Connection Guide
ResNet Service Provided by Campus Life Technology

You will need an active ACE username and password to set up devices on the UNLV network. You can activate your account here: https://ace.unlv.edu/

Game Consoles / Smart TVs / Devices

1. These devices will NOT work on wireless network and need to be connected to the wired network.
2. Plug your device into the wall using a network cable that can be purchased from any computer retail store.
3. In device settings find your Wired MAC address. (example AC:BD:EF:01:23:45)
4. In an internet browser, go to the following URL: https://connect.resnet.unlv.edu:9443/enroll
5. Enter your ACE username and password and follow the instructions on the screen to complete the process.
6. Make sure the wireless settings are turned off. They may interfere with your connection to the network.

Wireless

1. Enable wireless on your computer. On your device connect to the ‘UNLV-WiFi’ Wifi network or navigate directly to wifi.unlv.edu. Click “Configure Device”.
2. In the “Select your device list”, check that your version of Windows/MacOS is selected. Click “JoinNow”.
   a. Mac OS X: Click on UNLV_eduroam_Configuration.dmg, if prompted select Open to allow Secure W2 Wifi_JoinNow_Wrapper, when prompted, enter your ACE username and password, you will then be asked to enter your username and password for your computer’s admin account.
   b. Windows: Click on UNLV_eduroam_Configuration.exe to open the installer, if a security warning pops up, press Yes or Run to run the application, enter your ACE username and password and click Next.
3. Once you see the progress message “Joined” press Done to close the program.

Important Connection Information

1. Campus Life Technology cannot guarantee that every device will be able to connect to the UNLV network.
2. The following devices will **NOT** work on the UNLV Wireless network:
   - Chromecast/Amazon Fire Stick/Roku Stick devices.
   - Personal wireless routers are **NOT** allowed on the residential network and will interfere with the wireless network.
   - Your wireless printer will **NOT** work with the wireless network and should be connected to the wired network. If you need assistance, please contact Rebel Repair Help Desk.
3. Microwave ovens are known to interfere with wireless networks.
4. Mobile RebelPrint will allow you to print from your room to any computer lab on campus. For more information, please visit the student printing website at https://www.it.unlv.edu/computer-labs/about/printing-scanning.

Wired Computers

1. Follow steps 1 and 3 from **Game Consoles / Smart TVs / Devices**.
2. Once on the browser, you will be prompted to enter your ACE username and password.
3. You will be prompted to download a policy key. The policy key allows UNLV Campus Life Technology to verify that your computer is compliant with University network and copyright policy. Failure to download the policy key will result in the inability to connect to the Internet.
4. Once the policy key is installed you should have access to the network.
