The Boring Company was founded to solve the problem of soul-destroying traffic by creating an underground network of tunnels. Today, we are creating the technology to increase tunneling speed and decrease costs by a factor of 10 or more with the ultimate goal of making Hyperloop adoption viable and enabling rapid transit across densely populated regions.

Roles and Responsibilities

- Utilize AutoCAD Civil 3D to assist in the preparation of structural and civil engineering details, design plans, reports, and meeting exhibits.
- Perform project research and work as part of a multi-discipline team to deliver project input.
- Assist with the coordination and management of subcontractors onsite and offsite.
- Digitize as-built civil drawings, including utility and structural drawings.
- Work with engineering team on the production of design drawings.

Education and Qualifications

- Undergraduate or Graduate Student majoring in Civil Engineering, Construction Management, or a similar engineering field.
- Experience using AutoCAD and/or AutoCAD Civil 3D.
- Experience working with a team. Strong problem solving, deductive reasoning, and communication skills.
- Highly organized with a strong sense of urgency.

Preferred Skills

- 1+ years of experience working with AutoCAD and/or AutoCAD Civil 3D.
- Acute attention to detail. Ability to read and interpret civil engineering design and as-built drawings.
• Ability to study and comprehend specifications, rules and regulations.
• Exceptional leadership abilities.
• Strong interpersonal skills.
• An analytical mindset that thrives on formulating strategy and presenting data.
