ABOUT RADIOLOGY AND UNLV

THE FIELD OF RADIOLOGY
Radiography was the first medical imaging technique developed shortly after the discovery of X-Rays in 1895, by Wilhelm Conrad Roentgen. Since that time, Radiography has remained the basic medical imaging technique with major advances occurring in the field as a result of advances in technology, equipment and the computer. With the development of the mini-computer in the early 1970s, medical imaging entered the world of computer technology resulting in improvements in radiographic equipment. Other developments include advanced imaging techniques such as computed tomography, in the early 1970s, and magnetic resonance imaging, in the early 1980’s. These advanced imaging techniques have certifying exams, which may require certification in Radiography as a prerequisite.

CAREER OPPORTUNITIES
Careers in the field are found in a variety of settings from small rural centers to large urban hospitals and clinics and even in some foreign countries where shortages in Technologists are evident. Radiography is a field of its own with advancements possible with additional education and training. Graduates can enter the field as staff Radiographers and with additional certifications, education and administrative positions or into the field of education.

FACILITIES AND FACULTY
Campus facilities in the Rod Lee Bigelow Health Sciences Building provide the student with hands-on experience. These facilities include three radiographic laboratories. The program is affiliated with major hospitals and clinics in the Las Vegas, North Las Vegas and Henderson areas.

Clinical facilities provide students with practical experiences under the direction of imaging professionals and campus faculty. The program provides didactic and laboratory instruction by full-time, part-time and adjunct professionals.

ACCREDITATION
The Radiography curriculum is a structured program and accredited by the Joint Review Committee on Education Radiologic Technology (JRCERT). The curriculum includes required classes in English, mathematics, computer science and biology; and radiography didactic, laboratory and clinical courses. Upon successful completion of the program, the student is eligible to take the national American Registry of Radiologic Technologists’ (ARRT) certifying exam in Radiography.

Current accreditation status is 8-Years.

The UNLV Radiography Program affiliates with acute care hospitals and outpatient imaging centers to provide a robust clinical education. UNLV faculty will assign students to clinical sites that provide a wide range of procedures. Clinical placement is solely determined by the Program and it is the student’s responsibility to procure transportation to and from their clinical assignments.

Clinical assignments include:

1. 24 hours per week during the Fall II and Spring II semesters
2. 40 hours per week during Summer I and Summer II semesters
3. A minimum of 80 hours of a swing shift is required. A swing shift is defined as a shift ending at or after 7:00pm.
