visible. Only wedding or simple rings are allowed.

- **Dress.** Scrubs approved by UNLVPT are the required dress for the classroom and for research activities at all times unless otherwise directed by faculty. Scrubs that are tattered or dirty are not appropriate. No hats may be worn unless for religious reasons. Shoes should be conservative in style and should be closed-toed. Clean sneakers are appropriate with scrubs. Flip-flops or sandals are not allowed.
  - **Clinical attire.** Occasionally, students will be asked to dress in clinical attire rather than their UNLVPT scrubs. In addition, they will be asked to dress in clinical attire on the clinical rotations. Students should conform to the policies and procedures of the clinical site to which they are affiliated. In general, the following are appropriate in most clinical settings: dress pants/slacks, dress shirts/modest blouses, and closed-toed dress shoes with low heels. All clothing should be cleaned and neatly pressed. The following are not appropriate: jeans, t-shirts, revealing clothing (either low cut or see through), sneakers, and sandals. Loose fitted clothing that may be revealing in certain
positions is not appropriate. Underwear or any type of cleavage should never be visible.

- **Lab attire.** Clean, loose fitting shorts and t-shirts are the required dress for labs. Underwear must be worn but should not be visible. However, there are occasions in the lab where shirts may need to be removed. Sports bras are recommended in this case. Students will be provided lockers in the restrooms where they may change. When students leave the floor to visit faculty members or the administrative assistant or for other purposes, scrubs must be worn over the lab attire. No exceptions are allowed. The lab attire must be available in the students’ lockers at all times. Failure to have lab attire for labs may result in the student being dismissed and not allowed to return to class until properly attired in lab clothing. The ARC will also be notified.

- **Professional business attire.** Students will wear business attire (i.e., business suits) for final research presentations or when required by faculty. High heeled shoes may be worn for professional presentations.

Students presenting to class or a professors office violating any of the aforementioned professional appearance standards will be asked to leave and not allowed to return until properly dressed or groomed. While UNLVPT wishes to maintain a professional appearance standard, the onus is on the student to adhere to these professional standards. As professionalism is a core value of UNLVPT, students who repeatedly violate these standards will be referred to the ARC. Failure to comply with these standards could result in probation or separation from the program.

**Professional Behaviors**
See section regarding “Code of Ethics” and “Professional Behaviors” at the end of the UNLVPT Handbook.

**Professors**
Instructors should be addressed by their preferred title (such as ‘Professor’ or 'Doctor') and their last name unless otherwise stipulated by the faculty member.

**Program Separation Procedure**
A student will be separated from UNLVPT in any of the following cases:
- An earned “F” in any didactic course
- Failure of a third attempt of any competency check-off with the exception of the final practical exam
- A failure of a practical pass/fail exam (different than the competency check-off)
- A grade of “C+” or below in more than one course in any semester
- Inability to rectify probationary status within the time frame allotted by the ARC.

This could happen if one or more of the following occur:
- Cumulative GPA of 3.0 is not attained
- Semester GPA of 3.0 is not attained
- A grade of “C+” or below is earned in the probationary semester(s)
- Inability to remediate or rectify clinical or professional behaviors
- A student on probation whose actions warrant probation in another category (academic, professional behavior, clinical) may also be separated.
Re-Application Policy:
In the event that a student is separated from UNLVPT, they may have the option to re-apply for admission within a specified time frame following their separation contingent upon a positive recommendation from the ARC, the Chair, and the Graduate College Dean. The re-application process is as follows:

- The student must reapply to the Graduate College and UNLVPT to be re-admitted no earlier than one semester following the semester of separation.
- The reapplication to the program must include a statement addressing the reason for discontinuation and actions that have been taken to secure the student’s success in completing the Physical Therapy program if re-admitted. The student may include any documentation that may support or validate their growth and development in academic, professional and/or clinical areas in the time since their separation from UNLVPT.
- The re-applicant must reapply using PTCAS.
- The Chair, with input from the ARC and the Graduate College Dean, will make the final decision regarding re-admission.
- If a student was separated for an unsatisfactory GPA or for receiving 2 “C’s” in any one semester, ARC may make recommendations to devise an action plan to restore a satisfactory standing in the program. This may include retaking one or more courses in the program with a goal of attaining a cumulative GPA of 3.0. The Chair with input from the Graduate College Dean will make the final decision regarding these matters. A student earning an “F” in any didactic course will not be given an option to reapply.
- If a student was separated for professional behaviors, they may be re-admitted at the point in which they were previously enrolled in the program, contingent upon a favorable recommendation from ARC and the Chair.
- If a student was separated based on clinical performance, they may be re-admitted at the point in which they were previously enrolled in the program and they must complete academic and clinical coursework contingent on the recommendation of the ARC, the Chair, and the Graduate College Dean.
- If a student is re-admitted and probation is warranted for any reason after their re-admission, they will be immediately separated without the possibility of reapplication.
- The re-application deadline is mid-December of each year for entry into the Summer semester (please check the website for the specific date).

