Experimental Psychology Ph.D. Program Handbook

Welcome
The Experimental Psychology Ph.D. Program faculty is dedicated to students’ successful progression and completion of the program. This handbook is an important reference for all new and current students as they navigate through the program.

Mission Statement
The UNLV experimental psychology doctoral program trains students to become psychological scientists capable of conducting independent research that meets international standards of scientific excellence. Upon completing the degree, students will be qualified to seek careers conducting research in academia and other institutional and applied settings. Areas of research in which faculty supervise students are: cognitive psychology, developmental psychology, neuroscience, and quantitative/experimental. The program operates on a mentor model in which students work under the supervision of an identified faculty mentor. We welcome students from diverse backgrounds and encourage research in topics related to multiculturalism and diversity.

Purpose
The purpose of this handbook is to provide program specific information that is not found in the UNLV Graduate Catalog. Students are responsible for understanding and following the policies and procedures delineated in this document and the UNLV Graduate Catalog, as well as the NSHE Code, UNLV Bylaws, and the UNLV Student Conduct Code. Questions about policies should be directed to the Graduate College: valarie.burke@unlv.edu or kendall.hartley@unlv.edu.

Department Graduate Faculty
A current listing of the graduate faculty can be found in the UNLV Graduate Catalog. Faculty must hold either associate or full graduate faculty status to be involved in graduate education at UNLV. For up to date information regarding graduate faculty status in your department, visit the Graduate Faculty status web page.

**Program Requirements**

Program requirements regarding admission, coursework and culminating experience are found in the graduate catalog.

The Experimental Psychology Doctoral Program is designed as a four to six year program. See Program Timeline. It is important to note that in accordance with the Graduate College policy, students must complete all the requirements for the Master’s degree in six years and the doctoral degree within eight years or face separation from the program.

**Mentor Model**

The Experimental Psychology Program operates on a mentor model. The mentor serves as a guide and academic advisor to the student’s graduate study, as a research supervisor, as a supervisor of the student’s professional development, and as a professional role model. Students are expected to participate in their mentor’s research group and may participate in other faculty research groups when they have overlapping interests. The mentor should be the first person contacted to answer questions about the program and professional issues. Students may switch mentors with the consent of the new mentor and the Experimental Psychology Program Director. If another faculty member agrees to mentor the student, the student must submit a Change of Advisor form to the Experimental Psychology Program Director.

**Advisory Committee Guidelines**

**Selection of Thesis and Dissertation Committees**

The student selects a four-person committee in consultation with the mentor. The committee consists of the mentor and three additional graduate faculty members, one who is not from the Department of Psychology and serves as the Graduate College Representative. Completion of the Advisory Committee Approval form occurs when all committee members are selected.

**Selection of Qualifying Activity Committee**

The student selects a three-person committee in consultation with the mentor. The committee consists of the mentor and two additional graduate faculty members.

**Degree Program Benchmarks**

**Master’s Thesis**

The purpose of the master’s project is to involve first and second year students in all phases of the design, execution, analysis, interpretation, and communication of research.

**Proposal Development**

Proposal development typically occurs throughout the first year. The topic is developed with the mentor and in consultation with committee members (as needed), proposal drafts are written and revised (and revised again), and pilot data are collected (as necessary). The final proposal draft should be submitted to committee members at least two weeks prior to the scheduled master’s proposal meeting. Prior to the proposal meeting, the student should complete the Program of Study form.

**Master’s Thesis Proposal Meeting**

During the Master’s Thesis proposal meeting, committee members ask questions and give feedback regarding the design of the master’s project. Normally, the student provides a brief overview of the introduction section and more detailed presentations of the hypothesis and research design. The student should be able to answer questions and clarify design issues. Following questions, the student is asked to leave the room and the committee decides whether the student passes or fails the proposal meeting. Following committee deliberations, the student is then invited back to the meeting and is informed of the committee’s decisions. In the case of failure, the student is required to schedule a second proposal meeting after addressing the issues that resulted in failure.
Master’s Thesis Defense Meeting

A student's advisor is expected to have approved the draft of the thesis prior to it being distributed to other committee members. Students are expected to give the approved draft of the thesis to committee members at least two weeks prior to the scheduled defense. The scheduled defense could be postponed if one or more committee members judge the draft to be subpar. Committee members are encouraged to notify the committee chair in this regard. Additionally, two weeks prior to the defense meeting, the student provides a copy of the final draft of the thesis along with the date and time of the defense meeting to the Psychology Department front office.

