OVERVIEW

Creative Tent International, founded in 2004 is headquartered in Henderson NV. We have an international footprint with projects in more than 60 countries. Our modular structures offer the best value in the market by bringing innovative and creative solutions to our commercial, military and industrial customers.

Learn more about our structures and tents: Shasta Shelter®, Shasta Sportsplex®, Fastrack®, Shasta Peak® and more. We offer a full line of accessories and service, including installation, strike, maintenance programs and repair services.

Roles and Responsibilities

The position uses computer-aided design and drafting software in the development of drawings and plans for the semi-permanent soft walled shelter market.

The draftsman will utilize AutoCAD software to prepare a visual depiction of the products to be manufactured. They will work closely with sales and production departments to ensure that the drawings include project dimensions, required materials and allow for the visualization of the product from multiple angles.

Summary of Essential Job Functions

- Draft and prepare layout drawings
- Produce draft designs and diagrams according to given specifications
- Prepare drawings and diagrams for electrical devices
- Calculate dimensions and allowances with accurate precision
- Compile data and specification sheets
- Revise drawings and layouts to accommodate changes
Education and Qualifications
• Two (2) years’ experience with AutoCAD (2012 or newer)
• Minimum of an Associate Degree in Computer Aided Drafting
• Experience in using the Microsoft Suite of Products (Excel, Word, PowerPoint)
• Ability to work independently with limited supervision.
