OVERVIEW

Aristocrat is a world leader in gaming entertainment, offering a diverse range of products and services, including electronic gaming machines, social gaming and casino management systems. We’re licensed in 240 gaming jurisdictions and operate in 90 countries around the world, with a team of over 3000 employees who deliver outstanding results by pushing the boundaries of innovation, creativity and technology. Since our humble beginnings in 1953, we’ve been driven by a desire to create the world’s greatest gaming experience, every day.

We are looking for a Sr. System Integration Tester who will be responsible for testing company products to ensure that company standards and specifications are met.

You will be responsible for the development of a variety of test suites including functional, regression, usability, stress, load, etc. and work closely with development engineers to identify and isolate defects in the product.

You will be responsible for designing and implementing automated and manual quality assurance test plans and strategies to identify software anomalies and investigate their cause and effects to drive product quality.

Roles and Responsibilities

- Design and implement quality assurance test plans and strategies.
- Performs as the product quality champion to ensure the delivery of high quality products.
- Identify software anomalies and investigate their cause and effects.
- Develop and maintain test cases/test scripts/test automation that aligns with product requirements.
- Maintain the test environments.
- Maintain accurate and appropriate records on all tests performed and related results.
- Actively participate in the development of a variety of test scenarios including functional, regression, usability, stress/load, etc.
- Follows Company testing standards, processes and procedures.
- Work closely with development engineers to review and recommend testable design.
Focused on team success. Works well in a team environment. Assists team members in all areas to achieve successful sprints and retrospectively provides feedback for continuous improvement.

Other duties as assigned.

**Education and Qualifications**

- Requires minimum of 7+ years of experience in Quality Assurance testing in a client/server environment, or its equivalent.
- Experience creating test strategies and test plans on systems with interdependencies.
- Experience creating data driven test scenarios.
- Experience creating and executing test cases and test scripts from User Stories, Use Cases, or Business Requirements.
- Experience with defect tracking and test case management tools.
- Experience with MS SQL.
- Test automation techniques, implementation and tools expertise.
- Must have strong communication skills.
- Bachelor’s degree in Computer Science, Engineering or a related field, or its equivalent.
- Experience with an Agile development methodology, preferably Scrum.
- Experience with a Casino Management System and applications preferred.
- This position may require registration with the Nevada Gaming Control Board (NGCB) and/or other gaming jurisdictions in which we operate.
