OVERVIEW

Deere & Company (NYSE: DE) is a world leader in providing advanced products and services and is committed to the success of customers whose work is linked to the land - those who cultivate, harvest, transform, enrich and build upon the land to meet the world's dramatically increasing need for food, fuel, shelter and infrastructure. Since 1837, John Deere has delivered innovative products of superior quality built on a tradition of integrity.

Roles and Responsibilities
We’re hiring for our entry level two year rotational Occupational Safety program where the employee will do multiple rotations through occupational safety departments.

The employee will develop skills through education, work experience or program development that enables an understanding of the basic principles and regulatory requirements of occupational safety.

The employee will perform structured assignments that require analysis and interpretation of data and regulations to determine potential problems and recommended action.

The employee will be supervised under general direction of a unit level occupational safety manager and have an indirect relationship with the occupational safety engineering development program manager.
- Compiles necessary data, documentation and correspondence to comply with safety regulations and Health and Safety Management System (HSMS) requirements.

- Conducts safety audits and risk assessments to identify noncompliance with John Deere standards, processes and applicable laws and regulations.

- Participates in incident investigations and ergonomic reviews and assist in determining effective corrective action.

- Communicates results of analysis and interpretation to appropriate work group for awareness and any required action.

- Develops, directs and conducts safety presentations and training.

- Participates in the reviews of new products, equipment and processes for potential hazards and compliance with regulatory requirements and company standards.

- Utilizes acquired knowledge to respond to both internal and external questions / requests for information relevant to safety and health issues.

**Education and Qualifications**
- Currently pursuing or recent college graduate (within the past 12 months) with a Bachelors or Masters Degree in Occupational Safety and Health, Safety, Industrial Occupational Safety, Environmental Safety and Health, Occupational Safety Engineering, or related degree.

- Desired cumulative GPA of 3.0 on a 4.0 scale. Minimum cumulative GPA required of 2.8 on a 4.0 scale
