Majoring in biological sciences with a concentration in cell and molecular biology provides students with intellectual tools essential in a broad array of life science careers. Specifically, this degree provides students with information vital to careers in biotechnology and biomedical sciences research as well as for transition to PhD programs in Biology and Cell and Molecular Biomedical Research.

Students concentrating in cell and molecular biology should also be able to explain the interrelationship between chemistry and biology, including how physical and chemical laws influence the structure and function of intracellular components and macromolecules.

**SKILLS**