The defense meeting is a formal presentation of the major research questions, results, and interpretations of the thesis. The oral presentation is open to UNLV Graduate Faculty, graduate students, relevant administrators, and invited guests. The advisory committee chair must approve any invited guests prior to the defense. The oral presentation may be followed by general questions of clarification from attendees other than the advisory committee members. The advisory committee and chair may choose to include a session of more in-depth questioning open only to the advisory committee and the UNLV Graduate Faculty. The final phase of closed deliberation, and the vote to pass or fail the student, will only be open to the student’s appointed advisory committee.

During the oral defense, the student must be able to demonstrate a comprehensive understanding of a broad field of study and a detailed understanding of a more limited field. The advisory committee must unanimously pass the student. If the committee does not unanimously pass the defense, the student may request the committee to administer a second examination. If the committee agrees to another examination, the student must wait at least three months before taking the second examination. The program may require additional course work, substantial reworking of the thesis or project or whatever is believed necessary to prepare the student for the second examination. The Graduate College will not approve third examination requests.

Qualifying Activities

Students during the third year of graduate studies must complete a qualifying activity before advancing to doctoral candidacy and prior to proposing the dissertation. It is advisable that the student begins this activity immediately after the Master’s Thesis defense. The purpose of the activity is for the student to acquire not only the expertise in a given area, but also the ability to explain, discuss, and debate questions within that and related areas. Students may opt to enroll in PSY 772: Experimental Psychology Qualifying Paper Research while completing their qualifying activity, although enrollment is not required. Students may choose, in consultation with their advisor, from the following qualifying activities.

Option 1. Qualifying Paper

In option one, the student will write a paper that reviews and integrates relevant knowledge and research related to the student’s area of specialization. Although there are no page requirements for the paper, successful papers typically range between 30 and 50 pages.

The student will identify the topic and specific material to be covered in the paper. Prior to beginning the paper, the student will circulate a proposed format for the paper, a mission statement, and a reading list to committee members and obtain their approval using the Qualifying Activity Topic Approval form. A typical reading list contains approximately 100 references. An initial meeting with the committee is not required. When the committee approves the qualifying paper topic and reading list, students have six months to complete and defend the paper. Failure to complete the qualifying paper may result in separation from the program.

Once the final draft of the qualifying paper is completed, the student will schedule a meeting with the committee, and circulate a copy of the final draft to the committee members at least two weeks before the meeting. The committee and student will agree upon the format of the defense prior to the meeting. Typically the student gives a brief presentation that is followed by a question and answer period. The defense of the qualifying paper will serve as an opportunity for the student to demonstrate his or her expertise. Committee deliberations will follow the presentation, for which the student is not present, and committee members will complete the Qualifying Activity Defense form.
Option 2. Three Brief Papers
In option two, the student will write three shorter papers that review and integrate relevant knowledge and research related to the student’s area of specialization. Although there are no page requirements for the papers, successful papers typically range between 10 pages and 20 pages (each). The reading list for each of the three papers typically contains about 33 references. The student should follow the same procedures specified for the longer qualifying paper option.

Option 3. Written Exam
In option three, the student will complete a qualifying examination that requires the student to integrate relevant knowledge and research related to the area of specialization. Typically, the exam will consist of three consecutive days of in-class testing. On each day of the exam period, students will be given four questions from one committee member; students will be required to answer three of those questions within a five-hour period.

Prior to beginning the activity, the student will circulate a proposed mission statement and a reading list to committee members and obtain their approval for the topics. A typical reading list contains approximately 100 references. When the committee approves the procedures for the qualifying exam, students have six months to complete the exam.

Committee members may read and comment on all responses. Each committee member, however, will evaluate responses to the questions he or she submitted. Committee members are expected to evaluate responses within a week of the exam.

Failure to pass qualifying activities
If a student fails to pass the qualifying activity, the committee will determine the specific remedial requirements (e.g., further exam questions, paper revisions, etc.). Students are expected to pass the qualifying activity on their first attempt, but may be given up to three attempts to pass before dismissal from the program. The student is expected to work independently on these remedial requirements.

