OVERVIEW

Forte Specialty Contractors provides complete construction services, including design/build, for projects ranging from restaurants and nightclubs, to museum exhibits and themed experiential venues.

Roles and Responsibilities
Job consists of transforming conceptual designs into construction documents and shop drawings using 2D and 3D computer aided design (AutoCAD, Revit, 3D max, Inventor, etc.) for client approval, fabrication, construction and installation. Partial list below.
• Collaborate with project managers and production team during the development of all concepts & fabrication
• Consult with the project team on building methods prior to beginning a project
• Provide material take offs for purchasing and production
• Assemble full submittal packages of all components of the project

Education and Qualifications
A bachelor’s degree in design, architecture, or engineering, with experience in a construction related field are a must for the position.
Knowledge of commercial & themed entertainment design requirements, standards, materials and construction methods
• 3-5 years of experience producing technical drawings in related field
• Work effectively in a fast paced, tight deadline driven environment both with a team and individually
• Exhibit proficiency in Autodesk product line with emphasis on AutoCAD
