

## **The Forensics Community**

There are numerous journals and websites solely dedicated to forensics. The journals publish peer reviewed research articles that have reliable information on current issues in the field of forensics. These journals, as well as other scientific journals are important to forensic scientists because they can assist in their findings and research.

### Examples of such journals are:

The Open Forensic Science Journal

(<http://www.bentham.org/open/toforsj/>)

The Internet Journal of Forensic Science

([http://www.ispub.com/journal/the\\_internet\\_journal\\_of\\_forensic\\_science.html](http://www.ispub.com/journal/the_internet_journal_of_forensic_science.html))

Forensic Science Communications (an open access journal from the FBI)

(<http://www.fbi.gov/about-us/lab/forensic-science-communications/forensic-science-communications-april-2010>)

### Examples of some websites are:

Young Forensics Scientists Forum

(<http://www.aafs.org/young-forensics-scientists-forum>)

Bureau of Labor Statistics

(<http://www.bls.gov/oco/ocos115.htm>)

Las Vegas Metropolitan Police Department Internship Program

([http://www.lvmpd.com/employment/internship\\_program.html](http://www.lvmpd.com/employment/internship_program.html))

By Diana Ha, Undergraduate, UNLV

More information and websites pertaining to forensics can be found on University of California, Santa Barbara's Forensic Science Resources Website: <http://www.library.ucsb.edu/istl/03-spring/internet.html>