Doctoral Dissertation
The dissertation procedures are similar to the thesis procedures. Compared to preparing a master’s thesis, however, the student preparing a dissertation should have a much more active and leading role in conceptualizing the research problem and developing and applying the methods to study the problem.

Proposal Development
The topic is developed with the mentor and in consultation with committee members (as needed), proposal drafts are written and revised (and revised again), and pilot data are collected (as necessary). The final proposal draft should be submitted to committee members at least two weeks prior to the scheduled dissertation proposal meeting.

An alternative to fulfilling the dissertation requirement is the multiple article dissertation. If proposing this option, the student should have a minimum of three under-review, in-press, or published articles reporting on empirical research undertaken as a doctoral student at UNLV; literature review articles or articles reporting master’s thesis data are not acceptable for this option. In addition to the requirements outlined by the Graduate College, at least one of the articles should be in press or published. The articles to be included for the multiple article dissertation should be submitted to committee members at least two weeks prior to the scheduled dissertation proposal meeting along with documentation of the student’s contribution to the research.

Prior to the proposal meeting, the student should complete the graduate school’s Program of Study form.

Dissertation Proposal Meeting
During the dissertation proposal meeting, committee members ask questions and give feedback regarding the design of the dissertation project. Normally, the student provides a brief overview of the
introduction section and more detailed presentations of the hypothesis and research design. The student should be able to answer questions and clarify design issues. For the multiple article dissertation option, the student should also present how the research is related across the publications and her/his contribution to the empirical research, so the committee can determine whether it was substantial enough to include it in the dissertation.

Following questions, the student is asked to leave the room and the committee decides whether the student passes or fails the proposal meeting. Following committee deliberations, the student is then invited back to the meeting and informed of the committee’s decisions. Note that the committee can request additional data or changes to the proposal for the traditional dissertation or multiple article dissertation. In the case of failure, the student is required to schedule a second proposal meeting after addressing the issues that resulted in failure.

Dissertation Defense Meeting
A student’s advisor is expected to have approved the draft of the dissertation prior to it being distributed to other committee members. For the multiple article dissertation, the student should include an introductory chapter, a concluding chapter, and bridge sections introducing and linking each of the articles to form a cohesive document. Students are expected to give the approved draft of the dissertation to committee members at least two weeks prior to the scheduled defense. The scheduled defense could be postponed if one or more committee members judge the draft to be subpar. Committee members are encouraged to notify the committee chair in this regard. Additionally, two weeks prior to the defense meeting, the student notifies the Psychology Department front office of the date and time of the defense and provides a copy of the final draft of the dissertation that is available for review.

The defense meeting is a formal presentation of the major research questions, results, and interpretations of the dissertation. The oral presentation is open to UNLV Graduate Faculty, graduate students, relevant administrators, and invited guests. The advisory committee chair must approve invited guests prior to the defense. The oral presentation may be followed by general questions of clarification from attendees [other than the advisory committee members]. The advisory committee chair may choose to include a session of more in-depth questioning open only to the advisory committee and the UNLV Graduate Faculty. An additional phase of questioning with only the advisory committee and candidate may also be included. The final phase of closed deliberation, and the vote to pass or fail the student, will only be open to the student’s appointed advisory committee.

During the oral defense, the student must be able to demonstrate a comprehensive understanding of a broad field of study and a detailed understanding of a more limited field. The advisory committee must unanimously pass the student. If the committee does not unanimously pass the student, the student may request the committee to administer a second examination. If the committee agrees to another examination, the student must wait at least three months before taking the second examination. The program may require additional course work, substantial reworking of the dissertation or project or whatever is believed necessary to prepare the student for the second examination. The Graduate College will not approve third examination requests.

Note that the recommended deadlines are when students should ideally complete the milestone. If a student fails to complete a milestone by the probation date, the Experimental Program Coordinator will recommend to the Graduate College that the student be placed on probation. Terms to end probation will be determined in consultation with the mentor and Experimental Program faculty. If the student fails to meet those terms, the Experimental Program Coordinator will recommend to the Graduate College that the student be separated from the program.

Students can petition the Experimental Psychology Ph.D. Program for an extension of the deadlines in the event of extenuating circumstances (e.g., illness, disability, or publication productivity).

The Experimental Psychology Ph.D. Program faculty conducts an annual evaluation of students and provides feedback on their progress through the milestones via a letter from the Experimental Program Coordinator, which will include reminders of upcoming deadlines.

