Setting Up and Printing Posters in GPSA

David Montgomery-Blake

What I'll Cover

- Benefits of using the GPSA plotter
- Setting up your poster for printing

Additional Information:

The basics of printing your poster

Benefits of the GPSA Plotter

- High quality printouts
 - Photo quality plotter
- Cost-effective
 - \$11/linear foot
- Convenience
- Helpful staff!

Office of INFORM

Other places you can go...

- Grant Hall 264 or Architecture 172
- Media Services on the 1st floor of the library
- Reprographics across Harmon from the Lied Library
- Staples, Office Max, etc...

Setting Up Your Poster for Printing

Size your poster FIRST!

- Make sure you set your poster size first!
 - The roll of paper installed in the plotter has a maximum width of 36"
- This will make sure image sizes show up accurately.

Why size first?

- Creating a basic slideshow assumes 8 ¹/₂" x 11
- Graphics will be scaled (and skewed) accordingly when you print to a larger poster size

Small image scaled up to 3' x 4'

Plan from the beginning...

Why Puppies Are Cute

By A. PhD Candidate

You will see how big it will be on the poster when printed without scaling.

Avoid Nasty Surprises

Then you can scale to see if it will work o find a new, better image if it will not.

Finally!

Why Puppies Are Cute By A. PhD Candidate

Setup the Size of Your Poster in PowerPoint...

Go to the Design Tab

Then Page Setup

Set the Custom Height and Width

n l

When printing...

- Set a custom paper size that matches your poster.
- Always do a print preview
- If you are concerned about coloration, select about an inch of your poster to print and test color

Printing steps are covered in the supplemental information at the end of the slideshow.