Recruitment
UNLV is dedicated to the equality of educational opportunity, and the creation and maintenance of a campus environment free of barriers that effectively discriminate against those with disabilities. Equality in access is achieved through reasonable classroom accommodations, and reasonable adaptation of examination and evaluation procedures. Nevada residents will receive special consideration for admission to ensure that this State supported school provides physical therapists to meet the needs of Nevada. However, this is not to imply that the requirements for admission are lowered for Nevada residents.
Religious Holiday Notification
If a student must miss a class or assignment because of religious observance, notification for the absence must come at the beginning of the semester prior to the date stipulated in class syllabus. As a general rule, a student missing a class or laboratory assignment because of observance of a religious holiday shall have the opportunity to make up missed work. Students must notify the professor of anticipated absences by the last day of late registration to be assured of this opportunity.

Research
Students have the opportunity to become involved in projects through UNLVPT as well as through collaborative studies with other departments in the SAHS. Each student will be expected to participate in a scholarly project or professional paper culminating in a presentation of the project during the week prior to graduation.

Retention of Students
Students are the focal point of UNLVPT and the ability to address their issues of concern is crucial to its success. There are always open lines of communication between faculty and students. For example, students are encouraged to seek faculty consultation on any academic or professional issue they believe is pertinent to their success in the program. Each student is assigned a faculty advisor and is required to meet at least once per semester. They also have the option of seeking further help as needed. Faculty may provide individual counseling, hold mid-term evaluations of student progress, hold regularly scheduled office hours, and may hold open labs to assist in competency check-offs. Graduate assistants are available to aid students in this endeavor. Students may also access the Disability Resource Center if reasonable accommodations are needed.

Rights and Safety of Individuals
The rights and safety of individuals involved in any aspect of UNLVPT are protected by an appeals process. If a student wishes to file an appeal or a grievance pertaining to his or her graduate education, UNLV Graduate College procedural steps are outlined in the Grievance Section of the Policies and Procedures Manual.

Unsafe or unprofessional behavior or practice may lead to probation or separation from UNLVPT. In addition to observance of the Student Academic Misconduct Policy (http://www.unlv.edu/studentconduct/misconduct/policy), students in UNLVPT must act in a safe and professional manner. Unsafe or unprofessional behavior at a clinical site or in the classroom may be grounds for immediate separation from the program, regardless of previous academic or clinical performance. Examples of unsafe or unprofessional behavior include, but are not limited to the following:

- Inadequate preparation for safe patient care
- Failure to seek appropriate assistance with new or unfamiliar procedures
- Dishonest or unprofessional interactions with patients, families, staff, faculty, or peers
- Engaging in practice when not mentally or physically fit
• Placing or leaving a patient in a hazardous condition or circumstances
• Any breech of UNLVPT policy or procedure

Student Portfolio
Students will be expected to create and regularly update their performance in the form of a portfolio that includes evidence of participation in activities related to the APTA’s Professional Behaviors. This will be used to document student strengths and areas needing improvement throughout the duration of their tenure in the program.

UNLVPT Scholarships
The following is a list of scholarships that are available to current students. As the submission dates change from year to year, please see the UNLVPT scholarship webpage (http://pt.unlv.edu/scholarships.html) for updated due dates and other specific details on the scholarships.