**Professional Code of Ethics/Discipline Guidelines**

UNLV Graduate College policy regarding academic integrity can be found in the graduate catalog. The Experimental Psychology Doctoral Program endorses the American Psychological Association Ethical Principles of Psychologists and Code of Conduct. It is expected that all students adhere to these ethical standards in their roles as graduate students and graduate assistants.

**Annual Review Procedures**

Students are required to make adequate yearly progress towards degree completion. The Experimental Psychology faculty conducts annual reviews of all Experimental Psychology students. During each year that the student is part of the program, the Program Coordinator will write a formal letter of evaluation for each student conveying the recommendations of the program faculty. The mentor and student will review and sign the letter, which will subsequently be placed in the student's personnel file. Prior to the review, Experimental Psychology students are required to complete an Annual Evaluation each year they are in the program.

Students will be evaluated at least yearly in the following three areas: (1) academic performance; (2) scholarly research activity; and (3) ethical behavior and professional conduct. If the program determines that a student is not making satisfactory progress toward the degree, it may request the Graduate College Dean to place the student on probation. Failure to meet the conditions of the probation will result in separation from the program.

**Academic Performance**

Students must obtain a grade of B- or better in each course taken for that course to count toward the degree. All students must maintain an overall GPA of at least 3.0. One grade below a B- (i.e., C+ or lower) will result in academic probation. Once on probation for receiving a grade below a B-, a second grade below a B- (in the same or a different class) will result in immediate separation from the program. If a student re-takes a course in which s/he received a grade lower than a B- (i.e., C+ or lower) and earns a B- or better, s/he will be removed from probation. A student may be on academic probation only twice during their graduate career in Psychology; a third probation will result in separation from the program. No student shall be allowed more than two simultaneous grades of incomplete, except in the case of a documented and approved medical leave.

**Scholarly and Research Performance**

Scholarly and research activities include participation in faculty research projects, as well as the master's project, the doctoral dissertation, and other individual research projects. Both master's level and doctoral research are monitored and evaluated by the appropriate committee. Failure to make adequate progress on any of these projects will result in separation from the program.
Additional Program Information

Psychology Graduate Research Conference
Each third-year graduate student is expected to participate in the research conference that normally occurs each year during the Spring semester. The research conference allows the student an opportunity to present their Master's thesis or other research project in a psychology conference format. First- and second-year graduate students are also expected to attend. When the student has fulfilled this requirement, please complete the Graduate Research Conference Participation form.

Teaching of Psychology Course
Individuals who are part-time graduate assistant instructors (PTI-GAs; third-year graduate students and/or those who have completed their Master's thesis) are required to complete the Teaching of Psychology course. PTI-GAs normally teach two sections of General Psychology (PSY 101) each semester for two semesters. The Teaching of Psychology course must either be taken concurrently or completed prior to serving as an instructor in any course. After completing the Teaching of Psychology course and teaching General Psychology for one year, PTI-GAs may petition the department to teach other undergraduate Psychology courses (e.g., Research Methods, Social Psychology, etc.) if their PTI GA positions are renewed for a second year.

Transfer/waiver of Credits
Note that as per the Graduate College Transfer Credit Request Form, no credits used to earn any other degree at UNLV or elsewhere can be applied toward fulfilling the required credit requirements for UNLV's Experimental Psychology Ph.D. Program. Required courses for the Ph.D. can be waived, if approved, but the student must complete those credits via a different course.

All transfer of credits or waivers of course requirements are contingent upon approval of the Experimental Psychology Program Steering Committee after consulting with relevant faculty, if applicable. To request transfer credits, the student must complete the Transfer Credits/Waiver of Course Requirements form and submit it along with relevant supporting materials (e.g., syllabi) to the Program Director. Students who received a Master's degree at another institution and completed a Master's thesis pursuant to the completion of that degree may petition to have their thesis accepted to fulfill the Master's thesis requirement of the Experimental Psychology Doctoral Program. Requests for transfer credits and waiver of program requirements must be made in the first two years of graduate study.

The process for requesting transfer credit or waiver of program requirements is outlined in the following four scenarios. Note that a Master's degree in the following scenarios equals a minimum of 33 credits.

