OVERVIEW

GCW is a professional engineering/surveying consulting firm incorporated in 1969. In our 50 years, GCW has been a leading provider of a complete range of services related to civil engineering (traffic and transportation engineering, land development, airport design, water/wastewater, hydraulics, flood control), structural engineering, and land surveying.

Roles and Responsibilities
As a Transportation CAD Technician at GCW, you will have the opportunity to collaborate and work as part of a team on a variety of projects related to roadway. This position presents an opportunity for you to design computer-generated engineering drawings for clients in both the public and private sector. Work with engineers and other designers/technicians to prepare and complete plans, calculations, drawings, sketches, and models to support, design, and develop proposals using computer-aided drafting programs.

Education and Qualifications
A high school diploma and a technical school degree/certificate in a related discipline is required. Bachelor of Science degree in an appropriate engineering discipline is preferred. 1 year of working experience within a Civil Engineering Firm using AutoCAD Civil 3D software is preferred. Ability to transcribe and accurately read “as-built” drawings, engineering, architectural, and shop drawings is necessary. Strong AutoCAD Civil 3D software skills are required.
