

# Metolius Crash Pad

## General Description

This bouldering pad will provide protection for falls and will disperse the force of a fall throughout the pad. It is durable, and will give peace of mind during bouldering and climbing expeditions.

## Features

- 4.5" of padding
- Hinge design and shoulder straps for easy carrying
- Dual-density foam for absorbing impacts

## Specifications

- Open Dimensions: 48" x 36" x 4.5"
- Folded Dimensions: 36" x 26" x 9"
- 3.5" open-cell foam padding under 1" of closed-cell foam padding

## Instructions for Use/Setting Up

For safety and to avoid injury, follow guidelines for safe bouldering and climbing, including bringing a spotter, first aid equipment, and proper gear. A crash pad will not provide full protection from falls, and knowing correct fall techniques will also help to prevent injuries. Place the pad under the section you will be bouldering before you begin. At least one crash pad should be used for bouldering activities.

## Reviews\*

"Being a novice climber it gave me an extra level of comfort, and when we tried bouldering, it worked like a charm. Soft, yet durable. It is light and easy to carry, providing an easy way to keep safe."

"Good first pad for beginner/intermediate climbers, and a great supplementary pad if you've got something bigger as well. Good thickness at 4 inches with fairly firm foam is a good balance of protection without being overly heavy or cumbersome to move around. Good secure closure and solid carry system keeps the pad higher up so it doesn't get in your way while scrambling or hiking steep approaches."

"Extremely durable and easy to carry to remote bouldering locations."
