

Masters of Science - Chemistry Program Handbook

Welcome

Welcome to the Department of Chemistry and Biochemistry at UNLV. Our graduate programs offer exceptional research opportunities for advanced training in a wide variety of chemistry related disciplines including Organic, Physical, Analytical, Computational, Materials, Biochemistry, and Chemical Education. The graduate student to faculty ratio in the department is nearly one-to-one. Consequently, our diverse student body receives a high level of individualized interaction with excellent faculty through customized research projects, specialized course work, professional development, and graduate seminars. In addition, many of our research programs offer exciting interdisciplinary collaborations with local scientists, as well as with scientists nationally and internationally.

College Mission Statement

The mission of the College of Sciences is to serve the students of UNLV, the citizens of Nevada and the United States, and society worldwide through research and discovery that expands knowledge in the natural, physical, and mathematical sciences. We communicate this knowledge to students in a rewarding learning environment, and to communities beyond the university through active engagement of diverse constituencies.

The College of Sciences endeavors to develop and nurture a community of scientists and scholars who are among the world leaders in their disciplinary areas, and who generate knowledge at the forefront of science. Research and discovery, in symbiosis with education, are our hallmarks. Addressing fundamental questions related to earth sciences, biological systems, physical and chemical systems, mathematics, and the universe will continue to be core focus areas. In conjunction with colleagues within and outside of the university, faculty and students participate in the application and exploitation of our scientific discoveries and expertise to the benefit of the university, the citizens of Nevada, and society at large.

The College of Sciences creates innovative and engaging learning environments in which students are educated to the full extent of their abilities. Our programs produce highly skilled and knowledgeable scientists educated in a premier research environment. In addition, we provide the education needed by diverse student populations, ranging from formal grounding in the sciences for technical disciplines, to a general appreciation and understanding of the sciences for non-specialists. We strive to develop comprehensive educational initiatives and services, and engage our alumni and friends in mutually beneficial relationships in support of teaching, research, and community service activities.

“The eternal mystery of the world is its comprehensibility.”

— Albert Einstein

Program Requirements

Program requirements regarding [admission, coursework and culminating experience are found in the graduate catalog](#).

Advisory Committee Guidelines

In consultation with his/her advisor, a student will organize a thesis committee of at least three department members. In addition, a fourth member from outside the department, known as the Graduate College Representative, must be appointed. An additional committee member may be added at the student and department's discretion.

Degree Program Benchmarks

1. Each student is required to present a departmental seminar on the student's research prior to graduation. This requirement is in addition to the two credits of Graduate Seminar. Students are expected to attend weekly departmental seminars.
2. Each student is required to meet at least once per semester with the student's examination committee. At the meeting in the semester prior to the expected term of graduation, the student will be asked to make a detailed presentation on research progress. The committee will then make recommendations

to be addressed by the student during the remainder of the student's research program, in writing the thesis, and in the final examination. The committee may request another meeting prior to the final exam if deemed necessary.

3. The student must submit all required forms to the Graduate College and then apply for graduation up to two semesters prior to completing his/her degree requirements.
4. The student must submit and successfully defend his/her thesis by the posted deadline. The defense must be advertised and is open to the public.

Professional Code of Ethics/Discipline Guidelines

UNLV Graduate College policy regarding academic integrity can be found in the graduate catalog.

Annual Review Procedures

Each winter break and early spring term, graduate students are **required** to complete the Graduate Student Individual Development Plan (IDP) form. The review covers the prior calendar year and assesses student progress, and it establishes reasonable goals for the year ahead. Reported student data is shared with students' graduate coordinators and advisors to foster opportunities for discussion about students' strengths and weaknesses, accomplishments and next requirements, and mentoring plans so that students know what they need to do in order to progress successfully through their programs in a timely manner. Students who are graduating are also required to complete the form in order to record their achievements since the data is also used to track metrics related to the annual productivity of all students. This online form will be sent by the Graduate College to the student's Rebelmail account. The mandatory review covers the prior calendar year and assesses student progress while setting goals for the year ahead.

Probation

If a student fails to successfully progress in their degree program, their department/school will recommend that the student be placed on probation by the Graduate College. Students on probation may be dismissed/separated from their program for failing to successfully meet the conditions of their probation by the deadline provided. Please see the [Probation and Separation](#) section of the Graduate Catalog for more information.

In addition, all chemistry graduate students must meet with their advisory committee on a yearly basis, and all students must complete the departmental annual evaluation form.

Additional Program Information

It is expected that each student be a teaching assistant for a minimum of two courses prior to graduation. It is also expected that each student publishes at least one research-based manuscript in a peer-reviewed journal.
