

# Coleman Car Camping Two-Burner Stove

\*Does not include fuel\*

## General Description

This stove is especially designed for outdoor cooking, featuring an all-metal construction with two adjustable burners. The high-pressure regulator ensures a constant flame in all weather conditions, while wind shields provide additional protection from wind while cooking. Propane cylinder, lighter, utensils, and cookware not included.

## Features

- Official stove of the National Park Foundation
- Panels to block wind
- PerfectHeat™ technology for more efficient cooking
- 20,000 total BTUs of cooking power
- Can fit a 12" and 10" pan at the same time
- Independently adjustable burners
- Durable rust-resistance and easy cleaning

## Specifications

- Size: 4.1" x 21.9" x 13.7"
- Two 10,000 BTU burners
- Low to high heat

## Instructions for Use/Setting Up

First, locate the burner valves and turn them to the right, which turns off the valves so you can light the stove safely. Take the regulator out of the middle of the stove where it is stored, and unscrew the lid of the propane cylinder. Find the regulator slot on the stove (on your right when facing the stove directly), and screw in the regulator. Connect the propane cylinder and the regulator, and screw the propane onto the regulator.

To light the stove, use a match or a lighter, and hold the flame above one of the burners, slowly turning that burner's valve until the propane catches. To adjust the size of the flame, turn the valves. A very hot flame will be light blue, with yellow at the tip.

CAUTION: Keep flammable materials away from the stove, including dry leaves, twigs, paper, and fabrics. Make sure the stove is on a stable, flat surface before connecting the propane or lighting the stove. Do not use the stove inside a tent.

This video may provide additional guidance for setting up and lighting the stove:
