SUMMER INTERNSHIP PROGRAM 2020
www.JT4LLC.com/joinus
Requisition #7725

Previous intern work included replacement of video capture equipment by programming Raspberry Pi Boards, creation of software to track systems using the NASA earth models, and adapting infrastructure to convert serial to faster Ethernet Protocols.

Summer 2020 Opportunities:
- Electrical Engineering tasking in a variety of applications (mostly radio frequency, radar, and measurements associated)
- Real Time Programming (e.g., C, VxWorks, etc.)
- Mathematical algorithm development (i.e., MatLab)
- Object-oriented development programming (in C++, C#, and/or Java)

Primary Criteria:
- Junior or Senior Class Standing (required) and a scientific major (EE, Computer Engineering, Computer Science, Math)
- Strong computer skills including Engineering COTS packages (e.g. Matlab), and MS Office Applications
- Electromagnetics, Antenna Theory, and/or Communication and Protocol courses desirable
- GPA and completed coursework in EE, Computer Science and Math, as well as technical experience will play a role in the selection process
- Due to clearance requirements: U.S. Citizenship is mandatory (no dual citizenship). Candidates will be required to pass a background check, drug screen, possess a valid state issued drivers license, and qualify for and maintain a Top Secret/Single Scope Background Investigation (TS/SSBI) clearance.

IMPORTANT DATES:

JANUARY 31ST 2020
Intern application opens
Requisition # 7725

MARCH 6TH 2020
Application submission deadline

EARLY APRIL 2020
Interviews conducted

LAST WEEK OF APRIL 2020
Offer letters dispersed

7 DAYS FROM RECEIPT OF OFFER
Candidate response deadline

MAY 11TH 2020
Work starts (flexible)

AUGUST 21ST 2020
Work ends (flexible)
