Kaseya is revolutionizing the IT system management space with exciting new hybrid on premise and cloud-based applications that accelerate and simplify IT management for tens of millions of users around the world, on almost every device they use.

As an Intern at Kaseya, you will be a valuable contributor on projects that directly affect the experience for our customers. To help support our interns’ growth and ability to deliver on projects, we offer personalized training, on-the-job and experiential learning methods, and a guided mentorship. We are looking for interns to work part-time now, while in school (this is not a summer internship).

We are an innovative and fast-paced workplace; there is many opportunities for you to work on complex and challenging problems that can affect millions of users and devices that leverage our software. Our internship program is a great way to explore working at Kaseya and gain hands-on experience across different disciplines.

We will give you a lot to do, and we will expect you to deliver something great.

**Roles and Responsibilities**
Write code and work with fellow developers to solve problems and build powerful new features based on user stories provided by Product Managers.

Take ownership of the quality of your own code by writing unit tests for any code you author or modify.

Test deliverables against the user story’s acceptance criteria, and always assure deliverables meet doneness criterion.

Regularly conduct code reviews of your peer’s pull requests.
Contribute to development estimates through “planning poker”.

Contribute to constantly refine our development, continuous integration (CI) and build automation processes.

**Education and Qualifications**  
Currently enrolled in a post-secondary academic institution. Preference will be given to students between their Junior and Senior years.

Significant coursework in Computer Science (major not required)

Flexible hours to work around course schedule; there is an expectation of 10hrs to 20hrs a week.

Permanent legal right to work in the United States, and be local to the Henderson/Las Vegas area.

**Preferred Skills**  
Significant coursework in Computer Science

**How to Apply**
