CIVIL ENGINEER

Posting ID: EM18813472
Company Website: http://www.rcinevada.com
Company: RCI Engineering
Work Location: Las Vegas, NV
Position Type: Full-Time
Salary:
College Major(s): Civil Engineering (CEE)
College Level(s): Alumni

OVERVIEW

RCI Engineering, a full-service civil engineering firm, is seeking a mid-level Civil Engineer with experience in commercial/residential site design, infrastructure design and production. RCI has been providing planning and engineering services on projects ranging from single and multi-family residences to commercial, industrial and infrastructure for approximately 10 years.

Roles and Responsibilities
Under limited direction, the Engineer will work on a wide range of large and small site development and infrastructure projects with an opportunity to manage clients and projects. This position will manage land development projects from entitlements through construction. Responsibilities will include engineering field work, data collection, calculations, design layout as well as specification preparation, cost estimates and report writing. Coordination with other engineers and designers while supporting Project Engineers and Project Managers on a variety of tasks.

Education and Qualifications
Qualified candidates must be a Registered Professional Engineer in Nevada and have 3-5 years of experience. Proficiency in AutoCAD is required, Civil 3D is preferred. Project experience with land development is a must.

How to Apply
Please submit resumes to: aarmstrong@rcinevada.com
