INTERDISCIPLINARY CIVIL ENGINEER/HYDROLOGIST

Posting ID: [Company Website: www.usajobs.gov/GetJob/ViewDetails/456946700
Company: U.S. Bureau of Reclamation
Position Type: Full-Time
College Major(s): Civil Engineering

Work Location: Clark County, NV
Salary: $32,374 to $52,134 / Per Year
College Level(s): Recent Graduate

OVERVIEW

Reclamation is seeking a Recent Graduate (received degree within the past 2 years) in the field of Civil Engineering/Hydrology. Make a difference in the West by working for a contemporary water agency whose mission is to assist in meeting the increasing water demands of the West while protecting the environment and the public's investment.

This is a career development opportunity in the excepted service under the Bureau of Reclamation Pathways Recent Graduate Program. The position may be filled at the GS-05 or 07 grade level. Unless you have prior federal service, if selected, your salary will be set at the step 1 of the appropriate grade level.

After completion of the required training period, meeting all of the requirements of a specialized participant agreement, meeting all of the OPM qualification requirements for the position, and receiving a favorable recommendation from management, the individual selected for this position may be converted to a term, career or career conditional appointment in the competitive service. Conversion is not promised or guaranteed.

Travel and relocation expenses will not be paid by the Department of the Interior. Any travel, transportation and relocation expenses associated with reporting for duty at the location designated will be the responsibility of the selected employee.

Duties

- Assists in the development of hydrologic studies, investigations and reports.
- Participates in cross-functional teams providing engineering, hydraulic and hydrologic input.
- Assists in daily operations planning, including the scheduling of water releases from Hoover, Davis, and Parker dams.
- Reviews daily operations, recommends revisions to operations schedule.
• Participates in the formulation of hydrologic and engineering data processing applications, in simulation modeling studies and in obtaining data required for study applications.

Job Requirements

• U.S. Citizenship or National.
• Suitable for Federal employment, determined by a background investigation.
• For Veteran consideration, submit document(s) under "Required Documents".
• Must sign a Pathways Recent Graduate Participant Agreement.
• The entire period served as a Recent Graduate is considered a Trial Period.
• You must submit transcripts to be considered.

To qualify for this position, you must:

• meet the Pathways Recent Graduate Program eligibility requirements;
• meet the OPM Basic Educational Requirements for the 0810 or the 1315 series (see below);
  AND possess any additional specialized experience and/or education substitution for the grade (see below).

ELIGIBILITY: Applicants must be recent graduates who have completed, within the previous two years, a qualifying associates, bachelors, masters, professional, doctorate, vocational or technical degree or certificate from a qualifying educational institution. Veterans (as defined in 5 USC 2108) who, due to military service obligation, were precluded from applying to the Recent Graduates Program during any portion of the 2-year eligibility period described above have a full 2-year period of eligibility upon their release or discharge from active duty; however, this eligibility period cannot extend beyond 6 years from the date of completion of the requirements of an academic course of study. Throughout the program, individuals will participate in job assignments to develop competencies and to enhance their career goals. All eligibility and qualification requirements for the position and the Pathways Recent Graduate program must be met by the closing date of the announcement.
