OVERVIEW

The mission of the FBI is to protect the American People and uphold the Constitution of the United States.

Roles and Responsibilities
* Performs system and network procurement, installation, administration and security
* Develops and implements custom tools and methods, and uses, troubleshoots and modifies existing tools and methods to identify, isolate, preserve and analyze digital data
* Assists in the identification, vetting and implementation of new tools and methods
* Assists in the development and use of basic computing environments for analysis
* Provides technical assistance in conducting interviews, searches and other investigative and operational activity; performs liaison and outreach
* Testifies in court
* Drafts documents on technical and other professional matters in varying degrees of difficulty and at the appropriate technical level
* Stays current with major new advances in relevant technology-related topics; provides guidance on tools and methods related to these advances
* Coordinates with private sector and other divisions to resolve technical and other relevant issues

Education and Qualifications
Please make sure your specialized experience/requirement(s) can be identified in your resume. Applicants must meet the qualification requirements by the closing date of this announcement.

Your application will be evaluated and rated under the FBI's Candidate Rating Procedures. Your resume and supporting documentation will be used to determine whether you meet the job qualifications listed in this announcement and will be compared to your responses to the online assessment questionnaire. High self-assessment in the vacancy questions that is not supported by information in your resume, and/or supporting documents may eliminate you from Most Competitive status.
Your application will then be placed in one of three categories: Most Competitive, Competitive, or Least Competitive. Names of candidates in the Most Competitive category will be sent to the hiring official for employment consideration. Veterans' preference will be applied.

All applicants will be rated on the following Competencies:

*Analytic Thinking
*Problem/Solving Judgment
*Communication
*Technology Awareness
*Interpersonal Ability

Positive Education Requirement

This position has a specific education requirement; all applicants must verify completion of this basic educational requirement by submitting a copy of their college transcripts by the closing date of the announcement. Education completed in foreign colleges or universities may be used to meet the above requirements provided you can show foreign education is comparable to that received in an accredited educational institution in the United States.

BASIC REQUIREMENTS:

All applicants must have a bachelor's degree in Computer Science or bachelor's degree with 30 semester hours in combination of mathematics, statistics, AND computer science (15 of the 30 semester hours MUST have been in any combination of statistics and mathematics that included differential and integral calculus). Courses designed to provide an introduction to computer science techniques and methodologies are acceptable; courses in teaching elementary, business or shop mathematics are NOT acceptable.