UNLVPT Scholarships
Requirements -
• First, second and third year students
• Scholarships will be based on need, according to the FAFSA, and merit as determined by the faculty.
• Scholarship amount: Varies

WICHE - Western Interstate Commission for Higher Education
Requirements -
• First year student
• It is not mandatory the student be a state resident; however, preference is given to state residents for the Nevada WICHE program.
• As UNLVPT is an approved WICHE school for Hawaii, Wyoming and Alaska, residents of those states are eligible for WICHE programs from those states (please contact those states directly for details of their programs)
• Typically, the student must agree to practice in a medically underserved region of the state for two years.
• Scholarship pays: TBD but usually tuition and books over a three year period. The Hawaii, Wyoming and Alaska WICHE programs pay the out-of-state tuition for the duration of the program.

Kitty Rodman Award of Excellence (1 scholarship awarded annually)
Requirements -
• The student must demonstrate financial need.
• The student must have a minimum GPA of 3.5.
• The student must submit a 300 word essay explaining their professional goals.
• Scholarship amount: approximately $1000.00
Student Services and Responsibilities

Computer Services
Many computer and software related training sessions are offered via seminars (e.g., Word, Excel, Access, PowerPoint, Adobe Acrobat) from the Office of Information Technology (OIT)(see training schedule at https://oit.unlv.edu/help/training/training-schedule). The IT help desk provides technology support for UNLV faculty, staff, and currently enrolled students. Contact the IT help desk when you need assistance with password resets, new accounts, wireless, Rebelmail, WebCampus or other computing problems (Student Union 231 or CBC B113; phone: 895-0777; https://oit.unlv.edu/help). You can activate your Rebelmail account at http://rebelmail.unlv.edu.

OIT maintains 47 computer labs across the campus with some 1,400 computers available for academic use. These 47 labs provide access to the technology and software (e.g., Word, Excel, Access, PowerPoint, SPSS) required by graduate students. Most conveniently for the physical therapy students, the computer lab in the Bigelow Health Sciences Building (BHS) Rm. 200 is available to all students Monday through Thursday from 8:00 A.M. to 5:00 P.M. except during Summer when it is closed. The graduate assistants also have access via Marlok entry to three computers in room 218 and all students have access to the two computers in room 216. UNLV supported WI-FI is available on the second floor of the BHS. No other computers in the department are accessible for student use. Faculty permission is required if you wish to use the departmental computers for classroom presentations.

Financial Aid
The steps for application of financial aid at UNLV can be found at http://finaid.unlv.edu/about/. In addition, information about grants and scholarships is available through the Graduate Student Association and the Graduate College. Loans available to graduate students include: Federal Perkins Loans, Federal Direct Subsidized Loans, and Federal Direct Unsubsidized Loans. Information about financial assistance provided through the APTA and special support offered through the Western Interstate Commission for Higher Education (WICHE) will be available on the UNLVPT webpage. Currently, UNLVPT is a WICHE certified state for Nevada, Wyoming, Alaska and Hawaii. UNLVPT also offers several different scholarships (see UNLVPT Scholarships).

Graduate Assistantships
Several graduate assistantship awards are available to second year physical therapy students. Interested students should apply through the Graduate Coordinator usually by February of each year. Announcements will be made shortly thereafter. In order to maintain graduate assistant status, the student must achieve a minimum semester and cumulative GPA of 3.0 an cannot carry a grade less than a “B-“ in any course nor be placed on probation for any breach of academic, professional, or clinical performance. For details about graduate assistantships please contact the Graduate College (https://www.unlv.edu/graduatecollege/ga).
Laboratories
Equipment in the research and cadaver laboratories will be available to UNLVPT students only unless permission has been granted by the Chair. Family members and friends are not allowed in the cadaver laboratory unless given permission by a faculty member. Violation of this code may result in probation or separation from the program. Each student will be familiarized with the policies and procedures of the cadaver lab prior to the start of the course.

Libraries
All University library services are available to students. A small library is available to physical therapy students in BHS 216. All students will have access to this room via Marlok cards.

Lockers and Mailboxes
Individual lockers will be assigned to each first year student in the restrooms on the second floor restrooms of BHS. Individual mailboxes will be assigned to each student in BHS 216. Students are expected to check their mailboxes on a daily basis.

Parking Permits
Yearly student parking permits may be purchased at the Claude I. Howard Department of Public Safety (http://www.unlv.edu/parking/permits). There is also a free parking lot on the west side of campus between the Softball and the Myron Partridge Track Stadiums. Students should be aware that the free lot does fill up quickly on regular school days.

