OVERVIEW

Hayward Baker, a part of the Keller companies, is one of the leading Geotechnical Contractors in the United States working in earth retention, underpinning, piling, grouting and ground modification. Our projects involve solving unique and difficult soil and foundation problems for all types of clients.

We are currently seeking an experienced, proactive Project Manager to join our team in Las Vegas, NV to support our earth retention, drilled shafts and micropile projects. The ideal candidate will have the desire to work in a quality company with superior products and a reputation for excellence.

Hayward Baker, Inc., a part of the Keller companies, is a leading geotechnical specialty contractor with offices located throughout the United States. We offer a comprehensive list of geotechnical construction and design-build services including various ground improvement methods, slope stabilization, liquefaction risk mitigation, grouting, micro-piles, anchors, excavation support, soil mixing, jet grouting, etc. Hayward Baker routinely develops innovative, practical, and cost-effective solutions to challenging geotechnical problems for its customers.

Roles and Responsibilities
In this position, you will be responsible for day to day management of projects, estimating and proposal preparation, business development, contract negotiations, managing change orders and claims, monitoring and managing project schedule, cost control and QA/QC requirements, project invoicing and securing payment.

Education and Qualifications
8+ years as a Civil /Field Engineer with extensive geotechnical construction/deep foundations experience
