Roles and Responsibilities

Position Summary:
The Software Quality Intern will be reporting to the Manager of Software Quality and will work with the QA team on key projects. In addition, this position will help develop, design, and execute test cases for Mobile and Web products. The intern will gain considerable experience in a fast paced, innovative, and dynamic environment.

Responsibilities:
• Execute regression, functional, white and black box testing methodologies.
• Identify and document bugs within assigned projects
• Evaluate and analyze test results for trends or common issues.
• Create test plans, cases and procedures for existing and new software features.
• Collaborate cross-team to recommend improvements to the software.

Qualifications:
Required Experience:
• Major in Computer Science/MIS/Computer Engineering
• Organized, methodical, process driven personality
• Ability to prioritize and execute tasks in high-pressure environment
• Strong interpersonal skills
• Able to report status in an accurate and timely manner.
• Experience with Windows 7 and Windows 10. Experience with Windows Server is a plus.
• Knowledge of Microsoft Office
• Experience with Android and iOS
• Self-Starter, able to work without day-to-day direction.
• Strong written and oral communication skills.

Optional Experience:
• Experience with Atlassian Tools.
• Knowledge of Jira and testing management tools
• Familiarity with HTML, CSS, JavaScript, or other web development languages
• Knowledgeable about popular web browsers (Internet Explorer, Firefox, Chrome, Safari)
• Experience with Python
