

Academic Progress Report

The current status of UNLV's Academic Progress Rate is that every team continues to maintain a 930+ multi-year score and remains penalty-free. Student-Athlete Academic Services (SAAS) keeps a close eye on all sports, but especially the sports who are closer to falling below a 930 (i.e. Football, Men's Basketball, Men's Tennis, Baseball, Men's Soccer, Women's Cross Country).

On a regular basis, SAAS works with and communicates concerns and/or suggestions for increasing the scores with coaches and athletic administrators. SAAS provides APR projection reports at the end of each semester, along with additional reports, when notified of a potential change and could affect the score (i.e. potential transferring, professional departures, academic eligibility, etc). The APR Committee continues to meet on a need basis, but at least once a year, to address the current status of all teams and efforts to improve scores.

On a high note, most of our team's APR scores continue to grow, including Women's Golf and Women's Tennis, who will be posting a perfect 1000 multi-year score.
