OVERVIEW

Desert Lumber and Truss have been on the cutting edge of the construction market since 1989. While many companies sell building materials, we also offer our customers a competitive advantage. Whether you are building a subdivision, multi-family project, or your own home, our company is positioned specifically and strategically to help you maximize your investment.

Our long-standing customer and vendor relationships are testaments to our customer satisfaction commitment. No matter the size of your project, you can count on Desert Lumber and Truss. As a truss designer you will be a part of building Las Vegas.

Roles and Responsibilities

Desert Truss is looking to hire individuals that will use proprietary software similar to AUTOCAD to design roof and floor truss systems. Candidates will need to read and understand blueprints and technical drawings. They will also communicate and discuss changes with engineers, architects, and contractors prior to and during construction.

Education and Qualifications

- Minimum education required—High school or GED, architectural or design related field, prefer Bachelor’s degree. Applicable work experience may be substituted for education requirement.
- Minimum experience required—1-year drafting training /experience in a construction or building materials-related industry.
Preferred Skills

- Special skills required—Proficient technical writing skills. Excellent communication skills. Proprietary software, AUTOCAD, computer literate, ability to read technical drawings.
- Special knowledge required—Reading and interpreting blueprints in an architectural related industry.
- Other—PC Literate with Microsoft Office products, AUTOCAD, and other design programs that facilitate learning in-house program with ease.
