Author ORCID ID#

Full Name: <https://orcid.org/0000-0000-0000-0000>

Abstract

Not to exceed 250 words

Introduction: Concisely describe the context and purpose of your research

Methods: Concisely describe how the research was conducted and quantitative or qualitative methods and techniques used without details

Results: Summarize your most important and main findings

Discussion: Concisely describe the study implications and future directions

26

27 **Keywords**

28 keyword1; keyword2; keyword3; keyword4; keyword5; keyword6

29 **Introduction**

30 **Research objective(s):** Describe the main objective(s) of your research

31 **Conceptual/theoretical framework(s):** Embed your research within relevant and pertinent
32 theoretical or explanatory framework(s) and note any relevant controversies or disagreements
33 in the field

34 **Literature review and background:** Include a brief review of the key literature and provide
35 background that puts the manuscript into context and allows readers outside the field to
36 understand the purpose and significance of the study

37 **Significance and contribution(s):** Define the problem addressed and why it is important

38 **Research question(s):** Present your specific research questions

39

40 **Methods**

41 **Design and protocol:** Provide enough detail to allow suitably skilled investigators to fully assess
42 and replicate your study

43 **Materials and sampling:** Provide details about your materials, sample size, and sampling
44 strategy

45 **Types of analysis:** Provide details about your analytical framework and techniques

46

47 **Results**

48 Present your results and describe your key findings

49

50 **Discussion**

51 Interpret your results

52

53 **Conclusions**

54 **Main conclusions:** Describe the conclusions that can be drawn and/or can be generalizable

55 **Importance to the field:** Explain how the results relate and contribute to your field

56

57

58

59 **Broader implication and future directions**

60 Provide a succinct explanation of the implications of the findings, particularly in relation to
61 previous related studies and potential future directions for research

62

63 **List of abbreviations used**

64 If abbreviations are used in the text they should be defined in the text at first use written in full
65 with the abbreviation in parentheses. A complete list of all abbreviations used should be
66 provided in a section called List of Abbreviations directly following the Conclusions section.

67

68 **Conflicts of Interest**

69 Declare any real, potential, or perceived conflicts of interest between the duties or
70 responsibilities related to research, and personal, institutional or other interests associated
71 with each author. Conflicts of interest can exist when an author's interpretation of data or
72 presentation of information may be influenced by their personal or financial relationship with
73 other people or organizations. If all authors have no conflicts of interest, please state "The
74 author(s) declare that they have no conflict of interests."

75

76 **Ethics Approval**

77 If the study reported in your manuscript requires review by your institution's review board
78 (IRB), please provide the details in this section. If your study involved human participants,
79 please describe the steps taken to gain the consent of the study participants.

80

81 **Authors' Contributions**

82 According to the International Committee of Medical Journal Editors (ICMJE), authorship credit should
83 be based only on substantial contributions to:

84 1. Conception and design, analysis and interpretation of data

85 2. Drafting the article or revising it critically for important intellectual content

86 3. Final approval of the version to be published.

87 Please outline the contributions made by each author marked by their initials:

88 ABC: contributed to the research design, collected and analyzed data, drafted the manuscript,
89 and approved the version to be published.

90 DEF: contributed to the research design and planning, assisted with data collection and analysis,
91 approved the version to be published.

92 GHI: substantially contributed to the research design, data collection, analysis, and
93 interpretation, revised the manuscript critically, and approved the version to be published.

94

95 **Acknowledgements**

96 Please acknowledge anyone who contributed towards the article but did not meet the criteria
97 for authorship. Examples of such contributors include those who provided purely technical
98 help, writing assistance, a department chair who provided only general support, or those who
99 contributed as part of a large collaboration group. Authors should obtain permission to
100 acknowledge all those mentioned in the Acknowledgements section.

101

102 **Funding**

103 Please include all funding sources associated with your study. If the study was unfunded, please
104 state “This study was not funded”.

105

106 **References**

107 Primary research articles, primary review articles, research protocol articles, and thesis-based
108 research articles must use “APA style” and authors submitting such work should consult The
109 Publication Manual of the American Psychological Association, Seventh Edition for specific
110 guidelines and instructions.

111

112 Authors submitting creative writing including fiction, non-fiction, poetry, and prose should use
113 “MLA style” and consult the following links for specific guidelines and instructions.

114

115 **List of Figures**

116 Figures should be provided where it should be displayed in the word document text file. Each
117 figure should be able to fit on a single page in portrait format, and they should be numbered in
118 the order in which they appear cited in the manuscript (i.e. Figure 1, Figure 2, etc.). Each figure
119 must be accompanied with a caption directly below it. Please note that Spectra only publishes
120 articles in online formats, and therefore, there are no additional charges for the use of color
121 figures. Important: It is the responsibility of the author(s) to obtain permission from the
122 copyright holder to reproduce figures that have previously been published elsewhere, which
123 should be scanned and emailed to the editorial office in case of acceptance together with your
124 Publication Agreement Form.

125

126 **List of Tables**

127 Tables should also be provided where it should be displayed in the word document text file.
128 Each table should be able to fit on a single page in portrait format, and they should be
129 numbered in the order in which they appear cited in the manuscript (i.e. Table 1, Table 2, etc.).
130 Each figure must be accompanied with a caption directly above it. All tables should be
131 formatted using the “Table object” (i.e. Insert > Table) in a Microsoft Word to ensure that
132 columns of data are kept aligned when the file is sent electronically for review. Important: It is
133 the responsibility of the author(s) to obtain permission from the copyright holder to reproduce
134 figures or tables that have previously been published elsewhere, which should be scanned and
135 emailed to the editorial office in case of acceptance together with your Publication Agreement
136 Form.

137

138 **Additional Files**

139 For figures and tables that are too large to be included with the manuscript file, please upload
140 them as multimedia appendices. Other additional file types that you wish to accompany your
141 manuscript may include research instruments (questionnaires), movie files, original/raw data
142 (SAS/SPSS, Excel, Access database, etc.). Important: It is the responsibility of the author(s) to
143 obtain permission from the copyright holder to reproduce any additional file that have
144 previously been published elsewhere, which should be scanned and emailed to the editorial
145 office in case of acceptance together with your Publication Agreement Form.