Professional Organization Membership
All UNLVPT students are required to become members of the American Physical Therapy Association (APTA) and maintain this membership throughout the duration of their enrollment in the UNLVPT program. This is at the student’s own expense. The APTA is the national organization dedicated to serving the physical therapy profession. By becoming a member, students gain access to a large number of benefits and professional opportunities. One significant benefit is access to the Physical Therapy Journal (which will be needed for many course assignments) and access to discounts on national and regional conferences and continuing education courses. In addition, the students will have access to the Guide to Physical Therapist Practice and other professional development resources. The student will gain automatic membership in the Student Assembly which functions as a forum for future Physical Therapists and Physical Therapist Assistants. The National Student Conclave also provides the student with access to the latest trends and issues in the profession. Membership applications and information will be given to each student at the beginning of the DPT program. Information may also be found on at http://www.APTA.org. Students are also encouraged to become active in the Nevada State Chapter of the APTA. The chapter typically sponsors two conferences, one in Reno and one in Las Vegas, and offers other opportunities for professional service, networking, skill development and promotion of the profession. This is a very useful way for the student to become more acquainted with the physical therapy profession.
Public Safety (Security)
The Claude I. Howard Department of Public Safety houses the Public Safety Department, which includes the divisions of police, traffic, and parking. It contains a 24-hour-a-day communications center, which fields all emergency responses on the campus. The Police Division provides police service to the university 24 hours a day, 365 days per year; the phone number is 895-3668. Copies of the rules and regulations are available in the Public Safety building. You may obtain information by visiting or calling 895-1300.

Student Health Service
The Student Health center is open to all currently registered and enrolled UNLV students, regardless of insurance coverage. The student health fee is charged to all admitted students and supports Student Wellness (Student Health Center, Student Counseling and Psychological Services, Rebel Wellness Zone and The Jean Nidetch Women’s Center). Routine appointments are free and cover general health services; however, there are fees for some services. It is locating in the Student Wellness and Recreation Center. More information can be found by calling 702-895-3370 or at http://www.unlv.edu/srwc/health-center.

Student Counseling and Psychological Services
Student Counseling and Psychological Services (CAPS; http://www.unlv.edu/srwc/caps/about) can help you manage your mental health so that you can make the most out of your UNLVPT experience. CAPS is staffed with clinicians that are trained to help you work through problems commonly experienced by college students of all ages and backgrounds. Psychological services offered to students include individual, couples and group counseling, consultation and outreach, referral services, substance abuse services, career interest testing and 24-hour information hotline and crisis/emergency intervention.

Student Responsibilities
BHS 216. The following items are provided for student use and must be maintained by the students on a regular basis:

- Refrigerator
- Microwaves
- Computers
- Mailboxes
- Phone
- Student copier
- Visix Digital Monitor with AppleTV

BHS 213, 215, 216, 217, 218, 112. General clean up and maintenance of UNLVPT areas on a regular basis are the responsibilities of the students. At the end of each day, students are responsible for cleaning the tables, putting away all equipment, and placing laundry into the hampers.
Testing policy
For all tests for which students are provided with an answer sheet (e.g., Scantron), the answer recorded on the answer sheet will be regarded as the student's only and final response choice. If an electronic test is administered, it is the student's responsibility to bring their iPad and have sufficient battery life to take the test.

UNLV Writing Center
One-on-one or small group assistance with writing is available free of charge to UNLV students at the Writing Center, located in Central Desert Complex Building 3. Although walk-in consultations are sometimes available, students with appointments will receive priority assistance. Appointments may be made in person or by calling 895-3908. The student's Rebel ID Card, a copy of the assignment (if possible), and two copies of any writing to be reviewed are requested for the consultation. More information can be found at: http://writingcenter.unlv.edu/.

Essential Tasks for UNLVPT Program
The University of Nevada, Las Vegas is dedicated to the equality of educational opportunity; it is committed to the creation and maintenance of a campus environment free of barriers that effectively discriminate against those with disabilities. In order to assure complete equality in access, we must also make reasonable classroom accommodations for students with disabilities, in the techniques we use in teaching them, and in the methods we use for evaluating their progress. In the same vein, becoming a physical therapist requires the completion of a professional education program that is both intellectually and physically challenging. The purpose of this document is to articulate the demands of this program in a way that will allow prospective students to compare their own capabilities against these demands.