Scenario 1 applies to students who have a Master's degree with a thesis, and the Experimental Program Steering Committee has accepted the thesis. For experimental incoming students, if the M.A. is accepted, the student should follow the subplan requirements for post-master's students as noted in the graduate catalog for the emphasis track. In this scenario, a Master's degree from UNLV will not be awarded.

Scenario 2 applies when a student has a Master's degree with no completed thesis, or a Master's degree with a completed thesis that the Experimental Program Steering Committee has not accepted. For these incoming students, a maximum of 13 credits may be waived. Experimental students, however, must meet the residency requirement of 14 graduate credits plus 6 thesis credits (20 total) taken at UNLV for the Master's Degree. These students must also complete the thesis. Upon successful completion of these requirements, students will receive a Master's degree from UNLV.

Scenario 3 applies when students have former graduate status, such as graduate classes previously taken at another institution, but have not received a graduate degree from that institution. For these incoming students, a maximum of 9 credits may be transferred toward the Master's degree from UNLV.
Scenario 4 applies when a student has taken graduate level coursework at UNLV, but has not matriculated into the Experimental Psychology Doctoral Program. Up to 15 credits can be transferred toward fulfillment of the Master’s degree requirement.

Graduate Assistantships
Some students accepted into the Experimental Doctoral Program will be offered Graduate Assistantships, which are intended to help support students in their graduate work and provide relevant work experiences. Graduate Assistantships are provided to the department and approved by the Graduate College. These positions are available on a competitive basis and typically include a nine-month stipend plus tuition, fee waivers, and optional student health insurance. Graduate assistants must enroll in and maintain a minimum of 6 semester hours of graduate credit and are expected to spend 20 hours per week on departmental duties such as instruction and/or research.

Outside Employment
Individuals who are not graduate assistants may establish and maintain outside employment as long as they are still making adequate progress in the program. Those students who are receiving graduate assistant support from the University in any fashion (e.g., assistantship, grant) will be able to obtain outside employment only with the permission of the Psychology Department and Graduate College. In any case, for those students with graduate assistantships, employment must not exceed 10 hours per week. Prior to beginning any outside employment, the student must have approval from the student’s advisor, the Experimental Psychology Program Director, and the Graduate Dean.

Conflict Resolution Policy
Examples of conflicts include, but are not limited to, the following: having a department policy applied inappropriately, being required to complete inappropriate tasks as part of an assistantship, being improperly terminated from a program, and being required to meet unreasonable requirements for a degree. Conflicts are usually most effectively resolved at the lowest level; students are therefore encouraged to work out conflicts directly with the persons involved. If a student is unable to resolve a conflict in this manner, or feels that he or she is being treated unfairly, he or she is encouraged to discuss the concerns with any member of the faculty, Experimental Psychology Program Coordinator, or the Department Chair. (If the Director of Experimental Psychology Program Coordinator and/or the Department Chair are involved in the conflict, the student can discuss his or her concerns directly with the Associate Dean of the College of Liberal Arts.) If the conflict is not resolved in this manner, the student may file a formal appeal with the Dean of the College of Liberal Arts and then the Graduate College Dean.

Discipline Resources
Publication Manual of the American Psychological Association, Sixth Edition
American Psychological Association
Association for Psychological Science

University Resources
Academic Success Center
The goal of the Academic Success Center is to help students do well academically and complete their studies on time. They offer or will refer you to such programs and resources as tutoring, advising, skills testing, career exploration and more. They guide students every step of the way to the many established resources created to ensure they complete their educational goals. Learn more about the programs and services the center currently offers.

Alumni Association
With an alumni base 90,000 strong, the UNLV Alumni Association offers a variety of services and opportunities in support of alumni and their families. UNLV alumni are encouraged to support the values of higher learning through advocacy, involvement, and giving.

Commencement Office
Located in the UNLV Registrar’s Office, the commencement office is the last step in the graduation process. Please check with the commencement office for information on the commencement
ceremony and your diploma; for all other information about graduate student degree completion and graduation, including thesis/dissertation requirements and doctoral hooding, please contact the Graduate College.

Office of Diversity Initiatives
The vision of the Office of Diversity Initiatives is to advocate, promote, and support the advancement of equity, inclusiveness, and empowerment of a continuously changing collegiate and global community. The mission of the Office of Diversity Initiatives is to provide leadership and support for UNLV’s diversity mission: to nurture equity, diversity, and inclusiveness that promotes respect, support, and empowerment. This Office also handles UNLV Title IX questions, inquiries, and reporting.

