Total Credits at UNLV: 55-57

Degree Total: 120

Advising Director's Note: Start math and science early. UNLV Biology courses cannot be individually repeated more than 3 times (including audits and withdrawals) this includes BIOL 190, 191 189, 251. If exhausted at UNLV, the fourth attempt cannot be taken at another institution.

Program Specific Information: All science and math courses transferred from another school require a grade of C or better (C- is not sufficient) before enrollment in any upper division biology course. To declare a major in the College of Sciences, students must have a GPA of 2.5 and place into MATH 126 or higher.

BIOL 190 (196), BIOL 191 (197), CHEM 121, CHEM 122, ENG 102 or ENG 114 or HON 100, and MATH 127 or 128 or 181

Transfer Policies:

REVISED 50/50 RULE

- The policy stating that UNLV will only accept up to 60 credits to be transferred and applied to any specific program/major is no longer in place. Unless a college/major has a specific requirement on credit limitations, transfer credits from 2-year institutions should no longer be limited to 60 credits i.e., Lee Business School, College of Education. At least 30 credits of upper-division from UNLV are now required to obtain a Bachelor's.

REPEAT POLICY

- Students may retake a VVC course as often as needed to gain a better grade and, thereby, a higher-grade point average. Only the highest grade received will count as part of the total VVC grade

point average. All repeated courses taken at VVC will remain as part of a student's permanent academic record.

*PLEASE NOTE: While other colleges may accept the BEST grade, UNLV typically accepts the LAST grade.

- To improve GPA and change original grade the course must be repeated at the institution that it was completed. For example, if a student takes MATH 124 at VVC and receives an F the course must be repeated at VVC in order to replace the grade and improve the GPA.

REVERSE TRANSFER

- Students who have earned 15 or more credits at VVC and have transferred to a four-year institution without an associate's degree may "reverse transfer" the earned credits from the four-year institution to complete an associate's degree. This process makes it possible for students to earn an associate's degree as they continue to work toward completing their bachelor's degree.

Note: Some courses that fulfill specific general education requirements at VVC may fulfill different general education requirements at UNLV. Please see an Academic Advisor to confirm your choices.