Applicants are asked about their ability to complete these tasks, with or without reasonable accommodation. Reasonable accommodation refers to ways in which the university can assist students with disabilities to accomplish these tasks (for example, providing extra time to complete an examination). Reasonable accommodation does not mean that students with disabilities will be exempt from certain tasks; it does mean that we will work with students having disabilities to determine whether there are ways that we can assist the student toward completion of all required tasks.

Prospective students who indicate that they can complete these tasks, with or without reasonable accommodation, are not required to disclose the specifics of their disabilities prior to an admission decision. Prospective students who cannot complete these tasks with or without accommodation are ineligible for consideration for admission. If admitted, a student with a disability, who wishes reasonable accommodation must request it in writing, specifying the accommodation, through the Disability Resource Center. An offer of admission may be withdrawn if it becomes apparent that the student cannot complete essential tasks even with accommodation that the accommodations needed are not reasonable and would cause undue hardship to the institution, or that
fulfilling the functions would create a significant risk of harm to the health or safety of others.

Prospective students who have questions about this document or who have a documented disability that may require assistance will need to contact the Disability Resource Center (DRC) for coordination with academic accommodations. The Disability Resource Center is located in the Reynolds Student Services Complex, Room 143. The DRC phone number is 895-0866. The Coordinator of the Disability Resource Center will route the inquiry to the Department of Physical Therapy, if appropriate.

**Essential Tasks**

- Students must meet class standards for course completion throughout the curriculum.
- Students must be able to read, write, speak, and understand English at a level consistent with successful course completion and development of positive patient-therapist relationships.
- Students must complete readings, assignments, and other activities outside of class hours.
- Students must gather decision-making pieces of information during patient assessment or research activities in class or in the clinical setting without the use of an intermediary such as a classmate, a physical therapist assistant, or an aide.
- Students may perform treatment activities in class or in the clinical setting by direct performance or by instruction and supervision of intermediaries.
- Students must apply critical thinking processes to their work in the classroom and the clinic, must exercise sound judgment in class and in the clinic, and must follow safety procedures established for each class and clinic.
- Students must have interpersonal skills as needed for productive classroom discussion, respectful interaction with classmates and faculty, and development of appropriate therapist-patient relationships.
- Students must maintain personal appearance and hygiene conducive to classroom and clinical settings.
- Students must maintain cardiopulmonary resuscitation certification at the health professional level.
- Students must demonstrate appropriate health status prior to clinical affiliations, with annual updates on some items: no active tuberculosis, rubella (German measles) and rubeola (measles) immunization, tetanus-diphtheria booster within 10 years of anticipated graduation, and hepatitis B vaccine series or written declination.
- Students may be required to complete OSHA-regulated Bloodborne Pathogen Exposure Training.
- Students must follow standards and policies specified in the UNLVPT Handbook, the Educational Affiliation Agreement (contract between university and clinical sites), and the Clinical Education Manual.
Typical Skills Used to Complete These Essential Tasks

- Students typically attend classes 30 or more hours per week during each academic semester and Summer terms. Classes consist of a combination of lecture, discussion, laboratory, research, and clinical activities. When on clinical rotation, students are typically present at the clinic 40 or more hours per week on a schedule that corresponds to the operating hours of the clinic.
- Students typically sit for two to 10 hours daily, stand for one to two hours daily, and walk or travel for two hours daily.
- Students typically relocate outside the Las Vegas area to complete one or more clinical rotations of six to twelve weeks duration each.
- Students frequently lift less than 10 pounds and occasionally lift weights between 10 and 100 pounds.
- Students occasionally carry up to 25 pounds while walking up to 50 feet.
- Students frequently exert 75 pounds of push/pull forces to objects up to 50 feet and occasionally exert 150 pounds of push/pull forces for this distance.
- Students frequently twist, bend, and stoop.
- Students occasionally squat, crawl, climb stools, reach above shoulder level, and kneel.
- Students frequently move from place to place and position to position and must do so at a speed that permits safe handling of classmates and patients.
- Students frequently stand and walk while providing support to a classmate simulating a disability or while supporting a patient with a disability.
- Students occasionally climb stairs or negotiate uneven terrain.
- Students continuously use their hands repetitively with a simple grasp and frequently use a firm grasp and manual dexterity skills.
- Students frequently coordinate verbal and manual activities with gross motor activities.
- Students use auditory, tactile, and visual senses to receive classroom instruction and to evaluate and treat patients.
Code of Ethics for the Physical Therapist

