SYSTEM ADMINISTRATOR

Posting ID: Company Website: [www.barrick.com/careers](http://www.barrick.com/careers)

Company: Barrick Gold Work Location: Henderson/Elko, NV

Position Type: Full Time Employment Salary: Based on Experience

College Major(s): Computer Science College Level(s): Seniors & Graduate Students

OVERVIEW

This opportunity is posted for consideration by all regular, full-time Barrick Gold North America employees. If you are interested in this position, you must complete the Application for Posted Job Opening Form and give it to your supervisor for approval.

As an IT professional, the System Administrator will bring a strong knowledge of technology capabilities. Key responsibilities will include administration of Microsoft Exchange and Microsoft technologies with server and storage duties. Assist with and maintain the rollout of Microsoft related project initiatives including Active Directory, Microsoft Exchange, Live Communication Server, System Center Operations Manager, System Center Configuration Manager and other Microsoft products.

Key Responsibilities

- Maintain and support Microsoft cloud base solutions such as Azure and Office365.
- Support and maintain Mobile Device Management system and servers for global users and multiple carriers and devices.
- Support and maintain the corporate infrastructure which includes all Windows servers.
- Support of security solutions, including anti-virus solutions, and intrusion detection systems and participate in the corporate DRP process and documentation.
- Provide global support for Barrick’s remote infrastructure at mine sites.
- Create and maintain documentation as it relates to servers, backup and data center configuration.
- Conduct research on products, services, protocols, and standards to remain abreast of developments in the technology industry.
- Approve and administer user accounts, permissions, and access rights.

Preferred Knowledge, Skills and Abilities:

- University or college degree in computer science or engineering.
● Minimum of 2 years of experience in an infrastructure support role.
● Hands-on technical knowledge of servers and storage systems.
● Knowledge and experience with Microsoft Exchange Server and Microsoft Active Directory.
● Knowledge and experience with backup hardware and software.
● Knowledge and experience with multi-server configurations such as VMWare or Windows Virtual server.
● Operating system experience with Windows.
● Knowledge of monitoring software such as Microsoft System Center Operations Manager and System Center Configuration Manager or equivalent.
● Hardware, software, and network connection troubleshooting experience.
● Knowledge of VDI and Citrix would be an asset.