Disability Resource Center (DRC)
The DRC is committed to supporting students with disabilities at UNLV through the appropriate use of advocacy, accommodations, and supportive services to ensure access to campus courses, services, and activities. The DRC is the university-designated office that determines and facilitates reasonable accommodations in compliance with the Americans with Disabilities Act (ADA) and Section 504 of the Rehabilitation Act of 1973. Graduate students with disabilities must disclose to the DRC in order to receive appropriate accommodations.

Office of International Student and Scholars
International Students and Scholars (ISS) ensures compliance with both SEVIS (Student and Exchange Visitor Information System) and federal law, so that the university can continue to be authorized by the U.S. federal government to enroll international students; host and hire international scholars; assist and advise employment eligibility and authorization relating to international students and scholars, and visa, travel, and immigration issues; provide critical and specialized services to the international students and scholars of the UNLV community; and facilitate their transition to the campus and the U.S.

Jean Nidetch Women's Center
The Jean Nidetch Women’s Center is committed to creating a supportive and inclusive environment for all genders through programming, services, and advocacy for the UNLV community. The Women’s Center has informational resources, brochures, and flyers for a variety of on and off campus organizations to help empower and protect yourself, and learn about your options. They also provide free tampons, pads, and condoms.

UNLV Libraries
UNLV Libraries has always been more than books; they are about encouraging students and creating quality programs that elevate growth and learning. Please visit their website for important information about the services they offer to graduate students.

Graduate & Professional Student Association (GPSA)
The Graduate & Professional Student Association serves all currently enrolled University of Nevada, Las Vegas graduate and professional students. The GPSA maintains the Graduate Student Commons located in the Lied Library room 2141. The facility a working office equipped with a copier, fax, flatbed scanners, color laser printer, office supplies, and computers with printers and a small kitchen area. The GPSA is the graduate student governance body at UNLV; the GPSA Council consists of one graduate student representative from each graduate department, and they meet monthly. The GPSA also provides volunteer opportunities, sponsors social events, and supports graduate student research through the graduate research and travel grants program.

Office of Student Conduct
The Office of Student Conduct is a student-centered, service-oriented office located within the Division of Student Affairs. The Office of Student Conduct collaborates with the UNLV community to provide an inclusive system through enforcement of the UNLV Student Code of Conduct by:

- Promoting awareness of student rights and responsibilities;
- Establishing accountability for student choices;
- Creating opportunities for involvement in the process; and
• Striving to uphold the values and ethics that advance the common good.

Office of Veteran Services
The UNLV Office of Veteran Services is staffed with veterans and GI Bill-experienced staff to assist more than 1,000 veterans, dependents, active duty service members, National Guard members, and reservists. Their mission is to develop a welcoming, veteran-friendly campus environment that fosters academic and personal success.

The Financial Aid & Scholarships Office
The Financial Aid & Scholarships Office supports higher-education access and persistence by providing financial aid to eligible students. The office partners with student organizations, the UNLV Foundation, the Graduate College, and other external constituents to provide financial aid learning opportunities and scholarship support for graduate students.

Writing Center
This is a free service to UNLV students to help you with any writing project, from papers to creative writing, to resumes, and we can work with you at any stage of the writing process. The center can help you brainstorm, make an outline, work on your drafts, or just be a soundboard for your ideas. The center staff can assist you in person, or via the Online Writing Lab (OWL) page.

University Policies and Procedures
Graduate students are responsible for knowing and acting in accordance with UNLV Policies and Procedures. To view the most commonly referenced campus policies and procedures, you can refer to the following websites:
- Academic Integrity
- Activation for Military Service
- Change of Address
- FERPA/Privacy Rights
- Health Insurance - Mandatory
- Jeanne Clery Campus Safety and Security Report
- Proof of Immunization
- Policies and Procedures on the Protection of Research Subjects
- Rebelmail Policy
- Student Conduct Code
- Student Computer Use Policy
- Title IX

To ensure compliance with Graduate College policies and procedures, please review the relevant sections of the Graduate Catalog:
- Academic Calendar
- Academic Policies
- Admission and Registration Information
- Degree Progression Policies & Procedures

In addition, the Graduate College website contains additional information regarding policies and procedures.

Nothing in this handbook supersedes any NSHE, UNLV, or Graduate College policy.