HOD S06-09-07-12 [Amended HOD S06-00-12-23; HOD 06-91-05-05; HOD 06-87-11-17; HOD 06-81-06-18; HOD 06-78-06-08; HOD 06-78-06-07; HOD 06-77-18-30; HOD 06-77-17-27; Initial HOD 06-73-13-24] [Standard]

Preamble
The Code of Ethics for the Physical Therapist (Code of Ethics) delineates the ethical obligations of all physical therapists as determined by the House of Delegates of the American Physical Therapy Association (APTA). The purposes of this Code of Ethics are to:

- Define the ethical principles that form the foundation of physical therapist practice in patient/client management, consultation, education, research, and administration.
- Provide standards of behavior and performance that form the basis of professional accountability to the public.
- Provide guidance for physical therapists facing ethical challenges, regardless of their professional roles and responsibilities.
- Educate physical therapists, students, other health care professionals, regulators, and the public regarding the core values, ethical principles, and standards that guide the professional conduct of the physical therapist.
- Establish the standards by which the American Physical Therapy Association can determine if a physical therapist has engaged in unethical conduct.

No code of ethics is exhaustive nor can it address every situation. Physical therapists are encouraged to seek additional advice or consultation in instances where the guidance of the Code of Ethics may not be definitive.

This Code of Ethics is built upon the five roles of the physical therapist (management of patients/clients, consultation, education, research, and administration), the core values of the profession, and the multiple realms of ethical action (individual, organizational, and societal). Physical therapist practice is guided by a set of seven core values: accountability, altruism, compassion/caring, excellence, integrity, professional duty, and social responsibility. Throughout the document the primary core values that support specific principles are indicated in parentheses. Unless a specific role is indicated in the principle, the duties and obligations being delineated pertain to the five roles of the physical therapist. Fundamental to the Code of Ethics is the special obligation of physical therapists to empower, educate, and enable those with impairments, activity limitations, participation restrictions, and disabilities to facilitate greater independence, health, wellness, and enhanced quality of life.
Principle #1: Physical therapists shall respect the inherent dignity and rights of all individuals.
(Core Values: Compassion, Integrity)
   1A. Physical therapists shall act in a respectful manner toward each person regardless of age, gender, race, nationality, religion, ethnicity, social or economic status, sexual orientation, health condition, or disability.
   1B. Physical therapists shall recognize their personal biases and shall not discriminate against others in physical therapist practice, consultation, education, research, and administration.

Principle #2: Physical therapists shall be trustworthy and compassionate in addressing the rights and needs of patients/clients.
(Core Values: Altruism, Compassion, Professional Duty)
   2A. Physical therapists shall adhere to the core values of the profession and shall act in the best interests of patients/clients over the interests of the physical therapist.
   2B. Physical therapists shall provide physical therapy services with compassionate and caring behaviors that incorporate the individual and cultural differences of patients/clients.
   2C. Physical therapists shall provide the information necessary to allow patients or their surrogates to make informed decisions about physical therapy care or participation in clinical research.
   2D. Physical therapists shall collaborate with patients/clients to empower them in decisions about their health care.
   2E. Physical therapists shall protect confidential patient/client information and may disclose confidential information to appropriate authorities only when allowed or as required by law.

Principle #3: Physical therapists shall be accountable for making sound professional judgments.
(Core Values: Excellence, Integrity)
   3A. Physical therapists shall demonstrate independent and objective professional judgment in the patient’s/client’s best interest in all practice settings.
   3B. Physical therapists shall demonstrate professional judgment informed by professional standards, evidence (including current literature and established best practice), practitioner experience, and patient/client values.
   3C. Physical therapists shall make judgments within their scope of practice and level of expertise and shall communicate with, collaborate with, or refer to peers or other health care professionals when necessary.
   3D. Physical therapists shall not engage in conflicts of interest that interfere with professional judgment.
   3E. Physical therapists shall provide appropriate direction of and communication with physical therapist assistants and support personnel.
Principle #4: Physical therapists shall demonstrate integrity in their relationships with patients/clients, families, colleagues, students, research participants, other health care providers, employers, payers, and the public.

