

**COMPLETE THE AFROTC FORM 48 IN PENCIL**

1.15.1. The academic plan is designed to ensure each applicant meets graduation and program completion requirements in a realistic manner, while maintaining two years in the POC; and, within the fiscal year of commissioning indicated on the AF Form 1056. Detachment personnel must ensure the cadet's academic program is realistic. Once the academic plan is established, at a minimum, all cadets must have their academic plan reevaluated and recertified by their academic advisor every Fall term. This will ensure the cadet is on schedule with their established graduation/commissioning date.

**THE COMPLETED AFROTC FORM 48 WILL BE RETAINED AS A PERMANENT RECORD**

1.15.4. Preparation of the AFROTC Form 48

1.15.4.1. The AFROTC Form 48 is prepared by the cadet and gives a tentative schedule of all courses (including summer sessions) to be taken from the time of program entry until commissioning. Prepare the AFROTC Form 48 in pencil; signatures must be in blue or black ink. If the course titles of electives are not known, list "Elective" and enter the number of proposed credit hours. Add actual course titles when they become known. Use the following instructions if completing the AFROTC Form 48:

1.15.4.2. Section I – Administrative Data.

1.15.4.2.1. Block 1 (Name). Self-explanatory. **[example: Last, First, and Middle Initial]**

1.15.4.2.2. Block 2 (Academic Institution). Enter the institution from which the applicant or cadet will receive their degree and the AFROTC detachment they are attending. If they are both the same, only one entry is required. **[example: UC Berkeley / AFROTC Det 085]**

1.15.4.2.3. Block 3 (Academic Major). Enter one major field of study. **[example: Business]**

*If you change your major, you must complete a new AFROTC Form 48. If you are on scholarship/contract or have been submitted for a scholarship or enrollment allocation to enter the POC, you must obtain approval through the Professor of Aerospace Studies PRIOR to changing your academic major.*

1.15.4.2.4. Block 4 (Institutional Official Review). Accomplished by the institution academic advisor.

*Your AFROTC Form 48 must be signed and dated by the dean, department chairman, faculty advisor, or other appropriate institutional official. His/her signature/date verifies that the plan, if successfully completed, will lead to the prescribed degree at the time indicated. A new institutional official review is required if a new AFROTC Form 48 is completed.*

1.15.4.2.5. Block 5 (Initial Review). Enter the specific degree (BA, BS, etc.) (see the attached course codes and choose the most related to your university program) and the month and year (include fiscal year) the contracted degree is scheduled for completion. Ensure the determined date of graduation (DOG) and DOC are realistic; many technical majors take 4.5 to 5 years to complete. A cadet in an academic program that is traditionally 4.5 or 5 years in length should have a DOG and DOC reflecting that reality. Schedule such cadets for extended status. The cadet will then sign the appropriate block. A detachment officer will review all information on the form, sign and date block 5.

**[example: Completion of this education plan should result in my obtaining a BS degree during May 2012]**

1.15.4.2.6. Block 6. Cadet must sign and date after all degree requirements have been successfully completed and graduation will occur as stated in Block 5. **[Signed and dated the week prior to commissioning]**

1.15.4.3. Section II – Academic Plan. Annotate all courses planned for each term. (NOTE: If using the AFROTC Form 48, the shaded areas are for detachment personnel use only and will be accomplished during term reviews.) Include summer terms, PNA, extended status, co-op, field training, and terms abroad.

*List all courses you plan to take each term by course number, title, and credit hours. Start from the date you prepare the form and list all terms required to complete degree and commissioning requirements from left to right on the form. Fill in the heading to indicate the term and year. After completing the headings, list each course by number, title, and number of hours. List courses you are planning to take for each academic term, including summer terms. Ensure you satisfy all departmental, university, and AFROTC academic requirements. Again, include field training, terms abroad, periods of non-attendance, completed status, and the Aerospace Studies course in the academic plan. If you are uncertain of which course you will use to satisfy a particular requirement, identify the requirement (i.e., Humanities Elective, EE Elective, Performing Arts Elective, etc.) and credit hours needed.*

1.15.4.3.1. Term. Enter the term designation such as fall, winter, spring, summer, and year for each academic term scheduled, e.g. spring '05.

**[example: Term 1 – Fall | Year – 2008 ; Term 2 – Spring | Year – 2009 ; etceteras]**

1.15.4.3.2. Course Number. Enter the appropriate information as listed in the school catalog.

**[example: MATH; EE512, etceteras]**

1.15.4.3.3. Course Title. Provide short, abbreviated course titles when possible. For example: "History and Principles of the Interpretation of the Bible" could be "Bible;" "General Psychology" could be "Gen Psy;" or "Inorganic Medical Chemistry" could be "Inorg Med Chem".

1.15.4.3.4. Credit Hours Attempted. Enter the number of credit hours for the specific term as specified for the course in the college catalog, regardless if the credit hours directly apply to the major. Once the credit hours for each course are annotated, add all hours under the column "Credit Hours Attempted" and place the sum value in the "Total Credit Hours Attempted" block

*Credit Hours Comp - This entry is the number of credit hours per course that counts toward degree completion. If full credit is given, course hours attempt and credit hours comp are the same. If partial credit is allowed, enter only the number of hours creditable toward the degree. If no credit is given for the course, enter a zero.*

*Deviations - If "credit hours attempt" equals "credit hours comp"--leave blank. If only partial credit is allowed, enter the difference between "hours attempt" and "hours comp".*

*Since course offerings may not be known when you prepare the Form 48, you may list "electives" and the number of hours you anticipate. You may add the actual course title later when your plan becomes a reality.*

*All Aerospace Studies courses will be listed in the term they will be taken.*

*Leave all remaining blocks BLANK. They will be filled out each semester during your term counseling with your Aerospace Studies instructor.*

*The AFROTC Form 48 is an extremely important document. If the form is incomplete, illegible, incorrectly prepared, you will have to re-accomplish it. This will delay the processing of your application for POC entry and/or scholarship consideration.*
