UNDER ARMOUR - ASSOCIATE SOFTWARE ENGINEER (VIA WAYUP)

Posting ID: EM18630158
Company Website: https://www.wayup.com/organizations/under-armour-Q6Kz58/
Company: Under Armour
Work Location: Baltimore, MD
Position Type: Full-Time
Salary: DOE
College Major(s): Computer Science (CS)
College Level(s): Undergraduate-Junior, Undergraduate-Senior, Graduate Student, Alumni

OVERVIEW

Under Armour is an environment where building a great team is vital, where doing whatever it takes is the baseline, and going above and beyond to protect the brand is commonplace.

Roles and Responsibilities
Under Armour is the chosen brand of this generation of athletes... and the athletes of tomorrow. We're about performance - in training and on game day, in blistering heat and bitter cold. Whatever the conditions, whatever the sport, Under Armour delivers the advantage athletes have come to demand.

That demand has created an environment of growth. An environment where building a great team is vital. An environment where doing whatever it takes is the baseline and going above and beyond to protect the Brand is commonplace.

The world's hungriest athletes live by a code, a pledge to themselves and everyone else: Protect This House... I Will. Our goal is to Build A Great Team!

WILL YOU...PROTECT THIS HOUSE?!

SUMMARY
At Under Armour we are rethinking how e-commerce should be done and we want brilliant engineers to help us create our next generation platform. Taking advantage of cutting edge technology, we are engaging with the open source community to assemble a modular, maintainable and performant system that leverages automation to give engineers a good balance of freedom, insight and accountability.

We’re a small team of passionate engineers who live and breathe technology. We are growing
and want you to become part of what is, and will continue to be, a challenging and exciting environment. We’re looking for people who never stop learning and are excited by that. This role will support Under Armour’s global, online B2B platform.

ESSENTIAL DUTIES AND RESPONSIBILITIES INCLUDE THE FOLLOWING:
*Other duties may be assigned.*

- Assist in executing full lifecycle software development
- Assist in building self-service tools to help operationalize repetitive tasks.
- Assist in maintaining existing B2B platform, as well as contributing to ongoing feature development.

Education and Qualifications

QUALIFICATIONS

- Should be comfortable with HTML, CSS, and JS. Modern JS experience preferred.
- A keen understanding of UI / Interaction development patterns.
- Comfort and understanding of the Component model. Proficiency with React a plus.
- Familiarity with relational data store technologies such as PostgreSQL, MySQL.
- Proficiency with source control including Git
- Proficiency with command line navigation

EDUCATION AND/OR EXPERIENCE

We're looking for someone who has a strong desire to learn and be challenged, and is quick to pick up new concepts. While a BS in CS or 3+ years of comparable experience is a plus, we know that there's more than one path to becoming a software engineer. What matters most is a strong passion for UI development and the ability to dig in to solve problems.

How to Apply