(Core Value: Integrity)
4A. Physical therapists shall provide truthful, accurate, and relevant information and shall not make misleading representations.
4B. Physical therapists shall not exploit persons over whom they have supervisory, evaluative or other authority (e.g., patients/clients, students, supervisees, research participants, or employees).
4C. Physical therapists shall discourage misconduct by health care professionals and report illegal or unethical acts to the relevant authority, when appropriate.
4D. Physical therapists shall report suspected cases of abuse involving children or vulnerable adults to the appropriate authority, subject to law.
4E. Physical therapists shall not engage in any sexual relationship with any of their patients/clients, supervisees, or students.
4F. Physical therapists shall not harass anyone verbally, physically, emotionally, or sexually.

Principle #5: Physical therapists shall fulfill their legal and professional obligations.
(Core Values: Professional Duty, Accountability)
5A. Physical therapists shall comply with applicable local, state, and federal laws and regulations.
5B. Physical therapists shall have primary responsibility for supervision of physical therapist assistants and support personnel.
5C. Physical therapists involved in research shall abide by accepted standards governing protection of research participants.
5D. Physical therapists shall encourage colleagues with physical, psychological, or substance-related impairments that may adversely impact their professional responsibilities to seek assistance or counsel.
5E. Physical therapists who have knowledge that a colleague is unable to perform their professional responsibilities with reasonable skill and safety shall report this information to the appropriate authority.
5F. Physical therapists shall provide notice and information about alternatives for obtaining care in the event the physical therapist terminates the provider relationship while the patient/client continues to need physical therapy services.

Principle #6: Physical therapists shall enhance their expertise through the lifelong acquisition and refinement of knowledge, skills, abilities, and professional behaviors.
(Core Value: Excellence)
6A. Physical therapists shall achieve and maintain professional competence.
6B. Physical therapists shall take responsibility for their professional development based on critical self-assessment and reflection on changes in physical therapist practice, education, health care delivery, and technology.
6C. Physical therapists shall evaluate the strength of evidence and applicability of content presented during professional development activities before integrating the content or techniques into practice.
6D. Physical therapists shall cultivate practice environments that support professional development, lifelong learning, and excellence.

**Principle #7:** Physical therapists shall promote organizational behaviors and business practices that benefit patients/clients and society.

*(Core Values: Integrity, Accountability)*

7A. Physical therapists shall promote practice environments that support autonomous and accountable professional judgments.

7B. Physical therapists shall seek remuneration as is deserved and reasonable for physical therapist services.

7C. Physical therapists shall not accept gifts or other considerations that influence or give an appearance of influencing their professional judgment.

7D. Physical therapists shall fully disclose any financial interest they have in products or services that they recommend to patients/clients.

7E. Physical therapists shall be aware of charges and shall ensure that documentation and coding for physical therapy services accurately reflect the nature and extent of the services provided.

7F. Physical therapists shall refrain from employment arrangements, or other arrangements, that prevent physical therapists from fulfilling professional obligations to patients/clients.

**Principle #8:** Physical therapists shall participate in efforts to meet the health needs of people locally, nationally, or globally.

*(Core Value: Social Responsibility)*

8A. Physical therapists shall provide pro bono physical therapy services or support organizations that meet the health needs of people who are economically disadvantaged, uninsured, and underinsured.

8B. Physical therapists shall advocate to reduce health disparities and health care inequities, improve access to health care services, and address the health, wellness, and preventive health care needs of people.

8C. Physical therapists shall be responsible stewards of health care resources and shall avoid overutilization or underutilization of physical therapy services.

8D. Physical therapists shall educate members of the public about the benefits of physical therapy and the unique role of the physical therapist.
Professional Behaviors

The UNLVPT faculty supports the expectations that students demonstrate professional behaviors in the Professional Behaviors which have been adopted by the APTA as part of the Normative Model of Physical Therapist professional education. The Professional Behaviors include the following assumptions: “The process of becoming socialized into a profession requires hard work and takes a long time; therefore, it must begin early.” The faculty of UNLVPT agrees that professional growth should begin early during student didactic education and then progress throughout the curriculum. These professional behaviors, when coupled with a core of knowledge and skills, are essential to success in physical therapy. As such, the UNLVPT faculty has an expectation that students are making progress in the generic abilities throughout the curriculum. Entry level behavior in each of the generic abilities is expected by the completion of the final clinical experience.

