Using Cisco Video Phones in Webex

Overview
This guide provides instructions for campus users to use their Cisco Video phone as a video endpoint in Webex meetings.

Requirements
- Users must be on-campus
- Users must have permission to dial local, long distance, or international numbers
- Users must have a new model Cisco Phone with a camera
  - models 8845 and 8865

Joining Webex with a Cisco Video Phone
Follow these steps to join a webex conference from your on campus Cisco Video Phone

Step 1
Dial 53001 to reach webex’s video IVR (interactive voice response)
Step 2
Enter the meeting number, followed by #

Step 3
If you are the meeting host, you can start the meeting by entering your host pin followed by #
Step 4

If the meeting has started, the host will have to admit you. You will be added to the conference lobby until you are admitted.
Step 5

Once you are admitted you are added to the meeting

Known Limitations

These are the known limitations of this service

- If you are the host of a meeting, you will not be able to admit call-in users using your phone
  - To admit users you will have to log into the meeting using a web browser
- Viewing shared documents during the conference may be difficult depending on the size of the text
