QA ANALYST/SPECIALIST

Conduct studies and make recommendations in response to potential or actual quality problems, and to the Quality Assurance Program.
Provide assistance to other quality assurance professionals in the development and implementation of methods for promoting quality assurance.
Advise personnel within the Company on matters concerning quality assurance, codes, standards, and programs.
Perform surveillances of operations to determine compliance with codes.
Ensure timely and orderly completion of inspections, assessments, and reports.
Assists in quality training activities.
Review material and equipment requisitions for adherence to quality standards and codes. Provides QA related support to the continuing development, maintenance, implementation, and institutionalization of the company’s Quality Assurance Program. Consult with line organization supervisors and departmental representatives on quality matters to ensure that procedures and work practices comply with the Quality Assurance Program (QAP), other management systems, and government requirements. Recommend actions related to non-compliance and follow through to ensure corrective actions are implemented. Maintain awareness of current additions or revisions to quality standards and procedures and apply them to work responsibilities as required. Conducts research, data compilation, and data analysis. Executes work in a disciplined manner to demonstrate compliance with laws, codes, orders, and NSTec policies and procedures. Develops solutions for a range of complex problems and issues. Perform duties relating to independent verification and receiving inspection of procured Quality Grade 1, 2, and 3 materials for line organizations. Generates non-conformance reports.

**Education and Qualifications**
Bachelor’s degree in Quality, Engineering, or related field and at least 2 years of relevant experience that included management systems development, quality assurance, and/or assessments.

Experience with Quality Assurance 10 CFR 830, DOE/NNSA Weapons Quality Policy NAP-24, NQA-1, ISO 9001, and DOE Order 414, is desirable. Able to exercise high degree of accuracy required in writing technical documents and ensuring all Company policies and procedures are followed. Must possess independent judgment, creativity, initiative, and ability to apply knowledge and experience to resolve problems, compose correspondence and technical reports, and accomplish goals where established procedures may not be specific.