Generic abilities are attributes, characteristics or behaviors that are not explicitly part of the profession’s core of knowledge and technical skills but are nevertheless important elements for success in the profession. UNLVPT places emphasis on these ten generic abilities:

1. **Commitment to Learning**
   The ability to self-assess, self-correct, and self-direct; to identify needs and sources of learning; and to continually seek new knowledge and understanding.
   - Reads articles critically and understands limits of application to professional practice
   - Demonstrates a positive attitude (motivation) towards learning
   - Monitors own progress
   - Takes a collaborative approach
   - Seeks assistance from professors or peers regarding difficult concepts
   - Demonstrates initiative towards learning
   - Demonstrates equal participation in progression and completion of group projects

2. **Interpersonal Skills**
   The ability to interact effectively with patients, families, colleagues, other health care professionals, and the community and to deal effectively with cultural and ethnic diversity issues.
   - Maintains professional demeanor in all clinical and classroom interactions
   - Recognizes impact of verbal and non-verbal communication and modifies all communication to meet situational needs.
   - Listens actively and uses appropriate body language
   - Assumes responsibility for mistakes, apologizes
   - Demonstrates interest and ability to work with peers in a group process/project
3. **Communication Skills**
*The ability to communicate effectively (i.e., speaking, body language, reading, writing, listening) for varied audiences and purposes.*
- Demonstrates basic English skills
- Presents verbal or written message with logical organization and sequencing

4. **Effective Use of Time**
*The ability to obtain the maximum benefit from a minimum investment of time and resources.*
- Meets external deadlines
- Demonstrates flexibility and adaptability
- Sets priorities
- Sets realistic goals
- Utilizing university library resources
- Utilizes time wisely outside of class and clinic

5. **Use of Constructive Feedback**
*The ability to identify sources of feedback and seek out feedback and to effectively use and provide feedback for improving personal interaction.*
- Actively seeks feedback and help
- Demonstrates a positive attitude towards feedback
- Critiques own performance
- Integrates feedback for positive change in growth

6. **Problem Solving**
*The ability to recognize and define problems, analyze data, develop and implement solutions, and evaluate.*
- Recognizes problems and prioritizes them
- States problems clearly
- Can identify solutions to the problem or resources needed to develop solutions

7. **Professionalism**
*The ability to exhibit appropriate professional conduct and to represent the profession effectively.*
- Projects professional image
- Continuous positive regard for all
- Abides by APTA code of Ethics and standards of practice
- Follows state licensure regulations
- Abides by facility policies and procedures
- Abides by university and department policies and procedures
- Demonstrates involvement in and commitment to local and national chapters of the APTA
- Contributing creatively to classroom and community projects on a regular basis
8. **Responsibility**

The ability to fulfill commitments and to be accountable for actions and outcomes.

- Demonstrates dependability
- Demonstrates punctuality
- Fulfills commitments
- Budgets time wisely
- Accepts responsibility for actions and outcomes
- Provides safe and secure environment for patients

9. **Critical Thinking**

The ability to question logically; to identify, generate, and evaluate elements of a logical argument; to recognize and differentiate facts, illusions, assumptions, and hidden assumptions; and to distinguish the relevant from the irrelevant.

- Raises relevant questions
- Understands and accepts scientific method
- Thinks analytically
- Uses information effectively
- Formulates alternate hypotheses
- Critiques solutions
- Feels challenged to understand and solve problems

10. **Stress Management**

The ability to identify sources of stress and to develop effective coping behaviors.

- Recognizes own stressors or problems
- Recognizes distress or problems in others
- Seeks assistance as needed
- Maintains professional demeanor in all situations
- Maintains balance between professional and personal life
- Demonstrates effective affective responses in all situations
- Accepts constructive feedback
- Establishes outlets to cope with stressors
- Prioritizes multiple commitments
- Responds calmly to urgent situations
- Recognizes when problems are insolvable
- Assists others in recognizing stressors
- Demonstrates preventative approach to stress management
- Establishes support network for self and clients
- Offers solutions to the reduction of stress within the work environment
