DOCUMENTATION INTERN

PostingID: I080816

Company: 60East Technologies

Position Type: Internship - indefinite

College Major(s): Computer Science

Website: http://www.crankuptheamps.com

Work Location: Las Vegas, NV

Salary: DOE

College Level(s): Freshmen & Up

OVERVIEW

You're not just any intern. Don't settle for just any internship.

We're looking for people who love technology and high performance computing. People who don't just care about flawless code, but who want to make sure that the code really works for customers. People who believe that a company can only succeed when customers succeed. People who want to build relationships with customers, not just drop code on their doorstep. People who want to ship software that's used in demanding, real-world environments. People who take their work seriously and want to have fun while getting things done.

If that's you, read on!

60East is a fast growing company on the forefront of high-performance computing solutions. Our flagship product, the Advanced Message Processing System (AMPS), powers mission-critical systems for some of the largest financial institutions in the world.

Roles and Responsibilities

In this role, you'll be helping people get the most out of AMPS by creating great content and code. This may take the form of guides, API docs, blog posts, templates, sample projects, training material, or whatever else is most effective. You'll be working directly with customers to understand what customers need, how customers think, and deliver amazing solutions. You'll also be responsible for helping to maintain and develop our document production systems and processes.

We use the world's greatest hardware to build the world's best software, in conjunction with our partners (such as IBM, Intel, SanDisk, Mellanox, and others). We pride ourselves on finding the best developers in the industry, and in this role you'll be working alongside people with experience that runs the spectrum from web startups to open source projects to the biggest software companies in the world.

Qualifications and Education Requirements

- Excellent writing and communication skills
- Working knowledge of at least one of: Python, C#, Java, C++
- Experience with Linux systems
- Ability to get things done independently
- Good communication skills and the ability to work with a geographically dispersed team

Where To Apply:

Submit a resume and cover letter to **jobs@crankuptheamps.com**, with "Best Internship Ever!" in the subject line.
