

BS Biology w/Cell and Molecular Concentration 2016-2017

School of Life Sciences

Catalog Year: Fall 2016 - 2017 ♦ Catalog Expires: Summer 2027 ♦ Graduation: Spring 2020

Biological Sciences majors must complete BIOL 196, BIOL 197, CHEM 121A, 121L, CHEM 122A, 122L, MATH 181 or MATH 127 or MATH 128, ENG 102 or ENG 114 or HON 100 with a C or better (C- is not sufficient) as prerequisites for enrollment in any upper division biology course.

		UNLV	College
		120 Total credits	40 credits 300-400 level
General Education	First Year Seminar	2	
	Second Year Seminar	3	
	ENG 101 English Composition I	3	
	ENG 102 English Composition II	3

	BIOL 196 Modern Biology I	4	
	BIOL 197 Modern Biology II	4	
	BIOL 351 Microbiology	4	4
	BIOL 300 Genetics OR BIOL 304 Molec Genetics	4	4
	BIOL 415 Evolution	3	3
	Biology Upper Division: at least 24 credits		
	CHEM 475 Biochemistry II	3	3
	A minimum of four (4) courses from BIOL 405, 409, 425, 445, 453, 460, 464, 466, 470, 478	12	12
	Remaining credits (to total 24) selected from course focus lists with a minimum of one course from each list A - C	9	9
	<i>Up to 4 credits of BIOL 492 may be used toward concentration total of 24 credits. Up to 2 credits total of BIOL 494 and/or BIOL 499 may be used as electives to satisfy 120 credit total.</i>		
	CHEM121A & 121L General Chemistry I	4	
	CHEM122A & 122L General Chemistry II	4	
	CHEM241L Organic Chemistry I & CHEM241 Organic Chemistry I loab	4	
	CHEM242 Organic Chemistry II & CHEM 242L Organic Chemistry II lab	4	
CHEM 474 Biochemistry I	3	3	
MATH181 Calculus I	4		
PHYS 151/151L General Physics I	4		
PHYS 152/152L General Physics II	4		
STAT 391 - Applied Statistics for Biological Sciences OR STAT 491 - Statistics for Scientists I	3	3	
Elec	General Electives 100-400 level (MATH 182 recommended)	10	
Total Credits:		120	41

ΔA minimum of six (6) credits are required, to be composed of a three-credit multicultural course and a three-credit international course that may simultaneously fulfill other general education requirements. A single course may not simultaneously meet both the multicultural and international requirements. Discuss with your Academic Advisor!

It is strongly recommended that students interested in biomedicine or attending graduate school take additional appropriate upper-division biology courses and research units to meet their elective credit requirements.

The minimum number of semester credits required for a bachelor's degree for a student graduating under the regulations of the 2016 - 2017 Undergraduate Catalog is 120. At least half of the credits required for a baccalaureate degree at the institution must be earned at a four-year institution.

A candidate for the baccalaureate degree must complete the last 30 UNLV semester credits in uninterrupted resident credit as a declared major in the degree-granting college. A student must declare a major prior to enrolling in their last 30 UNLV resident credits.

In order to graduate, an undergraduate student must have a minimum cumulative grade point average of 2.00 for the total of all college-level credit attempted at the University of Nevada, Las Vegas (UNLV GPA). College and department GPA requirements must also be met.

Upper Division Biology Lists for the 2016-2017 Catalog

Biology Course Lists for Upper Division Degree Requirements						
Courses that appear on more than one List cannot count toward two list requirements. BIOL 300 can be used only toward the Biology Core requirement. BIOL 304 may be used toward EITHER the Biology Core requirement OR List B. Fall 2015 catalog: BIOL 492, -493, 494, 496, 499: read your Degree Audit in MyUNLV for restrictions that apply			CREDITS	List A: Focus on cell Structure and Function	List B: Focus on Organismal Structure and Function	List C: Focus on Biological Diversity

BIOL 496	Advanced Topics in Modern	1				
BIOL 499	Undergraduate Teaching	1				

Lower Division Prerequisites.

Students are required to complete the following prerequisite courses with a grade of "C" or higher before they are eligible to enroll in upper division (300-400 level) biology classes: BIOL 196, BIOL 197, CHEM 121/121L or CHEM 121A+121L, CHEM 122/122L or CHEM 122A+122L, MATH 127 or 128 or higher, ENG 102 or HON 100 or ENG 114.

NSHE Transfers

Only credits transfer to UNLV from other institutions; grades do not transfer and do not affect GPA at UNLV (this includes other Nevada institutions). If you receive a passing grade at UNLV and you choose to retake the class, you must do so at UNLV, not at CCSN or other NSHE institutions; if you fail a class at UNLV, you may retake the class at CSN or other NSHE institutions. BIOL 251G (Honors Microbiology) from CSN may fill a requirement for BIOL 351 (BS Biology) at UNLV.

Credit Load

The university considers 15 semester credits as the minimum full-time undergraduate credit load. The maximum credits allowed during a regular semester are 17 for freshmen level, and 18 for sophomore, junior, and senior levels. Overloads are available on a case-by-case basis for sophomores, juniors and seniors who have a GPA 3.0 or higher.

Four- and five-year degree plans can be found at <http://sciences.unlv.edu/advising/degreeworksheets>

Biomedicine or Graduate School

It is strongly recommended that students interested in biomedicine or graduate school take additional appropriate upper-division biology courses and research units to meet their elective credit requirements. Make an appointment to see the Pre-health Advisor. 702-895-2077

Four- and five-year degree plans can be found at <http://sciences.unlv.edu/advising/degreeworksheets>

B.S. Biology

To earn a Bachelor of Science degree in Biology, students must satisfy the general education core curriculum required by the university and the College of Sciences, plus the program requirements of the Department of Life Sciences. The departmental program includes courses in biology, chemistry, physics and mathematics. Biology majors choose one of five areas of concentration as shown below.

The Cell & Molecular concentration provides Biological Sciences majors with the intellectual tools essential for careers in biotechnology and biomedical science research, as well as for transition to graduate PhD programs in Biology, and Cell and Molecular Biomedical research.

The Ecology & Evolution concentration is recommended for those students who desire a strong foundation in evolution, and whose interests are at the interface between organisms and their environments.

The Integrative Physiology concentration provides the biology major with the intellectual and technical tools essential for success in a broad array of life sciences careers including application to all the health care-related professional schools, graduate school, or related postgraduate study as well as biomedical science research. IP provides an in-depth examination of how animals and/or plants work from the molecular/cellular level of organization to a systems level understanding and up to the integration of physiology with behavior and evolutionary processes.

The Microbiology concentration provides the biology major with the intellectual and technical skills required for success in the broad area of microbiology which includes clinical, environmental, ecological, evolutionary, molecular, metabolic and physiological perspective of microbes, including aspects of virology and immunology.

The Preprofessional concentration provides Biological Sciences majors with the intellectual tools essential for application to health care-related professional schools, including medical, dental, veterinary, optometric and related programs.

Many of the five areas of specialization provides an excellent and well-rounded background for those interested in applying for professional schools including medical, dental, veterinary. Most degrees in biology ensure the course work required for professional school is completed at the time of graduation.
